

Toro Ratchet Clamps are ideal for commercial and domestic irrigation when securing LDPE tube to barbed fittings. Designed with full length lower jaw and unique reverse teeth, the Toro Ratchet Clamp range is designed with an improved locking mechanism for maximum grip. Manufactured with UV Stabilised Virgin Acetyl for durability and reusability even when installed in the harshest conditions.

## FEATURES & BENEFITS

- Easy to install by sliding the clamp over the tube either before or after inserting the fitting
- Full length jaws provide maximum grip
- Reverse rake teeth clamp extra tight
- Clamp sizes to suit 13 mm, 19 mm and 25 mm LDPE tube
- Operating pressure range up to 300 kPa\*
- Manufactured from Virgin Acetyl
- UV resistant
- Australian made

### To Use

1. Slide the Ratchet Clamp over the tube before or after inserting the barbed fitting
2. Initiate clamping by hand and further secure the clamp with pliers or multigrips
3. Twist the clamp to remove (use pliers or multigrips if necessary)

### Ordering Information—Ratchet Clamp

Product Code	Description
101RC13	13 mm Ratchet Clamp 14 mm – 15.5 mm Clamping Range
101RC19	19 mm Ratchet Clamp 20 mm – 22 mm Clamping Range
101RC25	25 mm Ratchet Clamp 26 mm – 29.5 mm Clamping Range

\*Consideration must be given to the LDPE tube pressure rating. For use with LDPE tube with 0.7 mm or greater wall thickness.
