TORO Finance™

Flexible finance solutions, tailored to you.

The seasonal cost associated with an irrigation system can restrict cashflow and opportunity to optimise crop yields. Couple this with the rising cost of labour, water, repairs and power and cashflow becomes critical.

Accessing a flexible finance solution is the smart option

Toro can help you put together a financial case for an irrigation system, including the cost of labour to install.

System upgrades without the upfront costs

Sometimes the upfront expense can prevent or delay the required system upgrade. Toro Finance can structure a program to ensure your customers are always working with market leading technology and minimising running costs, whilst maximising water delivery and crop yield.

Repayment Structures can be tailored to suit cash flow requirements:

- Seasonal, irregular or even delayed repayments
- Monthly, quarterly or annual payments
- Contract terms to match your irrigation and crop requirements

Toro Finance can tailor a finance option for project segments, system upgrades or a complete irrigation system installation.

Note: All 570 nozzles work in all Toro® sprays.
Precision Series also offer additional models to fit Irritrol®, Rain Bird®, and Hunter® sprays.

** WaterSmart® Feature*

- Shrub, 50 mm (2"), 75 mm (3"), 100 mm (4"), 150 mm (6") and 300 mm (12") Pop-up
- Radius: 0.6-7.9 m (2'-26')
- Operating Pressure Range: 100-520 kPa (15-75 psi)

Versatile. Flexible. Reliable. The Toro® 570ZLP sprinkler embodies all that is required for residential and service contractors wanting to stock just one sprinkler family.

Water Management Highlight

No Flushing on Pop-Up!

With a pressure-activated wiper seal that flushes only upon retraction, flow-by is eliminated on pop-up reducing water waste and allowing more heads per valve. This zero-flush seal is what makes the 570ZLP Series a spray head for those serious about effective water management.

Features & Benefits

Zero Flush Wiper Seal

Prevents flushing on pop-up, allowing more sprinklers on the same line.

One-Piece Check Valve

Easily installed at the factory or in the field. Maintains up to 3m (10') elevation change.

Low Pressure Spring

The low pressure 570ZLP allows for pop-up and retraction at lower pressures.

Ratcheting Riser

For easy and reliable arc adjustment on pop-up models.

Small 50 mm (2") Diameter Cap

Less visible, reducing damage from exposure or vandals.

Enhanced Zero Flush Seal

Specifications

Dimensions

- Body diameter:
  - 35 mm (1 3/8") on 2P, 3P, 4P, 6P and 6P SI models
  - 45 mm (1¾") on 12P SI
- Cap diameter: 50 mm (2")
- Inlet: 15 mm (½") female-threaded
- Side inlet: 120 mm (4¾") from top of sprinkler to center of side inlet

Operating Specifications

- Radius: 0.6-7.9 m (2'-26')
- Recommended pressure for spray nozzles: 210 kPa (30 psi)
- Recommended pressure for rotating nozzles: 280-350 kPa (40-50 psi)
- Flow rate: 0.2-17.0 Lpm

Additional Features

- Stainless steel retraction spring
- Low pressure sealing on LP models at 100 kPa (15 psi) for low pressure pumps and bore systems
- All bodies shipped with flush plug in place

Options Available

- Check Valve (570CV): maintains up to 3 m (10') elevation change (not for side-inlet models)
- 570SEAL: Serviceable seal for all 570Z models
- Effluent water indicators:
  - Effluent Shrub Adapter 570S-E
  - Effluent Snap-on Cap Cover (89-9752)
  - Effluent Molded Cap with seal (102-1211)
- 570-6X: 150 mm (6") Riser Extender
- Riser Pull-up Tool (89-6395)
- Adjustment Key (89-7350)

Warranty

- Two years

- Shrub, 100 mm (4"), 150 mm (6") and 300 mm (12") Pop-up
- Radius: 0.6-7.9 m (2'-26')
- Operating Pressure Range: 140-520 kPa (20-75 psi)

Convenient and versatile. The Toro® 570ZXF sprinkler has all the versatility and features of the 570Z with the added value of Toro's patented X-Flow® technology.

Water Management Highlight

X-Flow Technology Shuts Off Water Waste

A missing or damaged spray head nozzle can let up to 150 litres of water escape per minute. The patented X-Flow technology is a shut-off device built right into the sprinkler. When accidents or vandalism occur the 570ZXF is there to reduce liability and minimise water waste.

Features & Benefits

Patented X-flow® Water Shut-off Device

Built into the riser and restricts water loss by 99% if the nozzle is removed or damaged, eliminating potential erosion or safety concerns. Allows for "dry" nozzle and filter-replacement or maintenance, while the system is running.

Zero Flush Wiper Seal

Prevents flushing on pop-up, allowing more sprinklers on the same line.

Enhanced Retraction Spring and Wiper Seal

Robust retraction spring and enhanced seal material ensures positive pop-up and retraction on all 570Z models.

One-Piece Check Valve

Easily installed at the factory or in the field. Maintains up to 3m (10') elevation change.

Ratcheting Riser

For easy and reliable arc adjustment on pop-up models.

Small 50mm (2") Diameter Cap

Less visible, reducing damage from exposure or vandals.

Patented X-Flow® Shut-off Device

Specifications

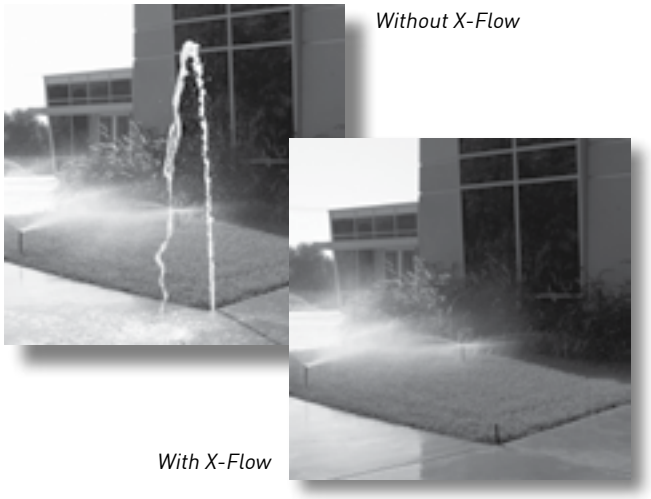
XF Series Sprinklers	
Model	**Description**
570Z-4P-XFCOM	XF 100 mm body only with flow shut-off check valve and flush plug
570Z-6P-XFCOM	XF 150 mm body only with flow shut-off check valve and flush plug
570Z-12P-XFCOM	XF 300 mm body only with flow shut-off check valve and flush plug

Note: all w/o Nozzle



Without X-Flow

With X-Flow

570ZXF allows for dry nozzle installations and change outs

- Shrub, 100 mm (4"), 150 mm (6") and 300 mm (12") Pop-up
- Radius: 0.6-5.2 m (2'-17')
- Operating Pressure Range: 140-520 kPa (20-75 psi)

Built-in pressure regulation. The Toro® 570ZPRX features a patented in-riser pressure regulator, bringing another superior feature to the 570Z series. The 570ZPRX sprinkler includes X-Flow® technology combined in a single riser providing unmatched water management.

Water Management Highlight

570ZPRX: For Those Serious About Water Management

By combining the patented X-Flow and pressure-regulation technologies into one riser, the 570PRX stabilises the performance of the system at 210 kPa (30 psi) from the first head to the last ensuring optimum nozzle performance.

Features & Benefits

Patented In-riser Pressure Regulator

Maintains constant 210 kPa (30 psi) outlet pressure, which minimizes misting and fogging caused by pressures above 210 kPa (30 psi).

Zero Flush Wiper Seal

Prevents flushing on pop-up, allowing more sprinklers on the same line.

Enhanced Retraction Spring and Wiper Seal

Robust retraction spring and enhanced seal material ensures positive pop-up and retraction on all 570Z models.

Ratcheting Riser

For easy and reliable arc adjustment on pop-up models.

Small 50mm (2") Diameter Cap

Less visible, reducing damage from exposure or vandals.

Patented X-flow® Water Shut-off Device

Built into the riser and restricts water loss by 99% if the nozzle is removed or damaged, eliminating potential erosion or safety concerns. Allows for "dry" nozzle and filter-replacement or maintenance, while the system is running.

(Note: All above also available in Pressure Compensating (PC) Models

Features & Benefits

Matched Precipitation Rates

Ensure all nozzles (every arc within a family) apply water at approximately the same rate.

Low Flow Rates

Allow for more sprinklers to be placed on the same zone.

Pre-installed Pressure Compensation Device (PCD)

Eliminate fogging, conserve water and provide precise flow rates (also available without PC Devices).

Complete Selection Of Arcs

Arcs for all radius options – full, 3/4, 2/3, 1/2, 1/3 and 1/4.

Specifications

Operating Specifications

- Operating pressure range: 140-520 kPa (20-75 psi)
- Recommended pressure: 210 kPa (30 psi)
- Flow Rate: 0.2-17.3 Lpm
- Nozzle trajectory:
  1.5 m (5'): 0°; 2.4 m (8'): 10°; 3.0 m (10'): 17°;
  3.7 m (12'): 24°; 4.6 m (15'): 28°;
  Corner and Side Strips: 17°

Additional Features

- Standard and special spray patterns
- Customised screens for each nozzle
- Patterns for small areas: full set of arcs for 3.0 m, 2.4 m, and 1.5 m (10', 8' and 5') radius nozzles
- 1.2-5.2 m (4' x 18') side strip ideal for median strips
- 0.6-1.8 m (2' x 6') for small planter beds and other narrow areas
- Fine-mesh snap-in filter screens for lower flow nozzles
- Five levels of trajectory
- Convenient nozzle packaging – nozzles and screens packed separately
- Adjustment screw allows up to 25% reduction in radius and complete shutoff

Warranty

- Two years

= nozzles with PCDs. All performance specifications are based on the stated working pressure available at the base of the sprinkler.

- Radius: 2.2-5.5 m (8'-17')
- Operating Pressure Range: 150-350 kPa (20-50 psi)
- Arc Options: 0°-360° (infinitely adjustable)

Quick, easy and infinitely adjustable!

Toro® Variable Arc Nozzles (TVAN) are designed to deliver excellent irrigation efficiency with maximum product versatility.

Easy Grip Top

The easy grip top makes arc adjustment from 0°- 360° a snap

TVAN Variable Arc Nozzles Model List	
Model	**Description**
TVAN8	2.4 m (8') Variable Arc Pattern
TVAN10	3.0 m (10') Variable Arc Pattern
TVAN12	3.7 m (12') Variable Arc Pattern
TVAN15	4.6 m (15') Variable Arc Pattern
TVAN17	5.2 m (17') Variable Arc Pattern

Features & Benefits

Matched Precipitation Rates

Within a given radius family (MPR) ensures all nozzles apply water at approximately the same rate.

Unique Grip and Turn Adjustment

Requires no tools and makes arc setting fast and simple. Adjust from the top of the nozzle – wet or dry.

Infinitely Adjustable From 0° – 360°

The TVAN provides a variety of arc settings to precisely match any terrain and reduces inventory by meeting the needs of any size or shape landscape.

Five Colour-coded Nozzles

Allow for quick and easy identification even when retracted.

Specifications

Operating Specifications

- Radius: 2.2-5.5 m (8' to 17')
- Operating pressure range: 150-350 kPa (20-50 psi)
- Recommended pressure: 210 kPa (30 psi)

Additional Features

- Stainless steel adjustment screw allows up to 25% radius reduction
- Nozzle arc adjustment opens from a fixed left stop position indicated by an arrow on the top
- Compatibility with any female threaded riser made, means one nozzle family can meet all your needs

Warranty

- Two years

Pressure Compensating Flood Bubblers

Specifications

Operating Specifications and Features

- Operating pressure range:
  250-400 kPa (30-60 psi)
  Maximum pressure: 520 kPa
- Flow Rate: Adjustable: 0.95-7.6 Lpm
  Fixed Flow: 0.9, 1.9, 3.8 Lpm
- Adjustment screw allows up to 25% reduction in radius
- Compatible with shrub adapter, 570Z Series sprinklers, risers and riser extenders

Warranty

- Two years

Toro's Precision™ Series Spray Nozzles are the most complete and efficient spray nozzle line available to help irrigation professionals manage water use, eliminate runoff and reduce customer water bills. The Precision™ Series Spray Nozzles 25 mm/hr precipitation rate ensures that water is applied more slowly and evenly without sacrificing landscape health. These nozzles are available in a wide selection of arcs and radii, as well as male and female threads, making them ideal for large scale installations and retrofits. The Precision™ Series Spray Nozzles are now pressure-compensating, further enhancing the best-in-class spray nozzle in the industry.

Features & Benefits

Patented H²0 Chip Technology

Using patented H²0 chip technology – and no moving parts – each Precision™ Series Spray Nozzle creates one or more high frequency oscillating streams to achieve the desired arc and radius with one-third less water usage.

Maximize Irrigation Efficiency

Precision™ Series Spray Nozzles deliver an industry first 25 mm/hr precipitation rate, which better matches soil infiltration rate. This lower precipitation rate, along with high distribution uniformity make this the most efficient nozzle family from 1.5-4.6 m (5'-15').

Pressure-Compensating

Pressure-Compensating Precision™ Series Spray Nozzles maintain 25 mm/hr precipitation rate and minimise misting for inlet pressures of more than 280 kPa (40 psi), minimising the need for a regulating head, at fraction of the cost.

Design and Retrofit Effectiveness

The lower flow rate of Precision™ Series Spray Nozzles maximises design efficiency and saves on overall material costs by using fewer valves and less controller stations. In addition, existing systems with low pressure can be fixed with a simple retrofit of the existing high-flow nozzle.

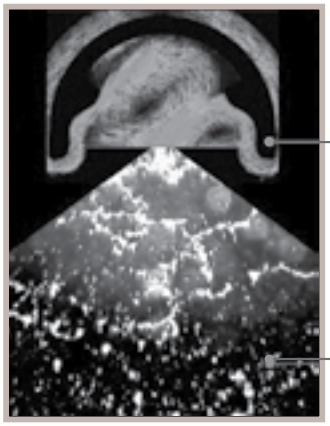
Third-Party Performance Validation

Precision™ Series Spray Nozzles have been tested and validated in the field and at the Centre for Irrigation Technology (CIT).

Water Management Highlight

Patented H²O Chip Technology

On the outside, Precision™ Series Spray Nozzles look like standard spray nozzles, but the performance of the patented H²O Chip Technology on the inside is unmatched. The H²O Chips create high-frequency streams of water that oscillate at a rate of 200 cycles per second. The result is a matched precipitation rate of 25 mm/hr - an industry first - while using up to 35% less water than a standard spray nozzle.

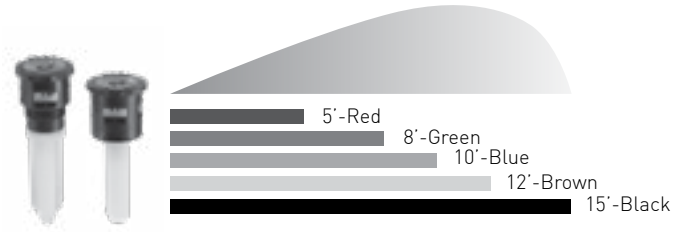


Water enters a specially designed chamber within the H²O Chip where the water expands and collapses, which creates an oscillating effect.

Consistent-sized water droplets exit the Chip in the designed arc pattern and radius, with precise edge definition, class-leading distribution uniformity and reduced water usage.

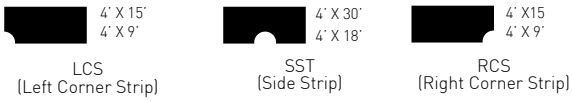
Time Savings

All Precision™ Series Spray Nozzles can be combined on the same zone for greater design and installation flexibility, which equates to time savings on the job site. Whether a new installation or retrofit project, the comprehensive range of Precision™ nozzles meets the needs of any project and all models are available in Toro (Male) and Female threads.



Nine Arcs, Plus Side and Center Strips Available

Side and Corner Strips Available



Specifications

Operating Specifications (with PCD)

- Radius: 1.2-4.6 m (5'-15')
- Operating pressure range: 280-520 kPa (40-70 psi)
- Recommended Pressure: 350 kPa (50 psi)
- Flow Rate: 0.2-10.1 Lpm
- Nozzle trajectory:
  - 1.5 m (5'): 5°
  - 2.4 m (8'): 10°
  - 3.0 m (10'): 15°
  - 3.7 m (12'): 20°
  - 4.6 m (15'): 27°
- Corner and Side Strips: 20°

Additional Features

- Radius reduction 25% maximum
- Color coded for radius on top of the nozzle
- Precipitation rate ≤ 25 mm/hour
- Maintains precipitation rate as radius is reduced up to max of 25%
- Matched precipitation rate within radius families
- Matched precipitation rates between radius families
- Screen attached to nozzle for easy insertion into the spray body
- Works on all spray bodies

Warranty

- Two years

Specifying Information—Precision™ Series Spray Nozzles

- Radius: 4.3-7.9 m (14'-26')
- Operating Pressure Range: 170-520 kPa (20-75 psi)
- 45°-360° Arc Settings
- Fit Toro® or Irritrol®, Rain Bird® and Hunter® Spray Bodies

Based off the design of the world's leading gear-driven rotor for golf applications, the Precision Series Rotating Nozzle is powered by a proven gear drive and delivers wind resistant, multi-stream, multi-trajectory patterns.

Female-threaded PRN-A

Male-threaded PRN-TA

PRN Adjustment Tool

Female-threaded PRN-F

Male-threaded PRN-TF

Features & Benefits

Gear-Driven

Utilises a proven planetary gear drive, variable stator and turbine to rotate the nozzle.

Matched Precipitation Rate of 14 mm/hr

These nozzles deliver water more slowly and evenly than standard spray nozzles. The precipitation rate of 14 mm/hr helps prevent excess run times often set to stay within watering windows.

Consistent Speed of Rotation

The gear drive mechanism delivers a consistent speed of rotation regardless of system pressure and prevents product stalling at low pressure.

Step-Up™ Technology

Step-Up™ Technology is designed to deliver high uniformity with matched precipitation for in-close watering all the way out to the furthest radius point. The unique "steps" create 15 streams, each designed to cover an area of the pattern.

Water Management Highlights

Precision Series Rotating Nozzles supply matched precipitation with any arc and any radius from 4.3 m-7.9 m (14 to 26'). Water is applied slowly and evenly to reduce runoff and wasted water.

Specifications

Operating Specifications

- Radius: 4.3-7.9 m (14'-26')
- Operating pressure range: 140-520 kPa (20-75 psi)
- Recommended pressure: 280-350 kPa (40-50 psi)
- Flow Rate: 0.65-14 Lpm

Additional Features

- 15 unique streams with different trajectories
- Maximum height of 20° trajectory to fight through wind
- Threads onto nearly all sprayheads and shrub adapters (male or female)
- Pre-attached screen for easy installation
- Radius reduction up to 25% by turning set screw 90°
- Color coded to identify adjustable or full circle
- Precipitation rate = 14 mm/hr on square spacing plans
- Maintains precipitation rate as radius is reduced
- Matched precipitation from 4.3-7.9 m (14-26')
- Matched precipitation from 1.4-5.2 Bar (20-75 psi)
- Adjustable by hand or tool
- Consistent speed of rotation not affected by pressure

Warranty

- Five years

Precision Series Rotating Nozzle Model List	
Male Threaded	**Description**
PRN-TA	Toro Male Threaded, 4.3-7.9 m (14-26'), Adjustable from 45°-270°
PRN-TF	Toro Male Threaded, 4.3-7.9 m (14-26'), Full-Circle
Female Threaded	**Description**
PRN-A	Female Threaded, 4.3-7.9 m (14-26'), Adjustable from 45°-270°
PRN-F	Female Threaded, 4.3-7.9 m (14-26'), Full-Circle

Specification Note:

Proper system flush prior to installation and primary filtration of 100 mesh is necessary to ensure reliable operation of this product.

PRN Visual Arc Adjustment

The unique adjustment method allows for pre-setting of arc by hand or tool before the nozzle is installed. Visual indicators allow the user to quickly adjust the arc pattern to the desired arc from 45-270°. The adjustment band can be adjusted by hand or with the PRNTOOL. The tool can be ordered separately as: PRNTOOL

PRN—Precision Rotating Nozzle	T—Male Thread Blank—Female Thread	A—Adjustable arc F—Full-circle
Example: A male threaded Precision Series Rotating nozzle with a 7.3 m (24') radius and a 180° arc would be specified as: PRN-TA A female threaded Precision Series Rotating nozzle with a 6.1 m (20') radius and 360° arc would be specified as: PRN-F		

Precision™ Series Rotating Nozzle Shrub & Slope Kit

The new Toro® Precision™ Series Rotating Nozzle Shrub & Slope Kit delivers efficient irrigation in above ground settings, garden beds and nurseries. Pre-assembled out of the box, the kit features a highly efficient Precision™ Rotating Nozzle, 570ZSXF Shrub Riser and Precision™ Check Valve. The kit has a universal 15 mm (½") female inlet, making it a go-to solution for both new installs and retrofit projects.

Pre-installed adjustable or full circle Precision™ Series Rotating Nozzle delivers multiple wind resistant, low trajectory streams at a matched precipitation rate of 14.5 mm/hr.

Toro 570SXF Shrub riser with patented X-Flow® Technology prevents water waste by eliminating 99.9% of the flow through the riser in the event the nozzle is removed. Ideal protection against vandalism and theft, or for maintenance convenience. (Flush lateral line before installing)

With a hold-back strength of up to 4.5 m, the Precision™ Check Valve is spring-activated and provides an immediate check at system shut-off, making it ideally suited for slope settings.

Specifications

Operating Specifications

- Radius: 4.2-7.9 m (max radius at 500 kPa operating pressure)
- Operating pressure range: 275-500 kPa (use of the Precision™ Check Valve is not recommended on systems with an operating pressure of less than 275 kPa)
- Recommended operating pressure: 300 kPa
- 15 mm (½") female inlet
- Check height: up to 4.5 m

Additional Features

- Maximum stream trajectory of 20° to help fight wind and minimise drift
- Radius reduction of up to 25% by turning set screw at top of nozzle
- Integrated X-Flow® Technology
- Pre-assembled for easy installation

Warranty

- Two years

Effluent Water Indicators

118-1302
- Lavender molded cover for use on 570Z Series pop-up models

102-1211
- Lavender molded cap for use on 570Z Series pop-up models
- Includes wiper seal

102-0563
- Lavender molded 570Z Series shrub adapter
- Installs onto a 13 mm (½") NPT riser

Precision Check Valve PCV-500
- 15mm (½") male x female thread
- Holds back 4.5 mm (15') elevation change
- Prevents low head drainage

PCV-500 Pressure Loss Data					
Flow rate (Lpm)	4	8	12	16	20
Pressure Loss (kPa)	35	41	45	48	70

Serviceable Parts

570SEAL
- Serviceable seal for all 570Z models
- Recommended for upgrades

Risers and Extenders

570-6X
- 570Z Extender
- Male-inlet threads install onto any 570Z pop-up sprinkler or shrub adapter to provide a 15cm (6") extension
- Maximum pressure: 520 kPa (75 psi)

Check Valve 570CV
- Check valve for all 570Z models
- Install in field to prevent low head drainage

Tools

89-6395
- Riser pull-up and screen removal tool for all 570Z Series models

89-7350
- Adjustment tool for all 570Z Series models

PRNTOOL
- PRN Adjustment Tool for Precision™ Series Rotating Nozzles
- Adjusts arc and radius

PNOZZTOOL
- Robust riser pull-up and screen removal tool
- Retrofit all brands and all spray-head models
- Patent protected

- Inlet Size: ½"
- Radius: 6.1-10.7 m
- Operating Pressure Range: 200-350 kPa (30-50 psi)

When spray heads won't do the job and a full size rotor is just too much, you need the Mini 8 from Toro®. Designed to fill in that hard to cover area between 6.1 m and 10.7 m, the Mini 8 provides great value and water efficiency for your landscapes.

Features & Benefits

Top Arc Indication

Ensures easy adjustments from 40° to 360° with visual feedback of arc change by reading the scale.

Stainless Steel Radius Adjustment Screw

Allows up to 25% reduction.

Pressure Activated Seal

The seal and robust trip mechanism offer enhanced reliability.

Ratcheting Riser

Easily shift the riser and fixed left stop to the desired position.

Five Interchangeable Nozzles

To cover varying flow and radius requirements (comes pre-installed with a 1.5 nozzle).

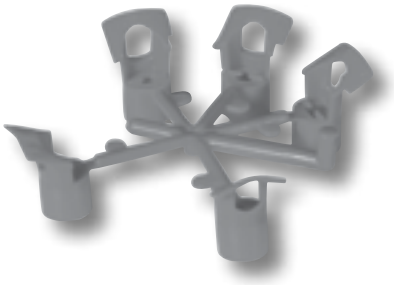
Part and Full Circle In One

Offers convenience and reduces inventory requirements.

Water Management Highlight

Not Too Big and Not Too Small.
The Mini 8 is Just Right.

With the smaller nozzle set you get lower flows on smaller spaces providing more efficient application and water savings. And compared to sprays, it saves on the number of heads which in turn reduces the number of valves and stations required. No matter how you look at it, the Mini 8 brings together money savings with better water management.



Nozzle Tree—Five interchangeable nozzles – comes pre-installed with a 1.5 nozzle

Arc setting is visible from the top of sprinkler

Arc Scale

Use a slotted screwdriver to turn. Read arc change on the arc scale as the screwdriver is turned. The arrow points to the arc degrees.

Specifications

Dimensions

- Body height: 150 mm (6")
- Pop-up to nozzle height: 95 mm (3¾")
- Exposed diameter: 45 mm (1¾")
- Cap diameter: 57 mm (2¼")
- Inlet: ½" female-threaded

Operating Specifications

- Radius: 6.1–10.7 m
- Operating pressure range: 200-350 kPa
- Flow Rate: 3.0-11.5 Lpm
- Trajectory: 25°

Options Available

- MINI8-CV – Check Valve – maintains up to 8' elevation change (Bag of 25)
- 102-2024 – Adjustment Tool

Warranty

- Two years

Optional Check Valve
Prevents low head drainage and puddling at the sprinkler.

Specifying Information — Mini 8

MINI8-4P-XX-XX				
MINI8	4P	XX		XX
Description	**Body**	**Nozzle**		**Optional**
MINI8—Mini 8 Rotor	4P—Lawn Pop-up	75—7.5 10—1.0 15—1.5	20—2.0 30—3.0	CV—Check Valve
Example: A Mini 8 Series sprinkler with a 3.0 nozzle would be specified as: MINI8-4P-30				

Note: MINI8-CV available in bags of 25.

- Inlet Size: 20 mm (¾") for Lawn and High-pop; 15-20 mm (½"-¾") for Shrub model
- Radius: 4.6-9.2 m
- Operating Pressure Range: 240-350 kPa

The 300 Series Multi-Stream Rotor from Toro® combines a highly distinctive way to irrigate with the reliability you've come to expect. Uniquely designed, Multi-Stream Rotors feature multiple rotating streams, a slower precipitation rate and excellent wind resistance.

Features & Benefits

Unique Multiple Rotating Streams

Provide slow, effective watering, plus you can zone your arcs together, saving time and water.

Matched Precipitation Rate Arc Discs

Ensures uniform delivery of water across each square foot of an irrigated area, resulting in high-precision water application.

Choice of Six Nozzles and Nine Interchangeable Arc Discs

For maximum versatility covering varying landscape needs (4 separate nozzles for high-pops).

Selection of Pop-up Heights

75 mm (3") Lawn Pop-up, shrub and high-pop – to satisfy varying installation requirements.

300 Series arc discs come in 9 different selections

300 Series Multi-Stream Rotor Model List	
Model	**Description**
300-00-00	Lawn Pop-up w/o Nozzle
300-10-00	Shrub w/o Nozzle
300-12-00	300 mm (12") Pop-up w/o Nozzle

Water Management Highlight

A Winning Combination of Watering Efficiency and Visual Appeal

The exclusive "fingers of water" application takes a flow of water and divides it into smaller streams at different trajectories for a stronger performance all across the landscape. Shorter radii get the coverage needed with enough water still in the main stream to reach longer distances. This also creates a heavier watering stream at the tail end of the spray allowing for greater wind resistance.

Specifications

Operating Specifications

- Body Diameter: 60 mm (2 3/8")
- Cap Diameter: 75 mm (3")
- Height:
  - Lawn Pop-up: 155 mm (6 1/8")
  - High-Pop: 405 mm (16")
- Shrub Base Diameter: 45 mm (1¾")

Additional Features

- Radius: 4.6-9.2 m (15'-30')
- Flow Rate:
  - Lawn Pop-up and High-pop: 2.2-31.2 Lpm
  - Shrub: 7.8-24.0 Lpm
- Operating Pressure Range: 240-350 kPa
- Trajectory: 3 angles to cover short, medium & large radius
- Pop-up to nozzle:
  - Lawn Pop-up: 70 mm (2¾")
  - High-Pop: 298 mm (11¾")
- Inlet (Female-threaded):
  - Lawn Pop-up and High-pop: 20 mm (¾")
  - Shrub: 15 mm (½") to 20 mm (¾")
- Large basket filter screen
- High-pop model fitted with locking cap

Options Available

- Recycled Water Indicators:
  - 89-7853 — Omni Nozzle Cover (Use with Part No. 300-15)
  - 89-7854 — High-pop Omni Nozzle Cover (Use w/Part No. 300-25)
  - 89-7889 — Rotor Plug

Warranty

- Two years

The Toro® T5 RapidSet® Series Rotor has the features to satisfy all your basic irrigation needs while surprising you with a few extras. The T5 offers an extra inch of pop-up height compared to most competitive units. All lawn models are now available with the optional RapidSet® feature, a quick and easy way to make arc adjustments—with NO TOOLS. For those day-in and day-out installations, the T5 is the only rotor you'll need.

Stream straighteners align the water flow behind the nozzle.

Nozzles
Geometry on the face of the nozzle creates breakup.

Features & Benefits

127 mm (5") Pop-Up

Easily replaces many competitive 100 mm (4') units in the same footprint but delivers an extra inch of pop-up.

Standard Rubber Cover

The top of the sprinkler is covered with a heavy duty rubber cover to minimize impact injuries and reduce liability.

Airfoil™ Technology Nozzles

The T5 RapidSet rotor comes with a full set of 8 standard nozzles (25° trajectory) and 4 low angle (10° trajectory) nozzles that utilise patent pending Airfoil technology, which creates a zone of low pressure just below the main stream to gently guide water downward for unmatched uniformity without forcefully washing out newly-laid seeds.

Optional Check Valve

Available with a hold back strength of 2.1 m of elevation change.

Top Adjust Arc Set

The T5 can be set between a minimum arc set of 40° and a full circle set of 360°. Arc changes are made from the top of the sprinkler while popped up or down by using a small slotted screwdriver.

RapidSet® Arc Adjustment

Easy tool-free arc adjustment, without any risk to over torque and damage the interior of the rotor.

T5HP-RS	305 mm (12") High Pop-up
T5HPE-RS	305 mm (12") High Pop-up, Effluent
89-7561	Check valve

Specifications

Dimensions

	Lawn Pop	Shrub	HP
Body Diameter:	57 mm (2¼")	57 mm (2¼")	57 mm (2¼")
Cap Diameter:	67 mm (2 5/8")	N/A	67 mm (2 5/8")
Height:	190 mm (7½")	196 mm (7¾")	429mm(16 7/8")

Operating Specifications

- Radius: 7.6-15.2 m
- Arc Set: 40–360°
- Flow Rate: 2.8-36.5 Lpm
- Operating Pressure Range: 170-450 kPa
- Trajectory: 25° standard, 10° low angle
- Pop-up to nozzle: 127 mm (5")
- Inlet: 20 mm (¾")
- Factory installed with a #3.0 nozzle

Options

- Check valve
- Stainless Steel riser
- Effluent indicator

Warranty

- Five years

Perrot LVZA Pop-up Sprinkler

The Perrot LVZA pop-up sprinkler range is an ideal sprinkler for watering medium turf areas. Capable of achieving a throw of up to 14.5 m, the LVZA can be used in larger turf areas, parks and sports grounds. Featuring Perrot's proven impact drive system, the LVZA sprinkler works in a wide variety of water sources.

Features & Benefits

Nozzle with Diffuser Pin

Nozzle with a diffuser pin that can be screwed in or out of the flow path to increase or decrease the sprinklers throw.

Anti Back-Splash Lever Arm

Anti back-splash lever arm ensures that water from the lever arm is directed parallel to the main jet. This will avoid any unwanted overspray especially in part circle applications.

Full Circle & Part Circle

- Each LVZA pop-up sprinkler can be adjusted to a full or part circle arc.
- Part Circle (30-330°) - via arc adjustment springs.
- Full circle (360°) - lift the arc trip lever or remove the arc adjustment stops.

Proven Impact Drive

Perrot impact drive technology ensures an uninterrupted flow path that allows the use of a wide variety of water sources.

Robust Construction

Constructed from brass, stainless steel, engineered plastics and housed in a hot dipped gavanised can, the LVZA has been built to last.

Specifications

Applications

- Medium sized turf areas

Technical Data

- Nozzle Sizes: 4 and 4.5 mm
- Operating Pressure: 250 - 600 kPa
- Radius Range: 12 - 14.5 m
- Flow Rate: 15 - 29.3 Lpm
- Trajectory: 22°
- Inlet: 20 mm (3/4") BSPF

LVZA(FC/PC)

LVZA Product Details

Sprinkler Type	Inlet	Body Height	Pop-up Height	Minimum Pressure	Exposed Surface	Lid
LVZA Pop-up	20 mm (3/4") BSPF	224 mm	66 mm	250 kPa	190 mm	152 mm

- Inlet Size: 25 mm (1") BSP
- Radius: 14.0-22.9 m
- Operating Pressure Range: 280-700 kPa (40-100 psi)

The Toro® T7 Rotor is built rugged to withstand the harsh conditions and vandalism present in municipal/government, sports fields and commercial rotor applications.

Features & Benefits

Top Arc Indication

Arc setting indicator on top of the rotor allows for easy wet or dry adjustments from 50°-360°.

High Efficiency Nozzles

Single port design ensures water is evenly distributed across the pattern without putting too much water near the head, which prevents seed from washing away.

Vandal and Abuse Resistance

Smart Arc™ memory safely returns sprinkler to previously set arc if vandalized.

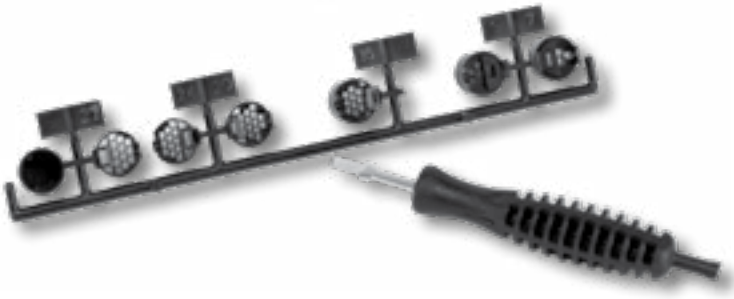
Design Solutions and Safety

Standard check valve to prevent low head drainage. Small exposed diameter reduces possibility of injury on play areas.

Durability

Heavy duty retract spring and water-lubricated gear drive. Wiper seal reduces stick-ups and wiper seal leaks.

T7 Rotor Model List	
Model	**Description**
• T7P-52	25 mm (1") Rotor, BSP
• T7P-52E	25 mm (1") Rotor, Effluent Indicator, BSP
• T7PSS-52	25 mm (1") Stainless Steel Rotor, BSP
• T7PSS-52E	25 mm (1") Stainless Steel Rotor, Effluent Indicator, BSP



Standard rubber cover with arc indicator from 45°-360° simplifies installation and service

Specifications

Dimensions

- Pop-up height to nozzle: 127 mm (5")
- Body height: 220 mm (8¾")
- Rubber cover diameter: 57 mm (2¼")
- Body diameter: 70 mm (2¾")

Operating Specifications

- Precipitation rate: 7.6 - 17.4 mm per hour
- Radius: 14.0 - 22.9 m
- Flow rate: 25-115.8 Lpm
- Operating pressure range: 280-700 kPa
- Inlet size: 25 mm (1") BSP
- Nozzle trajectory: 25°
- Arc adjustment: 50°-360° (unidirectional at 360°)
- Factory installed with #12.0 nozzle

Additional Features

- Standard check valve
- Threaded cap-retained riser assembly
- Variable reversing stator
- Nozzle tree: (7, 9, 12, 16, 20, 24 and 27) gpm
- Slip clutch
- Nozzle support/breakup screw
- Riser pull-up feature on top of nozzle base
- Adjustment/pull up tool supplied
- Locking cap screw

Options Available

- Stainless steel riser
- Effluent indicator

Warranty

- Five years

Specifying Information—T7 Sprinkler

T7PXX-XXXX			
Descrip.	**Optional**	**Thread**	**Optional**
T7P	SS	XX	E
T7P—Sports Rotor	SS—Stainless Steel Riser	52—BSP	E—Effluent
Example: A T7P sprinkler with a stainless steel riser and effluent rubber cover would be specified as T7PSS-52E			

- Inlet Size: 25 mm (1") BSP
- Radius: 14.6-20.2 m
- Operating Pressure Range: 300-600 kPa (40-90 psi)

Considered the most durable, heavy-duty commercial sprinkler available, the Toro® 640 Series is the proven veteran for athletic fields, parks, campuses and commercial sites.

Features & Benefits

35 Years of Reliability

Once the 640 Series sprinkler goes in the ground, it stays there. With a stainless steel-encased nozzle assembly and gear drive design.

Normally Open Valve-In-Head Body

Allows individual head control - the only commercial grade Toro rotor available with this feature.

Stainless Steel, Engineering Plastic and Brass Construction

Provide dependable performance in the most demanding environments.

Standard Check Valve

Prevents low-head drainage and keeps laterals charged with water.

The 640 installs below grade for increased player safety.

Specifications

Dimensions

- Body diameter: 63 mm (2½")
- Cap diameter: 81 mm (3¼")
- Body height: - Check-O-Matic – 230 mm (9")
  - Valve-In-head: 267 mm (10½")
- Exposed surface diameter when buried 13 mm (½") below grade: 45 mm (1¾")

Operating Specifications

- Radius: 14.6-20.2 m
- Flow Rate: 23.6-92.8 Lpm
- Operating Pressure Range: 300-600 kPa
- Trajectory: 27°
- Pop-up to nozzle: 60 mm (2 3/8")
- Inlet: 25 mm (1") female-threaded
- Below-grade installation: up to 13 mm (½")
- Check-O-Matic maintains up to 4.6 m elevation change
- Selection of five nozzles and 12 arcs
- Adjustment screw allows up to 25% radius reduction

Additional Features

- Standard rubber cover
- Vandal-resistant cap with locking set screw
- Small exposed surface diameter
- Gear-drive design
- Basket filter screen
- Stainless steel retraction spring

Precipitation Rate Data in mm/hr

** ▲ Precipitation rates are for triangular spacing, shown in millimeters per hour, calculated at 50% of diameter.*

** ■ Precipitation rates are for square spacing, shown in millimeters per hour, calculated at 50% of diameter.*

All performance specifications are based on the stated working pressure available at the base of the sprinkler.

Radius shown in meters. Data based on 360°.

Note: For the 640, differing arcs cannot be valved together.

Perrot LVZE Pop-up Sprinkler

The Perrot LVZE pop-up sprinkler range is an ideal sprinkler for watering large turf areas. Capable of achieving a throw of up to 21.6 m, the LVZE can be used in larger turf areas, parks and sports grounds. Featuring Perrot's proven impact drive system, the LVZE sprinkler works in a wide variety of water sources.

Features & Benefits

Nozzle with Diffuser Pin

Nozzle with a diffuser pin that can be screwed in or out of the flow path to increase or decrease the sprinklers throw.

Top-Serviceable

Maintenance on the sprinkler can be performed from the top of the sprinkler without the need for digging.

Anti Back-Splash Lever Arm

Anti back-splash lever arm ensures that water from the lever arm is directed parallel to the main jet. This will avoid any unwanted overspray especially in part circle applications.

Full Circle (K) & Part Circle (W)

LVZE is available in full and full/part circle models.

Full Circle (K) - factory pre-set 360° arc

Part Circle (W): 30 - 330° - via arc adjustment springs
360° - lift the trip lever

Proven Impact Drive

Perrot Impact drive technology ensures an uninterrupted flow path that allows the use of a wide variety of water sources.

Robust Construction

Constructed from brass, stainless steel, engineered plastics and housed in a hot dipped gavanised can, the LVZE has been built to last.

Specifications

Applications

- Medium to large sized turf areas

Technical Data

- Nozzle Sizes: 4.8, 5.2, 6, 7 and 8 mm
- Operating Pressure: 300 - 700 kPa
- Radius Range: 15.1 - 21.6 m
- Flow Rate: 40 - 135 Lpm
- Trajectory: 22°
- Inlet: 25 mm (1") BSP

Perrot HYDRA-2-S VAC Pop-up Sprinkler

The Perrot HYDRA-2-S VAC gear drive pop-up sprinkler is an ideal choice for the irrigation of large turf areas like sports fields and parklands. Capable of achieving a throw of up to 25 m and a flow rate range of 41 - 165 Lpm the HYDRA-2-S is ideal for all larger turf projects. The HYDRA-2-S is supplied with a 24 VAC Valve-In-Head body. The valve is incorporated into the sprinkler body and is easily accessed from the top of the sprinkler.

Features & Benefits

Innovative Nozzle Technology

The unique nozzle design minimizes water turbulence, which results in a longer throw, reduced flows and high uniformity. Nozzles are available in 4, 5, 6, 7, 8 and 9 mm sizes. Nozzles are easily removed / replaced.

Easy Arc Adjustment

- HYDRA-2-S is available in a preset full circle (360°) and adjustable arc model (30-330°). Adjustable arc model is adjustable from both arc stops:
- Left hand arc - up to 90°
- Right hand arc - 30° to 330°

Fast Rotation Speed

Rotation speed for 360° arc in 60 - 130 seconds.

Closed Case Rotor

Designed for maximum efficiency and durability.

VAC Valve-In-Head

The Perrot HYDRA-2-S sprinkler is available with a built-in 24 VAC electric Valve-in-Head body. This allows ON/OFF/Auto control at the rotor and provides individual management of each rotor to ensure that they perform at their highest level of efficiency.

Top Serviceable

All parts including the solenoid can be serviced from the top of the sprinkler without the need for digging.

- Inlet Size: 25 mm (1") BSP
- Radius: 16.2-29.0 m
- Operating Pressure Range: 280-700 kPa

For big open spaces, the Toro TS90 provides unparalleled features and performance into a single fully adjustable rotor.

Features & Benefits

Trujectory Adjustment from 7° to 30°

Fine tunes nozzle spray height, helps provide true head-to-head coverage, and compensates for windy conditions.

Part- And Full-Circle In One Sprinkler

No need to inventory multiple models or service parts.

Back Nozzle Capable

Perfect for perimeter of sports fields. Provides the flexibility for fine-tuning any watering requirement.

Ratcheting Riser

Allows you to adjust the riser position in the body with no disassembly. Simply pull up the riser and ratchet it to the precise position you want to water.

Three Nozzle Configuration

Provides better distribution uniformity, nozzle flexibility and system efficiency.

Constant-Velocity Drive

Provides reliable rotation speed – from sprinkler to sprinkler.

Specifications

Dimensions

- Body Height: 216 mm (8½")
- Pop-Up Height: 100 mm (4")
- Exposed Cap Diameter: 57 mm (2¼")

Operating Specifications

- Radius: 16.2-29.0 m at 25° trajectory
- Flow Rate: 52.9-232.8 Lpm
- Precipitation Rate: 14.2-15.2 mm/hr
- Arc: Full- & Part-circle in one
  - Full-circle: 360° unidirectional clockwise rotation
  - Part-circle: 40°-330°
- Rotation Speed: 3 minutes ± 30 seconds
- Inlet: 25 mm (1") female-threaded (BSP)
- Operating pressure range: 280-700 kPa (40-100 psi)
- Factory installed with #4 nozzle

Additional Features

- Full set of color-coded nozzles that thread directly into the front.
- Rubber cover and below grade installation
- Check Valve standard – maintains up to 3 m (10') elevation
- Nozzle options: 9 main, 3 intermediate, 1 inner

Options Available

- Effluent Indicator available: part number 118-0063
- Main Nozzle Tool: 16 mm (5/8") hex socket or Toro Part 995-99
- Intermediate and Trajectory tool: 8 mm (5 16") hex socket or Toro Part 995-105

Warranty

- Five years

Perrot HYDRA-2-M VAC Pop-up Sprinkler

The Perrot HYDRA-2-M VAC gear drive pop-up sprinkler is an ideal choice for the irrigation of large turf areas like sports fields and parklands. Capable of achieving a throw of up to 31.5 m and a flow rate range of 70 - 190 Lpm, the HYDRA-2-M is ideal for all large turf projects. The HYDRA-2-M is supplied with a 24 VAC Valve-In-Head body. The valve is incorporated into the sprinkler body and is easily accessed from the top of the sprinkler.

Features & Benefits

Innovative Nozzle Technology

The unique nozzle design minimizes water turbulence, which results in longer throw, reduced flows and high uniformity. Nozzles are available in 7, 8, 9, 10 and 11 mm sizes. Nozzles are easily removed /replaced.

Easy Arc Adjustment

- HYDRA-2-M is available in a preset Full circle (360°) and Adjustable arc model (30-330°). Adjustable arc model is adjustable from both arc stops:
- Left hand arc - up to 90°
- Right hand arc - 30 to 330°

Fast Rotation Speed

Rotation Speed for 360° arc in 130 - 280 seconds.

Closed Case Rotor

Designed for maximum efficiency and durability.

VAC Valve-In-Head

The Perrot HYDRA-2-M sprinkler is available with a built-in 24 VAC electric Valve-in-Head body. This allows ON/OFF/Auto control at the rotor and provides individual management of each rotor to ensure that they perform at their highest level of efficiency.

Top Serviceable

All parts including the solenoid can be serviced from the top of the sprinkler without the need for digging.

Perrot TRITON-L Pop-up Sprinkler

The Perrot TRITON-L pop-up sprinkler is an ideal sprinkler for watering large turf areas. Capable of achieving a throw of up to 32 m, the TRITON-L can be used in larger turf areas, parks and sports grounds. Featuring Perrot's proven impact drive system, the TRITON-L sprinkler works in a wide variety of water sources.

TRITON-L K (FC)

TRITON-L W (FC/PC)

Features & Benefits

Top Serviceable

Maintenance on the sprinkler can be performed from the top of the sprinkler without the need for digging. Triton-L has a 'tool free' easy to remove lid that provides easy sprinkler access.

Full Circle (K) & Part Circle (W)

Triton-L is available in full and full/part circle models.

Full Circle (K) - factory pre-set 360° arc

Part Circle (W): 30 - 330° - via arc adjustment springs
360° - lift the trip lever

Proven Impact Drive

Perrot impact drive technology ensures an uninterrupted flow path that allows the use of a wide variety of water sources.

Robust Construction

Constructed from brass, stainless steel, engineered plastics and housed in a hot dipped galvanised can, the Triton-L has been built to last.

Fast Sprinkler Rotation Speed

360° arc in under 1 minute.

- Inlet Size: 40 mm (1½")
- Radius: 26.5-33.0 m
- Operating Pressure Range: 550-1000 kPa (80-150 psi)

For nearly 40 years the 690 series has set the standard for durability and reliability in commercial applications. Extremely rugged, the 690 Series is constructed of brass, stainless steel and engineering plastics for unmatched performance in the most demanding environments.

Features & Benefits

Artificial Playing Surfaces
Radius and flow capabilities are perfect for cooling and rinsing artificial playing surfaces such as football fields.

Electric Valve In Head Models
Provide individual head control that ensures run times can match differing soil, turf and terrain watering requirements, pressure regulation to ensure all nozzles perform at the same pressure and manual ON-OFF-auto control at the head.

Fixed Arc Drives
Nine fixed arc drive assemblies ensure positive retention of the coverage area with no arc drift.

Balanced Application Rate
Used in single or double row applications these sprinklers operate at a slower speed over the non-overlap area and a faster speed over the overlapped areas to provide a balanced application rate.

Specifications

Dimensions
- Body diameter: 254 mm (10")
- Body height: 405 mm (16")

Operating Specifications
- Radius: 26.5-33.0 m

Example: When specifying a 690 Series Sprinkler with a 180° arc, electric valve-in-head, #91 nozzle, and pressure regulation at 550 kPa (80 psi), you would specify: **692-06-918**					

*Electric models only. Note: not all configurations available, refer to the Toro Irrigation pricelist for a complete list of available models.

Perrot VP3 Pop-up Sprinkler

The Perrot VP3 Piston Drive long radius rotor is the irrigation solution of choice for the cooling and washing down of large synthetic turf fields. Capable of achieving a throw of up to 54 m, the VP3 can be installed along the outer perimeter of the playing surface, which helps preserve player safety and maintain field aesthetics.

VP3

VP3 VAC

Features & Benefits

Innovative Nozzle Technology

The unique nozzle design minimizes water turbulence, which helps to maintain stream exit speed at the nozzle outlet. This results in longer throw, reduced flows and high distribution uniformity. Nozzles are available in 16, 20 and 24 mm sizes.

Low Maintenance Piston Drive

A fully enclosed piston drive system presents a smooth, continuous rotation.

Reduced Watering Time

A combination of high flows and fast (adjustable) rotation speeds allows for quick cooling of synthetic sports fields. Rotation speeds of 50 - 120 seconds for a 180° arc.

Integrated Valve-In-Head

The Perrot VP3 sprinkler is also available with a built-in 24 VAC electric Valve-In-Head option. The VP3 VAC features ON/OFF/ Auto control at the rotor and provides individual management of each rotor to ensure they perform at their highest level of efficiency.

Top Serviceable

All parts including the solenoid can be serviced from the top of the sprinkler without the need for digging.

Perrot RollcarT Travelling Irrigator

The Perrot RollcarT is a travelling sprinkler that is ideal for watering large turf areas. Capable of achieving a throw of up to 18 m in radius, the RollcarT can be used in larger turf areas, parks and sports grounds. The RollcarT starts travelling as soon as the water supply is turned on. The RollcarT is drawn toward a guide rope and turns off automatically at the end of its run.

Features & Benefits

Multiple Uses

Part circle sprinkler allows the operator to define the area to be irrigated. Can be operated in full or part circle mode.

Variable Speed

Speed can be altered by regulating the water flow. RollcarT will operate between 10 to 20 m/Hr.

Uniform Distribution

ZE impact sprinkler coupled with constant speed delivers uniform water distribution.

Maintenance Free

Gears are sealed and operate at low friction and remain practically maintenance free.

Convenience

Compact self contained design ensures simple set-up and storage.

Lawn Friendly

Part circle sprinkler operation allows the RollcarT to travel on dry ground eliminating potential damage to new seeded lawn.

Specifications

Applications

- Large lawn areas, sports field

Technical Data

- Nozzle Size: ZE 30 (7 mm)
- Operating Pressure: 350 - 600 kPa
- Radius Range: 18.3 m
- Flow Rate: 54.3 Lpm
- Trajectory: 30°
- Inlet: 25 mm (1") BSP

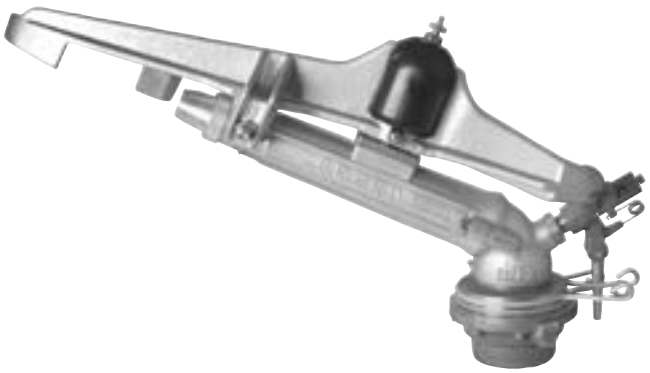
Perrot ZN 23 Impact Sprinkler



The Perrot ZN 23 impact sprinkler is a long radius sprinkler designed for use in agriculture and dust suppression. Capable of achieving a throw of up to 50.5 m, the ZN 23 impact sprinkler is ideal for long radius applications.

Solidly constructed, the ZN 23 can be adjusted to operate as a full or part circle sprinkler.

Features & Benefits

Full Circle and Part Circle Operation

ZN 23 can be adjusted to operate both as full and part circle.
Part Circle (30 - 330°) - via arc adjustment springs
Full Circle (360)° - lift the trip lever or remove the arc stops

Slow Reverse Impact

Designed to return at a slower speed for more even water application.

Protection Cap

Protection cap ensures that the impact arm axle remains clean for trouble free operation.

Adjustable Rotation Speed

Rotation speed of the sprinkler can be adjusted by increasing or decreasing tension on the braking plate.

Solid Construction

Constructed from brass, stainless steel, cast aluminium and engineered plastics.

Specifications

Applications

- Large turf, agriculture and dust suppression

Technical Data

- Nozzle Sizes: 16, 20 and 24 mm
- Operating Pressure: 300 - 700 kPa
- Radius Range: 33.5 - 50.5 m
- Flow Rate: 262.8 - 903.7 Lpm
- Trajectory: 23°
- Inlet: 65 mm (2½)" BSP

Perrot P2S Piston Drive Sprinkler

The Perrot P2S Piston Drive Sprinkler has been designed with a focus on a performance. Capable of a maximum throw of 55 m, the P2S is an ideal solution for sports fields where they can be installed around the outer perimeter of the playing surface. They are also ideal for use in agriculture and for dust suppression applications due to their long throw and fast rotation speed.

Features & Benefits

Innovative Nozzle Technology

P2S nozzle design minimizes water turbulence, which helps to maintain stream exit speed at the nozzle outlet. This results in a longer throw, reduced flows and high distribution uniformity.

Large Radius

Three nozzle sizes (16, 20 and 24 mm) are available offering a radius range of 35 - 55 m and flow rates of 336 - 1011 L/Min.

Low Maintenance Piston Drive

A fully enclosed piston drive system presents a smooth vibration free continuous rotation.

Reduced Watering Time

A combination of high flows and fast (adjustable) rotation speeds allows for quick cooling of synthetic sports fields and is ideal for use in agriculture and dust suppression sytems. P2S features adjustable rotation speeds of 50 - 120 seconds for a 180° arc.

Easy to Adjust

The P2S is a Full/Part Circle sprinkler.
Part Circle (30 - 330°) - via arc adjustment springs.
Full Circle (360°) - remove arc adjustment spring stops.

Specifications

Applications

- Sports fields, agriculture and dust suppression

Perrot P2M Piston Drive Sprinkler

The Perrot P2M Piston Drive Sprinkler has been designed with a focus on performance. Capable of a maximum throw of 69 m, the P2M is an ideal solution for sports fields, agriculture and dust suppression applications.

Features & Benefits

Large Radius

Three nozzle sizes (26, 30 and 34 mm) are available, offering a radius range of 50 - 69 m and flow rates of 961.7 - 2021.7 Lpm.

Innovative Nozzle Technology

P2M nozzle design minimizes water turbulence, which helps to maintain stream exit speed at the nozzle outlet. This results in a longer throw, reduced flows and high distribution uniformity.

Low Maintenance Piston Drive

A fully enclosed piston drive system presents a smooth vibration free continuous rotation.

Reduced Watering Time

A combination of high flows and fast (adjustable) rotation speeds allows for quick cooling of synthetic sports fields and is ideal for use in agriculture and dust suppression sytems. P2M features adjustable rotation speeds of 2 to 7 minutes for a 360° arc.

Easy to Adjust

The P2M is a Full/Part Circle sprinkler.
Part Circle (30° - 330°) - via arc adjustment springs.
Full Circle (360°) - remove arc adjustment spring stops.

Irritrol's new I-PRO™ Series spray heads combine a pressure-activated wiper seal and advanced formula lubricant that virtually eliminate troublesome stick ups. Add a unique tapered lip design that prevents debris from entering the body and you have a spray head with superior performance. It's rugged and reliable with a textured body style for a non-slip grip and even easier installation.

Available in four pop-up heights with side inlet and check valve options, the I-PRO™ Series fits most landscape applications.

Features

Pressure-Activated Seal with lubricant Additive

Cleans debris from stem, reduces flow-by during pop-up and prevents leaking between cap and body. Extra lubricant additive further eliminates stick-ups.

Check valve (optional)

Prevents low-head drainage, eliminating flood or erosion damage by keeping water in lateral pipes in elevation changes up to 3.9 m.

Sturdy and Robust , Textured Body

Provides for easy installation with a non-slip grip.

Side and bottom inlets on 150 mm and 300 mm models (150 mm also available in non-side inlet)

Reduces installation time.

Heavy-duty, stainless steel retraction spring

Ensures positive pop-down.

Male-threaded riser

Compatible with any female-threaded nozzle in the industry.

Pre-installed flush plug

Makes system flushing a breeze and allows for easy nozzle installation.

Ratcheting riser

Two-piece mechanism permits easy arc adjustment in the field while sprinkler is operating.

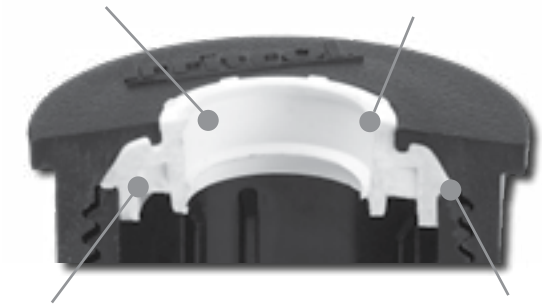
Superior Performing Wiper Seal



Irritrol's new I-PRO™ nozzles with Matched Precipitation Rate are designed to simplify your design process while delivering precision performance. An I-PRO MPR nozzle ensures even water distribution within an arc family allowing for accurate control of precipitation rate, radius and flow. Compared to the competition, these I-PRO nozzles give an equal to or lower on average precipitation and flow rate adding greater irrigation efficiency.

I-PRO nozzles are female-threaded and include a ribbed-edge design for a non-slip grip.

Compatible with all Irritrol spray heads as well as any male-threaded riser in the industry, Irritrol's newest nozzle series are just the right nozzles to get the job done.

Features

Matched Precipitation Rates

Ensures even water distribution within each family.

Low-flow rates

Allow for more sprinklers to be installed on the same zone.

Colour-Coded Top

For quick and easy radius identification.

Female-Threaded

Compatible with any male-threaded riser in the industry.

Ribbed-Edge Design

Provides for a non-slip grip.

Stainless steel radius adjustment screw

Allows for up to 25% in-field reduction.

■ *Square spacing based on 50% of the diameter of throw*

Featuring an exclusive "Smart Grip" adjustment feature, these variable arc nozzles offer the utmost in convenience, as well as reliable, precise performance for any application.

Features & Benefits

Full adjustable arc – from 0° to 360°

Reduces inventory by meeting the needs of any size or shape landscape.

Precision Adjustment

Eliminates dry spots on lawn edges and reduces water waste on sidewalks, etc.

Exclusive "Smart Grip" Head Design

Requires no tools and provides the industry's easiest arc adjustment – even when wet.

Visible right-stop arrow on top of Nozzle

Ensure setting accuracy.

Compatible with any male-threaded riser in the industry

Reduces inventory requirements.

Removable Filter

Reduces the risk of blockages.

Additionnal Features

- Colour-coded for easy radius identification
- Pre-assembled at 0°arc
- Stainless steel radius adjustment screw allows for up to 25% radius reduction.
- Suits the HS, SLP and I-PRO™ Series pop-ups
- 5 year warranty.

Specifications

- Flow rate: 2.0-17.4 Lpm
- Trajectories:
- PRO-VAN8 5°
- PRO-VAN10 10°
- PRO-VAN12 15°
- PRO-VAN15 20°
- PRO-VAN17 25°

533 Bubbler

Designed for localized watering of flower beds, roses, shrub areas and ground covers, Irritrol's 533 Bubbler is the only hand-adjustable flood bubbler that shuts down to a true zero flow.

Features

- **Simple Twist Top Flow Adjustment**
  Easily adjusts by hand with no tools needed!
- **True Zero Flow Shut-Off**
  Allows for temporary maintenance needs
- **Fully Adjustable Arc and Flow Rate**
  For flexibility in precise watering needs
- **Heavy-duty ABS Material**
  Provides durability and long-lasting life

Specifications

- Recommended working pressure: 137-275 kPa
- Flow rate: 5.2-22.4 Lpm
- Maximum operating pressure: 517 kPa
- Inlet size: 15 mm (1/2") female uni-thread
- 5 year warranty

Dimensions

- H: 29 mm
- Top diameter: 27 mm

HS100 Shrub Adaptor

Designed for use with all Irritrol spray head nozzles in shrub and other low traffic areas to mount HS Series nozzles to 15mm MBSP threaded risers.

Features

- Suits HS, LS and I-Pro series nozzles
- 15mm female uni-thread inlet
- Threads directly onto riser
- UV-treated for above-ground mount
- Manufactured of heavy-duty ABS
- Accepts all Irritrol nozzles and any other female-threaded nozzle
- 5 year warranty

Ordering Information	
Code	**Description**
533	Adjustable Bubbler, 15mm female uni-thread inlet
HS100	Shrub Adaptor to suit Irritrol nozzles

The new SLP Series family of sprayheads offers contractors exceptional flexibility, convenience and reliability at an affordable price. Ideal for residential and light commercial applications, the SLP Series features a compact, slim-line body with 50 mm or 100 mm pop-up heights.

For added convenience and flexibility, all SLP Series models may be ordered with pre-installed Irritrol MPR Variable Arc Nozzles (PRO-VAN®), these sprayheads may also be ordered without nozzles. In addition, a field-installable check valve is available to prevent low-head drainage.

The small diameter cap on the SLP Series allows it to blend easily into any landscape. Although compact in design, these sprays feature a sturdy one-piece moulded body and a heavy-duty stainless steel retraction spring which ensures positive pop-down. Unlike some professional pop-ups the SLP riser seal is field replaceable.

The SLP Series sprayheads - setting the standard for flexibility, convenience and value.

Features & Benefits

- Compact slim-line body design.
- Available with pre-installed Variable Arc Nozzles in five radii.
- Matched precipitation rate nozzles provide even coverage.
- Adjustable arc patterns from 0°-360°.
- Debris covers on models without nozzles for easy flushing.
- Ratcheting riser permits easy arc adjustment in the field.
- Pressure-activated seal reduces flow-by during pop-up and keeps debris away from stem during retraction.
- Heavy-duty, stainless steel retraction spring ensures positive pop down.
- One-piece moulded body adds durability.
- Removable nozzle, screen and internal components for flushing and servicing.
- Small diameter cover ensures more attractive landscaping.
- Accepts all Irritrol MPR Variable Arc Nozzles (PRO-VAN®) and Irritrol MPR Canopy™ fixed-arc nozzles.
- Three Year Warranty.

Fully adjustable pop-up sprinkler suited to small to medium residential lawns and gardens.

Shrub head also available for above ground watering of shrubs and ground cover.

Features & Benefits

- Residential Lawns.
- Garden Beds.
- Ground Covers.
- Full 50 mm pop-up height.
- Easy to install.
- Space from 3.3 to 4.0 metres apart to provide uniform watering across the zone.
- Stainless steel reduction screw for radius adjustment.
- Filter screen is removable for easy cleaning.
- Stainless steel spring for positive retraction.
- Durable, corrosion-resistant construction.
- Ratcheting riser allows for easy spray direction adjustment.

Specifications

- Inlet: 15 mm FBSP
- Pop up height: 50 mm
- Body height: 100 mm
- Top Diameter: 50 mm
- Operating Pressure Range: 50-250 kPa

Shrub Head Sprinkler

- Provides for above ground watering of shrubs and ground covers.
- Easy-to-use radius adjustment screw.
- 15 mm (1/2") FBSP thread

For home gardens. Fully adjustable pop up and shrub head.

△ *Precipitation Rate on triangular spacing based on 50% of the diameter of throw, in mm/h*

Antelco® Rotor Max™ Midi Sprinklers (suit "Butterfly" applications)

Application

Greenhouses, vegetables and under tree watering.

Excellent single sprinkler distribution. Smooth rotation, robust design, durable construction. The standard sprinkler has a black colour coded 25° trajectory spinner.

Dimensions

- Height: 96 mm
- Width: 90 mm
- Weight: 38 grams

Features

- Easily taken apart for servicing
- Dual outlet sealed spinner enhances performance
- Nozzle options are coloured to identify flow
- 1/2" BSPM inlet
- Spinner and nozzle constructed from UV stabilised acetal
- Frame constructed from polypropylene

Rotor Max™ tested 0.2 m above ground

Antelco® Rotor Rain® Mini Sprinklers

Low trajectory with large droplets. Robust, reliable and accurate.

Features

- 3/8" MBSP inlet
- Purple nozzle – 2.8 mm orifice diameter
- Break-off spray deflector for close in watering of young trees.
- Full flow flipper suspended between two bearings for reliable performance.
- Constructed from UV stablized material; Frame – acetal, Flipper – nylon, Nozzle – acetal

Dimensions

- Height: 49 mm
- Width: 46 mm
- Weight: 8 grams

Rotor Rain® Performance Data					
Product Code	Pressure kPa	Diameter m	Flow Rate Lph	Stream Height m	Deflector Diameter m
10120365	100	11.2	265	0.8

	200	13.0	385	1.0	
	250	12.4	430	1.1	

Application

Suitable for vegetables, ornamentals, landscaped gardens, commercial tree and vine crops.

Durable and reliable with excellent distribution uniformity. Vari-Rotor Spray™ can be adjusted to reduce volume of flow and radius of throw.

Features

- "C" Frame design for strength and distribution uniformity
- Full flow flipper suspended between two bearings
- Inverted model incorporates special dust cover to protect bearing
- UV Stabilised material: Frame – acetal, Base-acetal, Flipper-nylon
- Inlet: 10-32 UNF thread, 4 mm

Spectrum 360™ Jet

An adjustable full circle vortex spray jet with fine water droplets. Flow and coverage can be altered by rotating the cap.

Applications

Suitable for a variety of landscape, nursery, pot plant and garden watering.

Features

- Adjustable flow including shut-off
- Removable cap for easy cleaning
- Three inlet connection options

Micro Spray Jets

Two piece jets with precise watering patterns, suited to a wide range of applications including home and landscaped gardens, horticultural and viticultural crops.

Features

- Five optional spray patterns.
- Winged base for easy hand installation.
- No separate tools required.
- Colour coded bases for flow rate identification.
- Caps feature a snap ring which firmly engages the base.
- Cap and base constructed from acetal
- Effective performance at low pressure (100 kPa)

Antelco® CFd® Downspray

The C-Frame Downspray is a 360° spray jet that distributes water evenly across the wetted surface area. Stake assembly options provide savings in labour and installation time.

Applications

Nurseries, tree lots, pot plants, home and landscaped gardens.

Features

- 45° downspray reduces the effect of wind
- Gentle spray minimises damage to delicate plant foliage
- Galvanised wire stake assembly incorporates shutt-off clip to stop flow
- ASTA stake assembly incorporates a hole punch for easy installation
- 3 colour coded frames to identify flow rates
- Quick insertion thread with leak-proof design
- UV stablised for long life

Snap-Jet™ Spray

Low maintenance spray jet with easy-to-fit snap in jets providing for reliable irrigation of trees, vineyards, greenhouses and vegetables.

Applications

- Orchards
- Vineyards
- Greenhouses
- Vegetables

Features

- Available in three different flow rates
- Colour-coded bases for flow rate identification
- No moving parts for maximum efficiency
- Constructed of heavy duty UV resistant plastics for long life
- Easily disassembled for cleaning
- Screws into 4 mm tubing

The Snap-Jet is the economically priced spray jet.

Butterfly Sprinkler

Applications

- Economical low pressure 'butterfly' type sprinkler with rotating spinner.
- For use in nurseries
- Manufactured from quality engineering plastics with stainless steel spindle

Specifications

- Inlet: 15 mm MBSP
- Jet size: 3.1 mm
- Flows: 4.4 Lpm to 7 Lpm
- Diameters: 9.8 m to 11 m

An economical alternative.

IMPOP-RSR Part Circle Impact Sprinkler

Applications

The IMPOP-RSR impact sprinkler can be used for dirty water on above grade installation by mounting on a pipe/riser in agricultural and turf applications.

Key Features

- Weighted guide arm controls stream and prevents side splash onto buildings, streets or walkways
- Five interchangeable, colour-coded nozzles from 5.7 to 28.7 Lpm
- Matched precipitation rates
- Part or full circle operation
- Heavy duty plastic construction
- Radius reduction screw allows up to 25% reduction
- No tools needed to change nozzles
- 3.4 mm (Black) nozzle pre-installed

Specifications

- Inlet: 15 mm MBSP
- Flows: 5.7 to 28.7 Lpm
- Diameters: 18.4 to 27.6 m
- Recommended operating pressure: 200-350 Kpa
- Maximum operating pressure: 480 kPa
- Five colour coded nozzles:
  - Orange
  - Red
  - Black
  - Blue
  - Green

Tried and tested. Durable plastic construction, gives excellent overhead watering performance even in windy conditions.

Features

- Single or double jet impact sprinkler with 24° trajectory
- Tough acetal body with stainless steel fulcrum pin and springs
- Superior three washer bearing stack gives more reliable and consistent rotation
- Improved rear jet design increases irrigation performance
- Bayonet nozzles allow easy field service with no tools
- Rear jet inter-changeable with AR3 rear nozzle
- Improved water distribution

Specifications

- Inlet: 20 mm MBSP
- Flows: 11.8 to 67.5 Lpm
- Diameters: 24 m to 35.8 m
- Recommended Operating Pressure Range: 250 to 450 kPa
- Optimum pressures 300 to 350 kPa (shown shaded in grey)

Applications

- Orchards
- Pastures
- Vegetables

An economical brass impact sprinkler designed to give reliable overhead performance, even in windy conditions.

Features

- Full circle and part circle models
- Available in single or double jet configurations
- Stainless steel fulcrum pin and springs
- High grade quality washer/bearing stack
- Trajectory 27°
- Brass jet
- Main jets come with plastic straightening vane insert

Specifications

- Inlet: 20 mm MBSP
- Flows: 11.1 Lpm to 52.2 Lpm
- Diameters: 23.5 m to 32.1 m
- Recommended Operating Pressure Range: 250 to 400 kPa

Model 1SS Wedge Drive Impact Sprinkler

Applications

Specifically designed for use in under-tree applications.

Features

- Trajectory: 24°
- Wedge drive aids distribution at lower pressures
- Brass body, arm and jets, with stainless steel fulcrum pin and springs

Specifications

- Inlet: 15 mm MBSP
- Flows: 2.7 Lpm to 10.9 Lpm
- Diameters: 17 m to 24 m
- Recommended Operating Pressure Range: 200 to 300 kPa

Wedge drive helps deliver better watering.

101BPC15MM	15 mm Brass Full/Part Cirlce Senator Sprinkler
101BLOCK	15 mm Brass Metal Epoxy Coated Full/Part Circle Block Sprinkler

Applications

- Orchards
- Pastures
- Vegetables

A dependable high performance full circle metal impact sprinkler widely used on aluminium hand-move or fixed systems.

Features

- Corrosion resistant non-ferrous metal body and arm with stainless steel fulcrum pin and springs
- Brass bearing and stem
- Single or double jets offering a wide range of applications

Specifications

- Inlet: 15 mm MBSP or 20 mm MBSP
- Flows: 6.3 Lpm to 42.4 Lpm
- Diameters: 20.9 m to 32.3 m
- Recommended Operating Pressure Range: 200 to 350 kPa
- Optimum pressures: 250 to 300 kPa (shown shaded)

President Impact Sprinkler

Applications

- Pastures
- Vegetables

A traditional high performance full circle metal impact sprinkler widely used for overhead watering of pastures and vegetables.

Features

- Diecast zinc body and arm, coated for improved corrosion resistance
- Stainless steel fulcrum pin and springs
- Single or double, accurately engineered plastic jets to suit a wide range of medium pressure applications
- Main jet comes with straightening vane

Specifications

- Inlet: 20 mm MBSP
- Flows: 17.1 Lpm to 62.3 Lpm
- Diameters: 24.4 m to 34.1 m
- Recommended Operating Pressure Range: 250 to 400 kPa
- Optimum pressure - 300 kPa (shown shaded grey)

Widely used on hand-move or fixed systems.

Applications

- Orchards
- Pastures
- Vineyards

A traditional metal impact sprinkler for applications in the medium pressure range.

Suits applications in the medium pressure range.

Features

- Diecast zinc body and arm, coated for improved corrosion resistance
- Stainless steel fulcrum pin and springs
- Single or double jets offering a wide range of applications
- Unique balanced arm means the sprinkler is suitable for use on tall riser pipe
- Long flow straightening main nozzle

Specifications

- Inlet: 25 mm FBSP.
- Flows: 22.7 Lpm to 91.2 Lpm
- Diameters: 29.4 m to 34.8 m
- Recommended Operating Pressure Range: 250 to 400 kPa

Applications

- Frost Control
- Crop Cooling
- Pastures

Features

- Single or double nozzle impact sprinkler with 25° trajectory
- Tough epoxy coated pressure cast zinc body and arm, stainless steel fulcrum pin and springs
- Full circle
- Fitted with high density polyethylene spring cover.

Specifications

- Inlet: 25 mm FBSP
- Flows: 26 Lpm to 102 Lpm
- Diameters: 32 m to 44 m
- Recommended Operating Pressure Range: 300 to 500 kPa

Polyethylene spring cover for added spring protection.

Parts – Ordering – Model 15

Typhoon™ Impact Sprinkler

Applications

For use on aluminium hand-move or fixed systems.

Single jet impact sprinkler with adjustable arm-spring for adjustment of rotation times.

Features

- Die Cast body and arm, with zinc plating, stainless steel fulcrum pin and spring, brass bearing sleeve

Specifications

- Inlet: 25 mm FBSP
- Flows: 33.0 Lpm to 56.4 Lpm
- Diameters: 31.8 m to 37.9 m
- Recommended Operating Pressure Range: 300 to 400 kPa

For medium pressure applications.

Model 6S Metal Impact Sprinkler

Applications

Full circle impact sprinkler suitable for higher pressure applications.

Features

- Double jet high performance impact sprinkler constructed of quality aluminium alloy
- Recommended Operating Pressure Range: 500 to 700 kPa
- #16 Jet with adjustable diffuser pin factory fitted to sprinkler body
- 23° Trajectory

Specifications

- Inlet: 32 mm MBSP
- Flows: 212 Lpm - 501 Lpm
- Diameters: 57.2 m to 71.9 m

Sprinkler Sled Bases

Polypropylene Sprinkler Base
Code: 1014398

Mini sprinkler sled for inline tube and mobile applications such as bowling greens.

- Outlet: 15 mm FBSP
- Inlet: 15 mm MBSP
- Suitable for tube sizes up to 19 mm
- Weight 0.13 kg
- Diameter: 305 mm
- Height: 90 mm

Heavy Duty Galvanised Steel Sprinkler Base
Code: 101SLED20

Stable circular base suitable for impact sprinklers in mobile applications such as open space turf.

- Outlet: 20 mm FBSP
- Inlet: 20 mm MBSP
- Weight: 1.5 kg
- Diameter: 355 mm
- Height: 107 mm

Super Heavy Duty Galvanised Steel Sprinkler Base
Code: 101SLED32

Stable circular base suitable for impact sprinklers in mobile applications such as open space turf.

- Outlet: 32 mm FBSP
- Inlet: 32 mm MBSP
- Weight: 3.85 kg
- Diameter: 450 mm
- Height: 182 mm

Application

- Orchards
- Nurseries
- Overhead frost protector
- Vineyards

Engineered to provide improved water application for low volume, under-tree and under vine installations.

Features

- Aerofoil shaped frame improves distribution
- Snap Fit bearing provides easy field disassembly
- Anti-insect/dust proof spinner retracts to protect nozzle when not in operation
- Improved distribution characteristics with large droplet size being less susceptible to wind effects
- Low angle of throw for maximising under foliage penetration
- Available with snap-off deflector for irrigating young trees. (Reduces diameter to 30% of stated performance)
- Also available with Limited Throw Deflector (LTD)
- Retrofittable deflector plate creates fixed spray pattern for reduced throw on young plants
- Available (for easy identification) in eight colour coded flow rates ranging from 29 Lph to 304 Lph
- Recommended operating pressure as shaded on chart for optimum performance
- Maximum diameter of throw in excess of 10 metres

Specifications

- Inlet: 10 mm MBSP/NPT
- Recommended Pressure Range: 100 – 200 kPa
- Materials: Frame, bearing and nozzle: Acetal. Spinner: Nylon

Waterbird® PC (Pressure Compensating) Mini Sprinkler

Application

Delivers a spray pattern that suits a wide range of crops. Suits a mixture of applications including under tree irrigation, overhead irrigation, vegetables, vineyards, orchards, greenhouse applications and overhead frost protection.

Features

- Unique patented pressure compensating diaphragm assembly for improved performance
- Pressure compensating mechanism provides uniform flow on undulating terrain
- Anti-insect/dust proof spinner retracts to protect nozzle when not in operation
- A two stage spinner provides two diameters of throw. The smallest diameter is for younger trees, and the deflector is simply removed for developed trees
- Aerofoil shaped frame improves sprinkler distribution pattern
- Large droplet size is less susceptible to wind effects
- Snap Fit bearing for easy infield maintenance
- Low angle of throw maximises under foliage penetration
- Eight colour coded flow rates from 35 Lph to 152 Lph
- Available in both standard and deflector tab spinners
- Fully assembled models available with pre-installed tube and stake

Specifications

- Inlet: 10 mm MBSP/NPT
- Recommended Pressure Range: 150 – 350 kPa
- Materials: Frame, bearing and nozzle: Acetal. Spinner: Nylon

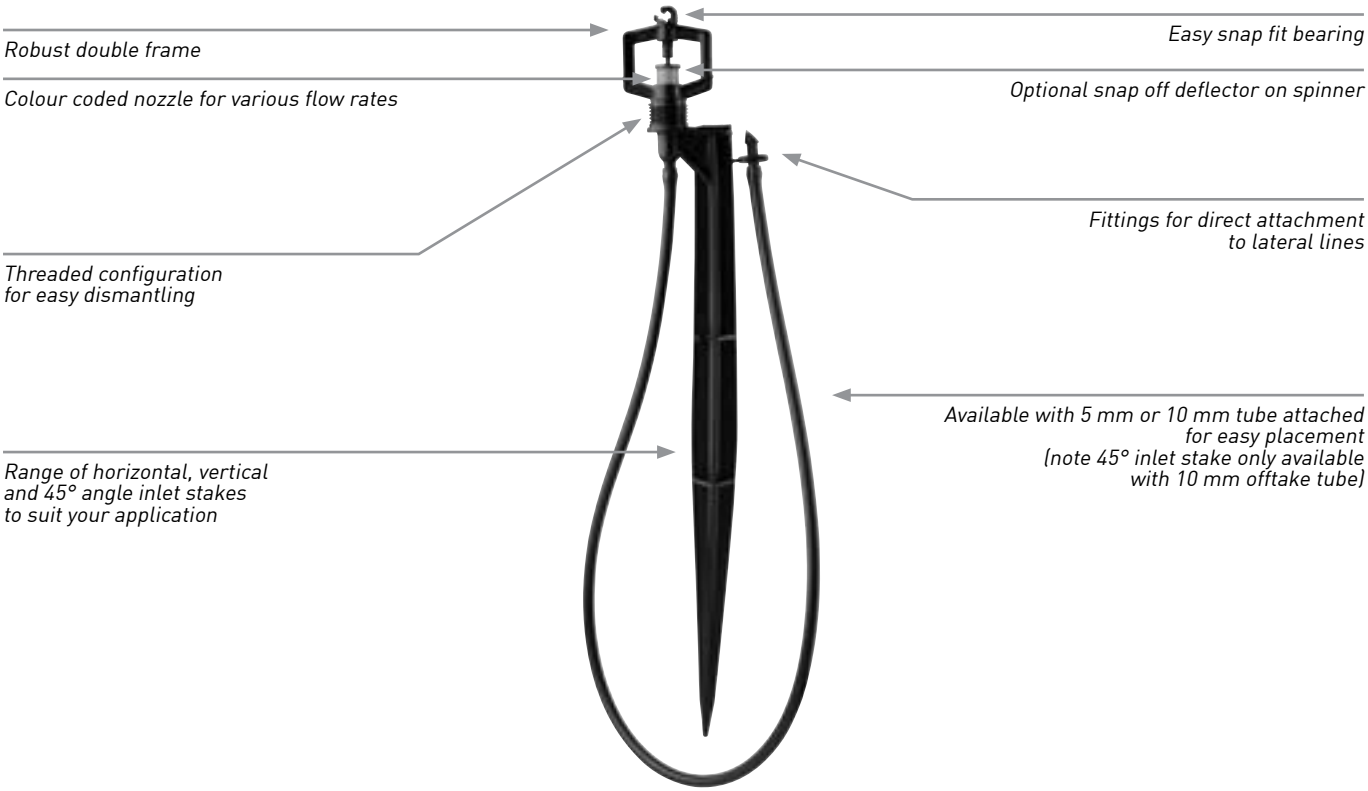
WB7PCXXS	Available with Standard Spinner on Black Stake with Tube and Adaptor
WB7PCXXSR	Available with Standard Spinner on Red Stake with Tube and Adaptor
WB7PCXXDS	Available with Deflector Spinner on Black Stake with Tube and Adaptor
WB7PCXXDSR	Available with Deflector Spinner on Red Stake with Tube and Adaptor

For any of the above configurations, substitute the XX with the desired flow rate (refer to the above codes).
E.g. For Waterbird PC at 47 Lph with standard spinner on black stake, use code WB7PC47S.

N.B. Nozzles 36 to 99 Lph fitted with 5 mm x 0.6 m Tube and Stake, Nozzles 118 Lpm and above fitted with 10 mm x 0.8 m Tube and Stake



Application

Designed specifically to meet the needs of the olive industry. The Waterbird® PC Olive Sprinkler is fully designed, engineered and manufactured in Australia, it's built to operate in the harshest of environments.

Features

- An even throw of water across the spray pattern ensures good, consistent root development
- Aerofoil frame design for improved distribution
- Proven robust frame design for superior strength and long field life
- The advanced spinner mechanism ensures excellent start-up reliability and low maintenance
- The anti-insect spinner design protects the jet and tube when it's not in use
- A two stage spinner provides two diameters of throw. The smaller diameter for younger trees, and the deflector is simply removed for developed trees
- Supplied with a deflector tab on the spinner to reduce diameter of throw to approx. 30%. Can be removed at any time by hand
- The self flushing pressure compensating mechanism provides regulated flow for undulating terrain
- A highly visible UV stabilised red stake provides easy identification and reduces the chance of mechanical damage
- Also available with UV stabilised black stake (optional)

Specifications

- Inlet: 10 mm MBSP/NPT
- Recommended Pressure Range: 150 - 350 kPa
- Materials: Frame, bearing and nozzle: Acetal. Spinner: Nylon

CODE	**DESCRIPTION**
WB7PC36DSR	Waterbird PC, 10 mm Black Nozzle at 36 Lph, 0.3 m radius with Deflector Spinner on Red stake with 5 mm x 0.6 m tube and adaptor
WB7PC47DSR	Waterbird PC, 10 mm Light Blue Nozzle at 47 Lph, 0.5 m radius with Deflector Spinner on Red stake with 5 mm x 0.6 m tube and adaptor
WB7PC57DSR	Waterbird PC, 10 mm White Nozzle at 57 Lph, 0.7 m radius with Deflector Spinneron Red stake with 5 mm x 0.6 m tube and adaptor
WB7PC76DSR	Waterbird PC, 10 mm Maroon Nozzle at 76 Lph, 0.8 m radius with Deflector Spinneron Red stake with 5 mm x 0.6 m tube and adaptor
WB7PC99DSR	Waterbird PC, 10 mm Green Nozzle at 99 Lph, 0.9 m radius with Deflector Spinneron Red stake with 5 mm x 0.6 m tube and adaptor
WB7PC118DSR	Waterbird PC, 10 mm Purple Nozzle at 118 Lph, 1.1 m radius with Deflector Spinneron Red stake with 10 mm x 0.8 m tube and adaptor
WB7PC134DSR	Waterbird PC, 10 mm Blue Nozzle at 134 Lph, 1.4 m radius with Deflector Spinner on Red stake with 10 mm x 0.8 m tube and adaptor
WB7PC151DSR	Waterbird PC, 10 mm Grey Nozzle at 151 Lph, 1.4 m radius with Deflector Spinner on Red stake with 10 mm x 0.8 m tube and adaptor
CODE	**DESCRIPTION**
WB7PCXXDS	Available with Deflector Spinner on Black Stake with tube and adaptor

Substitute the XX with the desired flow rate (refer to the above codes).

E.g. For Waterbird PC at 47 L/h with Deflector Spinner on Black Stake with tube and adaptor, use code WB7PC47DS.

N.B. Nozzles 36 to 99 Lph fitted with 5 mm x 0.6m Tube & Stake, Nozzles 118 Lph and above fitted with 10 mm x 0.8m Tube and Stake.

Application

Developed to allow easy suspension from poly tubing for convenience during harvesting. Waterbird Trellis is specifically designed to meet the needs of nut tree growers to provide improved water application for under tree irrigation.

Features

- Developed to meet the unique needs of nut tree growers
- Trellis hook allows for easy suspension from poly tubing with a cable tie
- Snap lock bearing prevents nozzle dislodging by machinery during harvest and spraying
- Anti-insect/dust proof spinner retracts to protect nozzle when not in operation
- Low angle of throw for maximising under foliage penetration
- Robust aerofoil shaped frame for improved distribution and long field life
- More efficient water application – larger droplets, low angle and less wind effect
- Fully assembled model available with pre-installed 5 mm x 0.6 m tube and 5 mm Adaptor
- Limited Throw Deflector (LTD) models available

Specifications

- Inlet: 10 mm MBSP/NPT
- Recommended Pressure Range: 100 – 200 kPa
- Materials: Frame, bearing and nozzle: Acetal. Spinner: Nylon
- Trellis Hook: suits cable ties to 5 mm width

Application

For use in horticultural, viticultural, greenhouse and landscape applications, Neptune PC provides a highly accurate and durable drip solution.

The pressure compensating mechanism provides uniformity over long runs and changing topographies.

The Non-Drain PC emitter is suited to pulse irrigation and systems installed on sloping terrain, improving irrigation efficiencies by reducing the time taken to pressurise the system.

Features

Pressure Compensating

- Wide cross-section labyrinth creates maximum turbulence to keep debris in suspension
- Self-flushing diaphragm allows debris to pass through the emitter, reducing risk of blockages
- Pressure compensating for even water and nutrient distribution over long runs and changing topographies
- Silicone diaphragm for performance and longevity
- Low entry pressure (50 kPa) for pressure compensating mode
- Low CV provides uniform discharge over a wide pressure range
- UV stabilised LDPE tube for multi season application
- Large tube diameters available creating the ability for long runs

Non-Drain (additional features)

- Suited to pulse irrigation and sloping terrain
- Reduces time to pressurise system at start up
- Reduced water usage and energy costs

Operating Specifications

- Recommended Operating Pressure Range:
  - 15.4 and 19.0 mm I.D.: 100 - 350 kPa
  - 20.8 mm I.D.: 100 - 325 kPa
  - 25 mm I.D.: 100 - 300 kPa
- Emitter Flow: 1.2, 1.5 & 2.4 Lph
- Emitter Spacing: 0.3 - 1.0 m
- Tube I.D.: 15.4, 19.0, 20.8 & 25.0 mm
- Wall Thickness: 0.63, 0.9 & 1.0 mm
- Recommended Filtration:
  - 1.2 Lph: 150 mesh / 100 micron
  - 1.5 & 2.4 Lph: 120 mesh / 130 micron
- Non-Drain (ND) Emitter Opening Pressure:
  - ND Emitters open at 50 kPa (5.0 m)
  - ND Emitters close at 17 kPa (1.7 m)

350	346	426	498	565	658	745	800

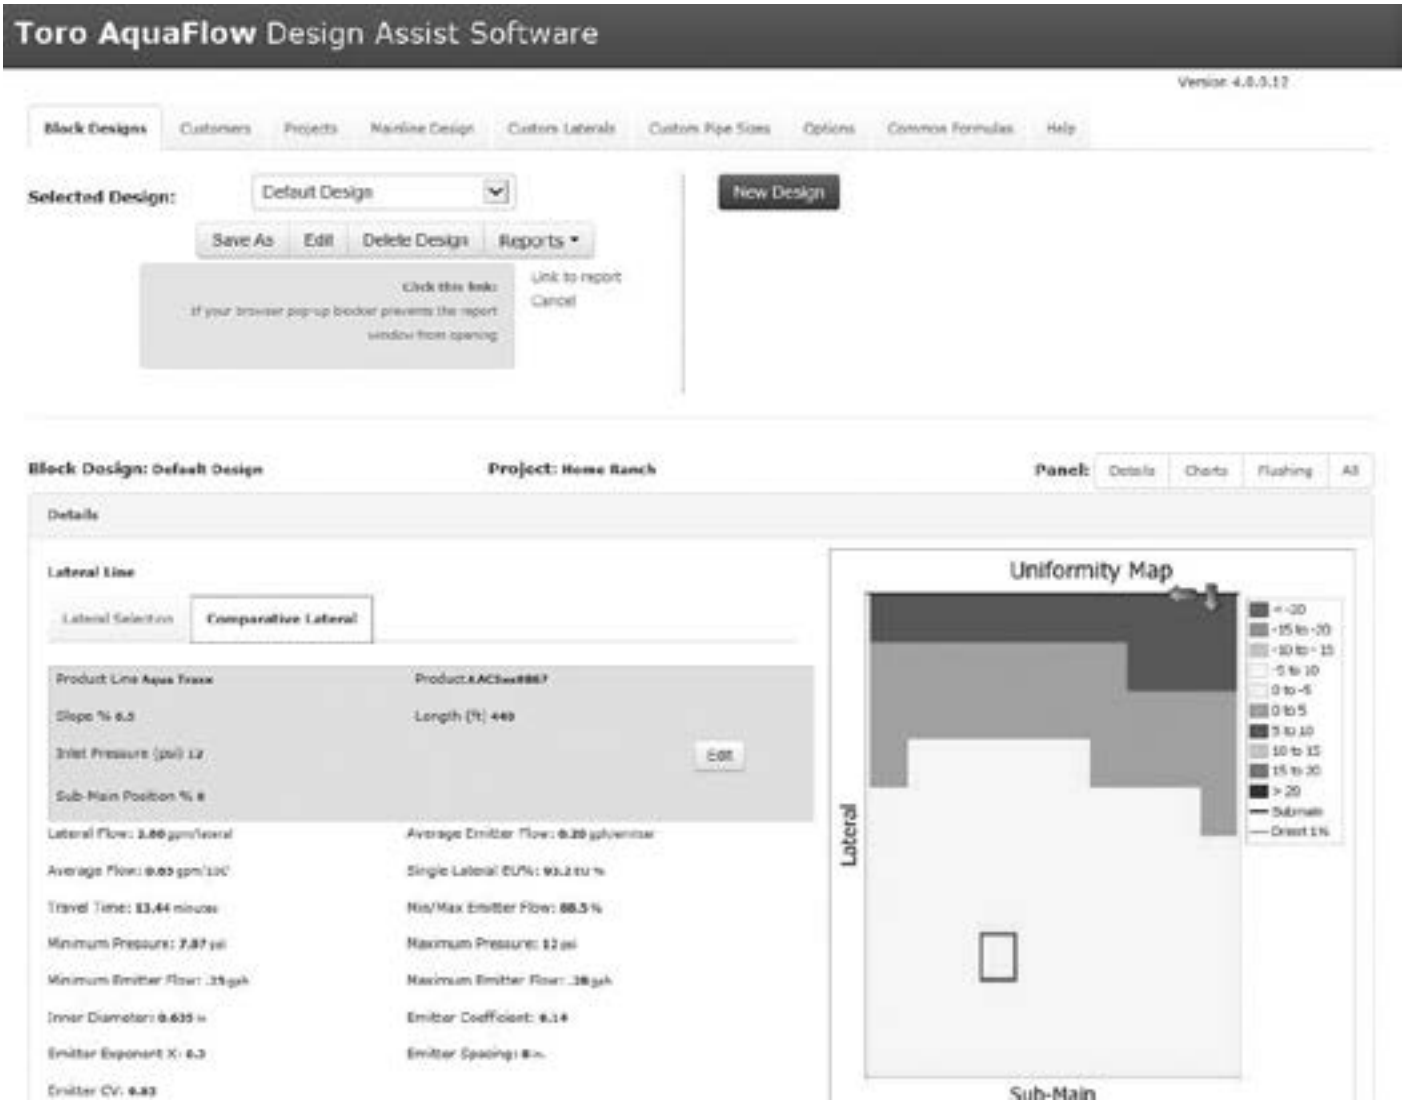
The Performance Data above is based on minimum 100 kPa operating pressure, single lateral and no elevation change.

Application

AquaFlow™ provides irrigation designers, dealers and growers with a state-of-the-art tool to configure drip irrigation systems for optimum performance using Toro Aqua-Traxx® PBX, Neptune™ and DripMaxx™ drip tube.

AquaFlow's capabilities include:

- Dashboard format for easy viewing
- Real-time system design changes
- Compare different designs
- Colour coded uniformity display
- Unlimited slopes
- Multiple pipe types and sizes
- Single or multiple block reports
- Flushing for both laterals and submains



Note: Diagram for illustration purposes only.

To become a registered user of AquaFlow visit https://aquaflow.toro.com or driptips.toro.com

Application

For use in viticultural, horticultural, greenhouse and landscape irrigation applications. The pressure compensating mechanism makes it suitable for use in steep or undulating situations or where longer run lengths need to be achieved.

Features

- Large pre-entry filter area helps to screen water-borne particles
- High clogging resistance
- Proven pressure compensating mechanism for long runs, steep and undulating terrain
- Low entry pressure (50 kPa) into pressure compensating mode
- High uniformity of flow within compensating range.
- Flow rates available 1.2, 1.6, 2.1 and 3.5 Lph
- Large pipe diameters available creating the ability to run the drip tube further
- Diameters made to suit Australian standard fittings

Note: Run lengths are based on a single drip tube, with no elevation change and a minimum operating pressure of 100 kPa at any emitter.

Application

For use in viticultural, horticultural, greenhouse and landscape irrigation applications. The two large diameters make it suitable for use in flat to mildly sloping terrain where longer run lengths need to be achieved.

Features

- Large pre-entry filter area helps to screen water-borne particles
- Turbulent flow path for high clogging resistance
- Five flow rates available
- Large pipe diameters create the ability to run the drip tube further
- Diameters made to suit Australian standard and other fittings

AquaFlow Drip Irrigation Design Software for DripMaxx®

Application

AquaFlow™ provides irrigation designers, dealers and growers with a state-of-the-art tool to configure drip irrigation systems for optimum performance using Toro Aqua-Traxx® PBX, Neptune™ and DripMaxx™ drip tube.

AquaFlow's capabilities include:

- Dashboard format for easy viewing
- Real-time system design changes
- Compare different designs
- Colour coded uniformity display
- Unlimited slopes
- Multiple pipe types and sizes
- Single or multiple block reports
- Flushing for both laterals and submains

Note: Diagram for illustration purposes only.

Drip-In™ Classic Drip Tube

Application

- Vineyards
- Orchards
- Row Crops

One piece in-line drip tube, tough and economical, designed for all permanent or row crop applications.

- High clog resistance due to wide turbulent passage way and raised inlet filter
- Extremely accurate flow rate due to high quality control
- Self-flushing in-built filter for added protection
- Two directly opposed outlet holes to minimise exit hole clogging
- Substantial installation savings as there is no hole punching, lost emitters or handling damage
- Available in factory spaced intervals or custom made to your spacing requirements
- Suitable for recovery and re-use in row crops
- Available in 16 mm nominal diameter

Emitter Flow Equation

$Q = k_p P^x$

Q = Flow in Lph

P = Pressure in metres

x = emitter exponent

k_p = emitter constant

Emitter Barb Pressure Loss Equation

$$H_b = \frac{k_b v^2}{2g}$$

g = gravitation acceleration m/sec²

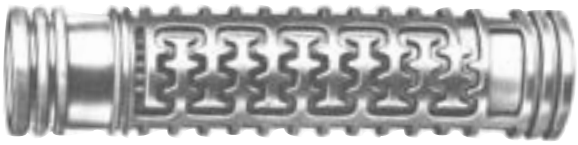
v = velocity (m/sec)

H_b = emitter pressure loss (m)

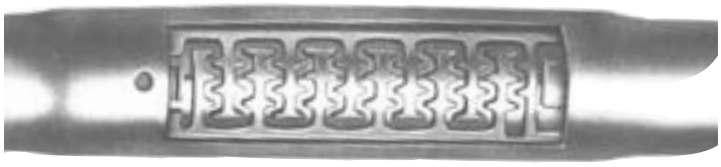
The emitter design creates turbulent flow which ensures maximum blockage resistance. The emitter is fused to the inside of the tube as it is extruded in the manufacturing process and provides substantial savings on installation costs.

Clear Tube shown for demonstration purposes only.

The Drip-In™ Emitter



inserted in the tube . . .



becomes a permanent part of it.

Drip-In™ PC, In-Line, Pressure Compensating Drip Tube

Application

- Vineyards
- Orchards
- Row Crops

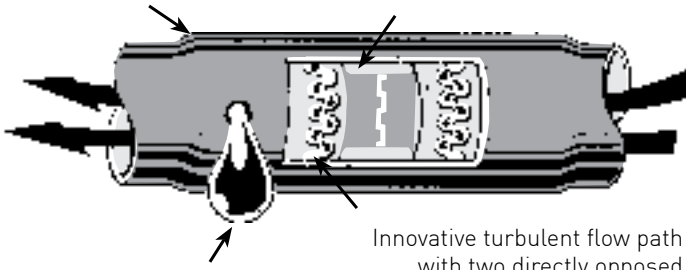
Pressure compensating dripline for irrigation in difficult terrain or where long run lengths are required.

Features

- Featuring an innovative turbulent flow path and chemically inert self-flushing silicon diaphragm
- Available in 1.6, 2.0, 2.4 and 4.0 Lph flow rates
- Wide pressure regulating range from 100 kPa to 400 kPa
- Turbulent flow path ensures there is no flow spike or prolonged flushing mode
- Two outlet holes and large exit chamber reduces risk of exit hole clogging
- Tubing sizes of 16, and 20 mm OD
- Durable, tough wall thickness of at least 1 mm
- Emitter cannot be dislodged or move inside the pipe
- Available in factory spaced intervals or custom made to your spacing requirements

Standard spacings or can be custom made to grower specifications.

Self-cleaning diaphragm chamber increases blockage resistance and facilitates flushing at the end of each watering cycle. Chemical resistant diaphragm for longer life.



Pressure compensating to deliver a regulated rate of water at varying pressures.

Innovative turbulent flow path with two directly opposed outlets to reduce risk of exit hole clogging.

Self-flushing diaphragm flushes in three stages, being start-up, during irrigation if clogging occurs and on shut down. The flushing occurs where there is low pressure on the diaphragm and it is relaxed allowing particles to be passed out through the emitter.

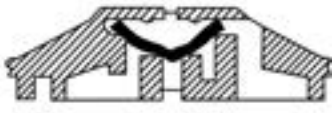
Raised inlet deflects particles

Contents

During the irrigation cycle, the diaphragm is depressed across the compensating chamber.



Flushing Cycle

As the dripper begins to clog there is a reduction of flow, and pressure on both sides of the diaphragm begins to equalise.

The diaphragm returns to its relaxed position and particles are flushed out. The dripper then returns to normal performance

Emitter Flow Equation

$Q = k_p P^x$

Q = Flow in Lph

P = Pressure in metres

x = emitter exponent

k_p = emitter constant

Emitter Barb Pressure Loss Equation

$$H_b = \frac{k_b v^2}{2g}$$

g = gravitation acceleration m/sec²

v = velocity (m/sec)

H_b = emitter pressure loss (m)

Application

Drip Eze™, Quick Drip™ and Enviro-Drip™ extruded in-line drip tube is a precise, low flow irrigation product suited to a wide range of landscape applications, such as high density planting areas and intricately shaped beds.

Drip Eze and Enviro-Drip apply water to the plants at a slow consistent rate, reducing the risk of run-off and water wastage. Particularly suited to areas like median strip garden beds where overspray cannot be tolerated. Enviro-Drip is for use with non-potable treated water.

Quick Drip's higher flow allows users to apply water within shorter watering windows - ideally suited to sandy environments.

Features

- Tube manufactured from low density polyethylene
- Continuous wetted strip (in closer spacings)
- Pressure compensating emitter available in 13mm 2 Lph only
- Discreet brown tubing blends into the landscape (Drip Eze) or purple tube to signify non-potable (Enviro-Drip)
- Easy to install, fits difficult corners, rockeries, etc.
- Two directly opposed outlet holes to prevent exit holes clogging
- Uses Australian Standard poly fittings
- Designed to be installed above ground
- Raised inlet to emitter reduces the risk of emitter blockage

Drip Eze™
Take-Off Adaptor (DT0813)

- 8mm x 13mm take-off adaptor
- Can be used with 19 mm, 25 mm or 32 mm poly sub-mains
- Ergonomic grip plate for easy insertion
- Product code is etched into the mould
- True 5mm hole punch to insert

Drip Eze™
4mm Non-compensating

- Tube inside diameter: 4 mm
- Tube outside diameter: 6 mm
- Emitter discharge: 2 Lph @ 100 kPa
- Emitter spacing: 15, 30 cm
- Recommended operating pressure: 100 kPa
- Tube pressure rating; 300 kPa
- Roll lengths (15 cm spacing): 914 m
- Roll lengths (30 cm spacing): 25, 50, 100, 200 m
- Colour: Brown

Drip Eze™
13mm Non-compensating

- Tube inside diameter: 12.9 mm
- Tube outside diameter: 15.4 mm
- Emitter discharge: 2 Lph @ 100 kPa
- Emitter spacing: 30, 40, 50, 60, 100 cm
- Recommended operating pressure: 100 kPa
- Tube pressure rating; 300 kPa
- Roll lengths (40,50,60, 100 cm spacing): 200 m
- Roll lengths (30 cm spacing): 20, 50, 100, 200 m
- Colour: Brown

Quick Drip™
13mm Non-compensating

- Tube inside diameter: 12.9 mm
- Tube outside diameter: 15.4 mm
- Emitter discharge: 8 Lph @ 200 kPa
- Emitter spacing: 30 cm
- Recommended operating pressure: 100 kPa
- Tube pressure rating; 200 kPa
- Roll lengths : 50 and 100 m
- Colour: Brown

Enviro Drip™
13mm Non-compensating - Lilac

- Tube inside diameter: 12.9 mm
- Tube outside diameter: 15.4 mm
- Emitter discharge: 8 Lph @ 200 kPa
- Emitter spacing: 30 cm
- Recommended operating pressure: 100 kPa
- Tube pressure rating; 300 kPa
- Roll lengths : 50 and 100 m
- Colour: Lilac

Drip Eze™
13mm Pressure Compensating

- Tube inside diameter: 12.9 mm
- Tube outside diameter: 15.4 mm
- Emitter discharge: 1.6 and 2 Lph
- Emitter spacing (1.6 Lph): 40 cm
- Emitter spacing (2 Lph): 30, 40, 50, 60, 100 cm
- Recommended operating pressure: 100-300 kPa
- Tube pressure rating; 300 kPa
- Roll lengths (1.6 Lph, 40 cm spacing): 50, 100, 200 m
- Colour: Brown

Enviro-Drip™
13mm Pressure Compensating - Lilac

- For use with non-potable, treated water
- Tube inside diameter: 12.9 mm
- Tube outside diameter: 15.4 mm
- Emitter discharge: 1.6 and 2 Lph
- Emitter spacing (1.6 Lph): 30 cm
- Emitter spacing (2 Lph): 30, 50 cm
- Recommended operating pressure: 100-300 kPa
- Tube pressure rating; 300 kPa
- Roll lengths (1.6 Lph): 200 m
- Roll lengths (2 Lph): 50, 100, 200 m
- Colour: Lilac
- Marked clearly "Caution Not for Drinking"

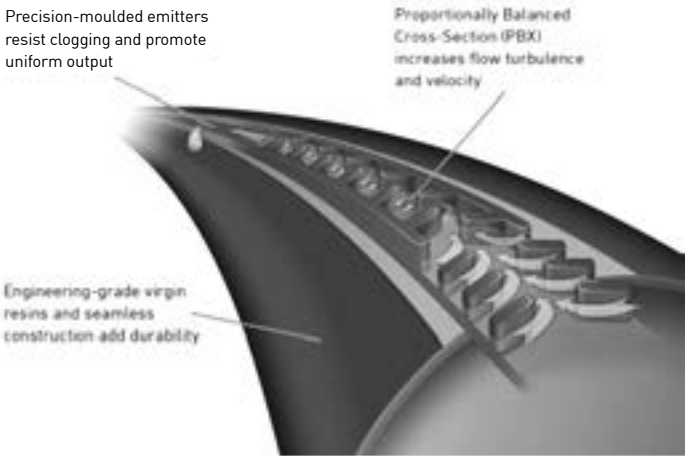
*Note: All pressure compensating tube run lengths are based on a minimum operating pressure of 100 kPa, single laterals and flat ground. ** All non-compensating tube run lenghts are based on a variation in discharge of +/-10% of the nominal dripper flow rate, single laterals and flat ground.*

Application

Used extensively for short term row crops such as vegetables, legumes, sugar cane, cotton, tomatoes and strawberries.

Features

- Proportionally Balance Cross-Section (PBX) increases flow turbulence and velocity
- Seamless construction means no more split seams or unglued strips
- Highly resistant to plugging due to the large number of inlet filters per outlet
- Easily identifiable double blue stripe to aid in correct installation
- Every coil laser printed with code and manufacture date for easy batch identification
- The precision laser incised outlet slit impedes root intrusion, providing superior accuracy and consistency to "knife-cut" tapes
- Enhanced turbulent flow path and precise moulding and manufacturing process provides excellent CV
- Available in 5, 6, 8, 10, 12 and 15 mil thicknesses
- Available in three nominal bores – 16, 22 and 28 mm
- Emitter spacing options for all soils
- Widest selection of flow rates
- Accurate delivery of water and fertiliser



For best system results, always demand genuine Toro Pro-Loc™ Fittings

How to determine Length of Run

1. Find the Q-1 (lph/1 meter) that corresponds to the desired Emitter Flow Part Number.

2. Go to desired Tubing Diameter chart and match the Q-1 (identified above) with desired slope % (uphill = negative, downhill = positive) to find a length of run in metres.

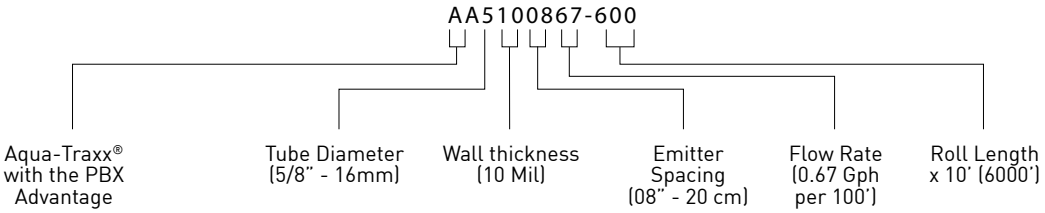
Product Code Definition



Key: Part number AA51000867-600

AA = Aqua-Traxx® with the PBX Advantage
5 = Tube Diameter (5/8")
10 = Wall thickness (10 mil)
08 = Emitter spacing (08" or 20 cm)
67 = Flow per 100' of Tape (.67 Gph per 100')
600 = Roll length (x 10')

*denotes:
- X-5 for 5/8", 7 for 7/8" and 9 for 1-1/8"
- XX-for mil (1/1000th of an inch) thickness

Metric outlet spacing expressed in nominal length
Gph and gpm represent US gallons
Coefficient of Variation (CV) less than 3%
†Maximum pressure within laterals while operating or flushing

Emitter Flow Classification @ 55 kPa	
Low	0.26 - 0.57 Lph
Med	0.76 - 1.01 Lph

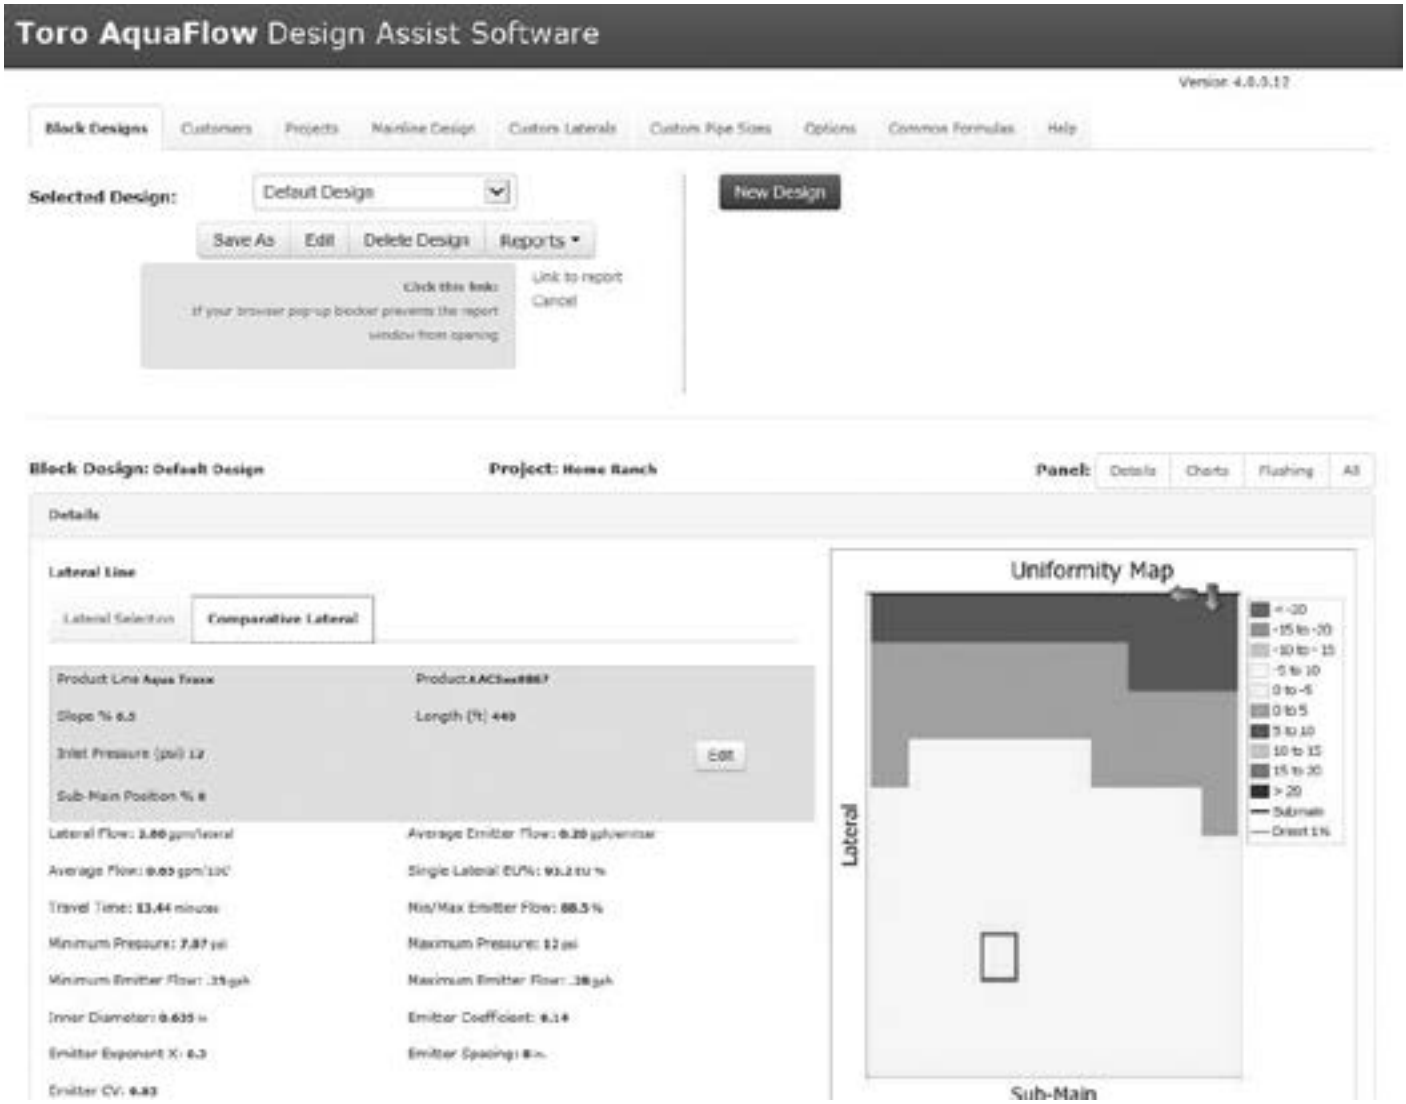
AquaFlow Drip Irrigation Design Software for Aqua-Traxx® Premium Drip Tape

Application

AquaFlow™ provides irrigation designers, dealers and growers with a state-of-the-art tool to configure drip irrigation systems for optimum performance using Toro Aqua-Traxx® PBX, Neptune™ and DripMaxx™ drip tube.

AquaFlow's capabilities include:

- Dashboard format for easy viewing
- Real-time system design changes
- Compare different designs
- Colour coded uniformity display
- Unlimited slopes
- Multiple pipe types and sizes
- Single or multiple block reports
- Flushing for both laterals and submains



Note: Diagram for illustration purposes only.

To become a registered user of AquaFlow visit https://aquaflow.toro.com or driptips.toro.com

Application

The next level of uniformity, efficiency and yield

The new Aqua-Traxx FlowControl premium drip tape is the latest advancement in precision drip irrigation. It's the only flow-regulating drip tape available – giving you more control and uniformity wherever you farm. The innovative emitter design provides flexibility to increase or decrease flow while maintaining a uniform output across changing elevations. Now you have more control over how much water your crops get, especially in long runs or hilly terrain, where water pressure can vary throughout the run.

Features

- Designed and moulded with the PBX Advantage for increased durability, clog resistance and uniform output.
- Flexibility to increase and decrease flow without sacrificing uniformity.
- Available in three diameters and four wall thickness, including 5/8" (16 mm) and 7/8" (22 mm) 8 mil.
- Emitter spacing from 15-60 cm with no cost increase, for precise placement and flexibility when designing your system.
- All flow rates require just 150-mesh filtration

Advantages of FlowControl

Vs Standard Drip Tape

- High uniformity on longer runs and hilly terrain.
- Improved system performance as a result of better irrigation uniformity.
- Increased planting and harvesting efficiency from longer lengths of run.
- Eliminate extra manifolds and labor-intensive jumpers (micro-tubing used to regulate pressure).

Vs Pressure-Compensating Tape

- Retain flexibility to increase or decrease application rate for greater control over watering and scheduling decisions.
- Available in wider range of thicknesses to meet the needs of all crops, including more affordable 5/8" (16 mm) 6-mil and 7/8" (22 mm) 8-mil.
- One price for any emitter spacing from 15 to 60 cm giving you the wetting pattern you want without paying a premium.
- Designed with patented PBX technology for increased durability, clog resistance and uniform output.

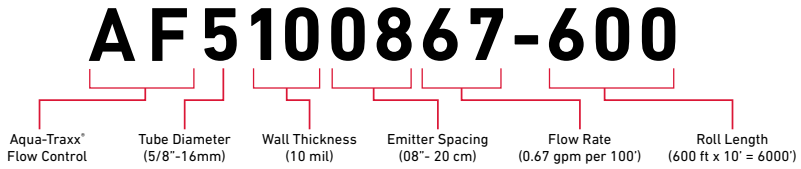
FLOWCONTROL CODE BUILDER



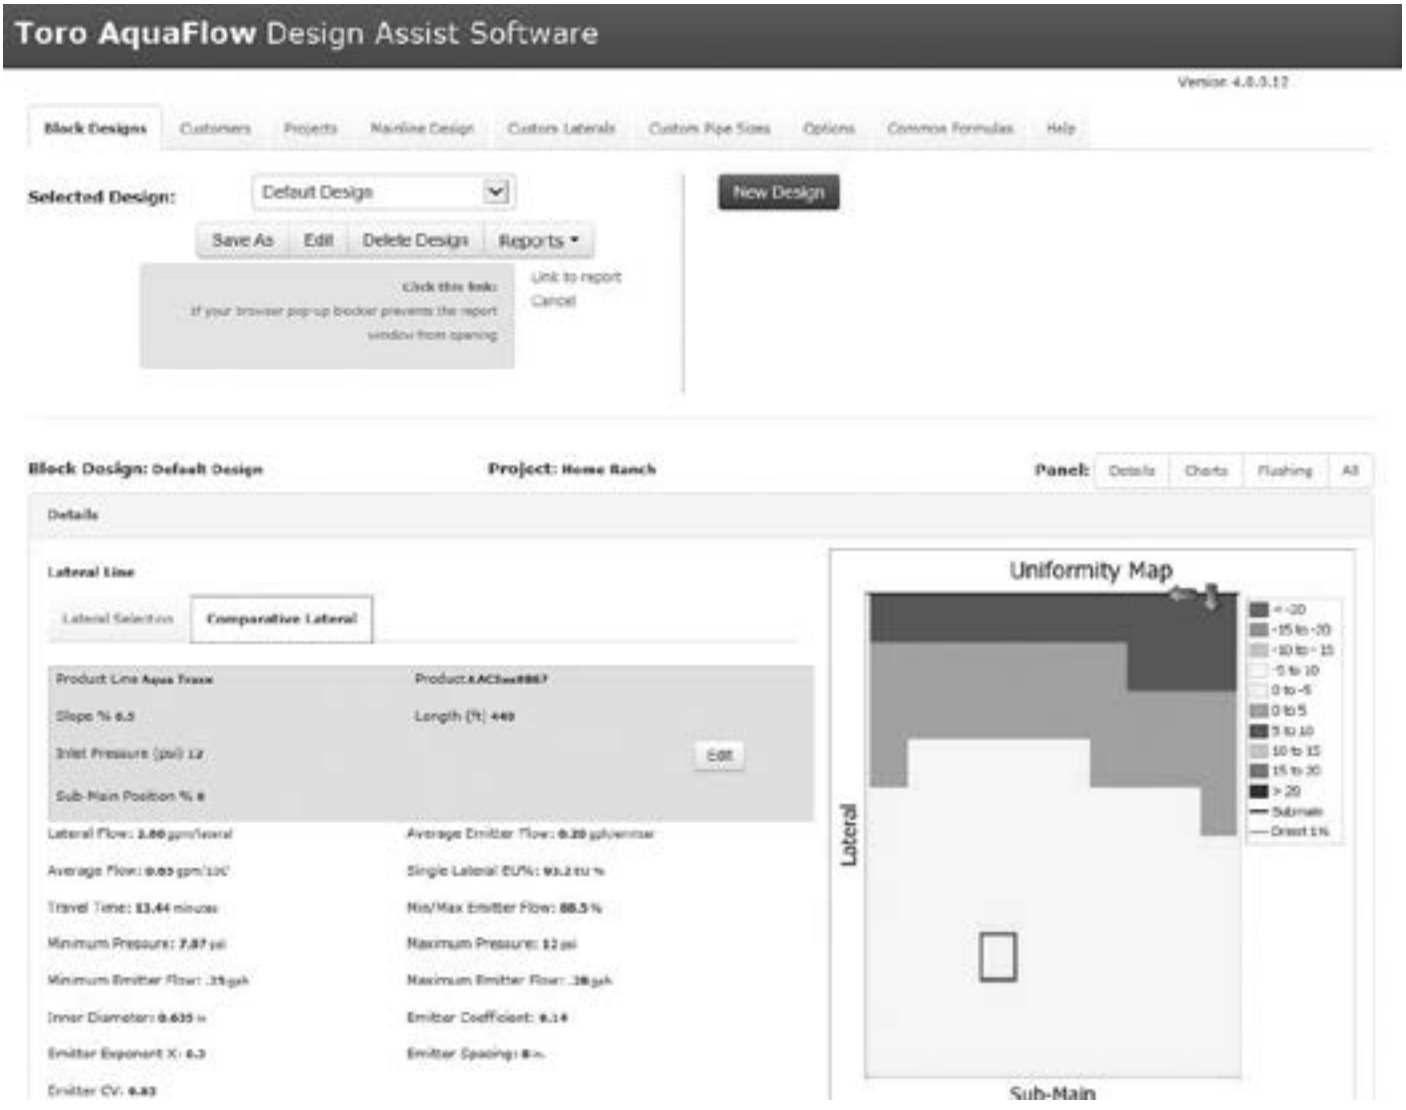
AquaFlow Drip Irrigation Design Software for Aqua-Traxx® Flow Control (FC) Premium Drip Tape

Application

AquaFlow™ provides irrigation designers, dealers and growers with a state-of-the-art tool to configure drip irrigation systems for optimum performance using Toro Aqua-Traxx® PBX, Neptune™ and DripMaxx™ drip tube.

AquaFlow's capabilities include:

- Dashboard format for easy viewing
- Real-time system design changes
- Compare different designs
- Colour coded uniformity display
- Unlimited slopes
- Multiple pipe types and sizes
- Single or multiple block reports
- Flushing for both laterals and submains



Note: Diagram for illustration purposes only.

To become a registered user of AquaFlow visit https://aquaflow.toro.com or driptips.toro.com

Application

For use as an economical submain for low pressure micro irrigation systems.
Blue Stripe® Oval polyethylene tubing is a lay-flat form of tubing manufactured from the highest grade of resins.

Features

- Supplied in lay-flat form to reduce freight volumes, storage and for ease of installation
- Large diameters offer cost effective alternative to rigid PVC, high density polyethylene or lay-flat hose
- Blue stripe for ease of identification
- Manufactured from superior linear low density resins
- Impregnated with 2% carbon black for maximum UV resistance
- Maximum operating pressure: 140 kPa
- When Oval Hose is in place and pressurised it becomes round, Oval hose rolls out faster and easier, reducing your installation time, thereby reducing your cost

Dura-Pol™ tubing is a layflat form of tubing and is used in portable drip irrigation systems where the tube needs to be re-located or re-used.

Ordering Information	
ELD5251-045	50 mm x 135 m Dura-Pol™ Heavy Tubing
ELD7776-020	80 mm x 60 m Dura-Pol™ Heavy Tubing

Application

- Vineyards
- Orchards
- Nurseries

A proven turbulent flow drip emitter, widely used in vineyards, orchards and also for row crops.

Features

- Available in 2.0, 4.0 and 8.0 Lph flow rates
- Recommended operating pressure range 80-120 kPa
- Take apart feature permits cleaning and inspection
- Large turbulent flow path provides resistance to plugging
- Barbed inlet can be installed directly onto poly tube or used with 4 mm tubing
- Base lugs to provide stability on tubing
- Blanking cap available to stop dripper emitting water
- 4 mm angled barbed inlet to reduce the risk of particle entry on start up
- Colour coded internal discs for easy identification
- Construction:
  - Cap - glass filled polypropylene
  - Insert - Santoprene™
  - Base - ABS

Disc Colour	Flow
White	2 Lph
Black	4 Lph
Green	8 Lph

The first Australian made turbulent flow drip emitter, still widely used throughout the irrigation industry in Australia.

Ordering Information

Code	Description
1014002	2 Lph Turbo-Key Dripper
1014004	4 Lph Turbo-Key Dripper
1014008	8 Lph Turbo-Key Dripper

Performance Data

Code	Nominal Flow (Lph)	Flow (Lph) vs Pressure (kPa)			Flow Path dimensions Min. (mm)
		80 kPa	100 kPa	120 kPa	
1014002	2	1.85	2.08	2.29	0.80 x 0.61

1014008	8	7.2	8.0	8.7	1.45 x 1.55

Application

- Vineyards
- Orchards

Pressure compensating emitter with a chemically inert silicon diaphragm to cater for undulating terrain or long lateral runs with maximum blockage resistance.

Features

- Available in 2.0, 4.0 and 8.0 Lph flow rates
- Recommended operating pressure range 100-300 kPa
- Turbulent flow path for blockage resistance and uniform water distribution
- High quality chemical resistant diaphragm
- Removable cap and diaphragm for system inspection
- 4 mm barbed inlet to reduce the risk of particle entry on start up
- Diaphragm seats on base to prevent backflow into the emitter
- Outlet baffle to deter entry of insects
- Cap stamped with nominal flow rate for easy identification
- 4mm tubing can be connected to the outlet for precise drip placement
- Construction:
  - Cap - glass filled polypropylene
  - Diaphragm - silicone
  - Base - ABS

Australian made pressure compensating emitter that reacts to changes in pressure to ensure an even flow.

Ordering Information

Code	Description
1014052	2 Lph Turbo-Plus II (Pressure Compensating)
1014054	4 Lph Turbo-Plus II (Pressure Compensating)
1014058	8 Lph Turbo-Plus II (Pressure Compensating)

Performance Data

Code	Nominal Flow (Lph)	Flow (Lph) vs Pressure (kPa)					Turbulent Flow Path Dimensions Min. (mm)
		100 kPa	150 kPa	200 kPa	250 kPa	300 kPa	
1014052	2	1.97	2.04	2.05	2.02	1.95	0.6 x 0.6
1014054	4	3.96	3.88	3.99	4.09	4.15	0.6 x 0.7
1014058	8	7.59	7.83	7.92	8.09	8.12	1.2 x 0.7

Application

Precise Pressure Compensating emitter engineered for use in greenhouses, nurseries and landscape applications for applying water and nutrients directly to individual plants. Continuously Self-Flushing diaphragm prevents debris build-up. Available in Anti-Leak configurations, the NGE AL ensures uniform flow over long runs, eliminates drainage caused by varying elevations and ensures even growth across your crops.

Features

- Available in 2 Lph and 4 Lph flow rates
- Low CV for uniform discharge over wide pressure range
- Semi-circle inlet filter and wide turbulent flow path allows smaller particles to exit the flow path during the self-flushing cycle
- Available in Anti-Leak configurations for uniform flow over long runs
- Redesigned drip emitter base features a unique flange with ribs to prevent the barb from damaging or penetrating too far into the poly tube
- All components are manufactured with UV and acid resistant high-grade materials for long field life
- Available in 3 mm barb, 4 mm barb and Male adaptor
- Colour coded for easy identification

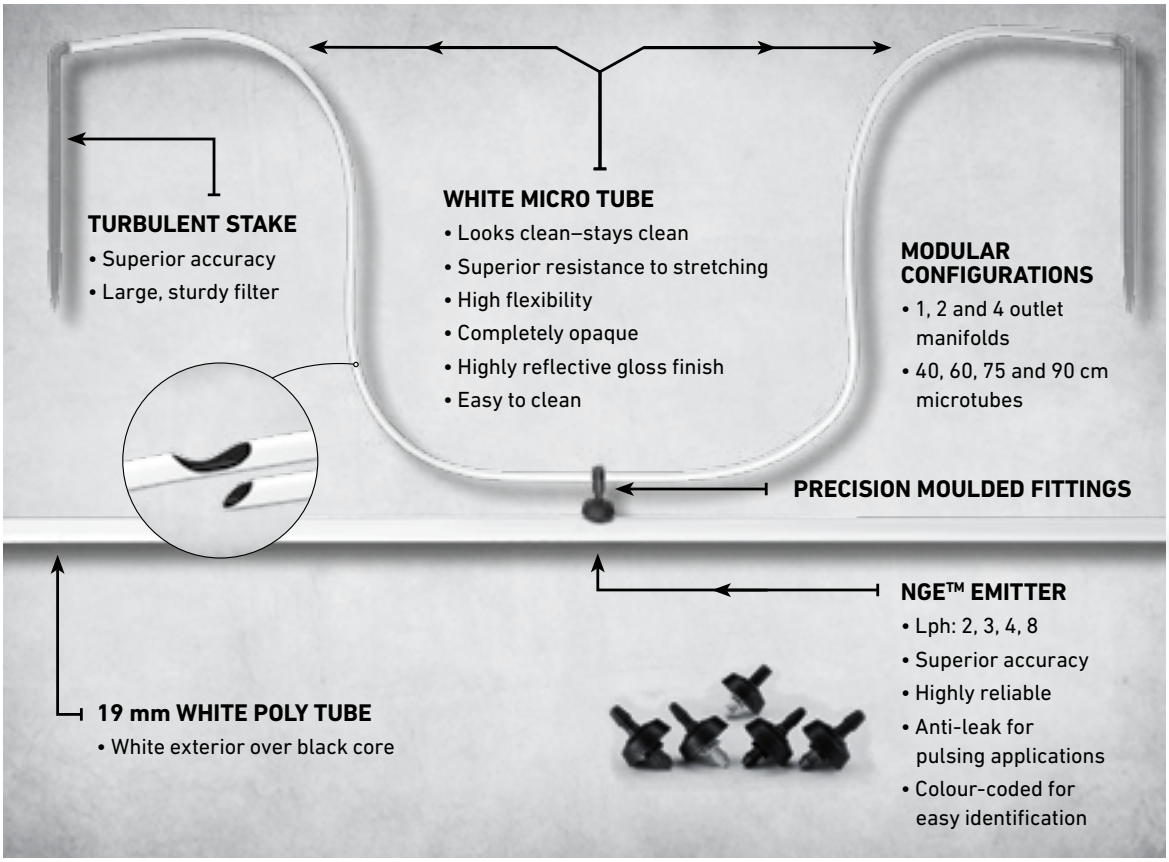
Application

Quality Drip Irrigation for High Value Crops.

White Spider assemblies used with NGE anti-leak pressure compensating (AL PC) emitters are ideal for pot and hydroponic watering in greenhouses and nurseries. By applying water directly to the root system, foliage remains dry, decreasing the risk of disease and water washing off chemicals applied to the foliage.



Manufactured from quality resins, the bright white tubing is highly reflective, durable, flexible and easy to clean. The precision moulded NGE emitters and fittings provide accuracy and durability over multiple crop cycles.

19 mm Pre-Punched White Poly Tube

Developed for use with Toro NGE emitters and White Spider assemblies to provide a complete drip system solution.

- Brilliant white
- Premium quality
- High visibility
- Highly temperature reflective
- Completely opaque

Bright white layer over an opaque black core

Pre-punched for ease-of-use

White Pre-Punched Poly

ORDERING INFORMATION	
Model	**Description**
WPP19XXX-300	19 mm White Pre-Punched Poly Tube (300 m roll)

XXX – specify the hole spacing in metres.

Example: 0.60 m spacing would be specified as WPP19060-300.

- Standard coil length: 300 m
- Minimum run: 7200 (24 coils)
- Coils per pallet: 24 coils
- Group spacings available from .10 m intervals
- Ability to laser etch with dealer details

Custom coil lengths and group spacings are available on request subject to availability and minimum order quantities. Please refer to customer service for details.

Every component designed for durability and ease-of-use

E-2® Micro Drip Emitter

Application

Classic drip emitter for short runs and non-sloping agricultural, nursery and landscape applications. Its pull-apart feature and large open flow path, allows for easy field inspection, maintenance and greater resistance to plugging.

Features

- Non-pressure compensating hydraulic design
- Available in one flow rate: 4.0 Lph
- Fast, single-barb installation fits directly into low density poly tube
- Outlet barb accepts 4 mm low density poly tube for precise drip placement
- Large open flow path for resistance to plugging
- Take apart feature for fast, simple field inspection

E-2® Emitter DBK04	
Pressure vs Flow Rate	
Pressure kPa	**Flow Rate Lph**
50	2.73
100	4.15
150	5.31
200	6.31
250	7.22
300	8.07
350	8.85

4 mm Flexible Irrigation Tube

Application

Ideal for use in commercial and domestic applications, providing versatility when connecting micro drippers and sprays in an irrigation system. The highly flexible tube allows you to run drippers and sprays to garden beds potted plants and hanging baskets.

Features

- Highly flexible for easy installation with micro drippers and sprays
- Manufactured from PVC for maximum grip on 4 mm barbed fittings
- Ideal for irrigation garden beds, potted plants and hanging baskets
- Available in 6 coil lengths: 5, 10, 25, 50 ,100 and 250 m
- Manufactured from high quality resin for a superior seal
- UV stabilised for durability and long field life

Tip: Use with Toro 4 mm Barbed Drip Emitters.

Agri Drip™ Emitters

A turbulent flow path drip emitter, sealed to maintain pre-set discharge rates and uniformity. Pressure Compensating emitters suit installations where elevations and slopes normally create the need for complex system designs.

Application

Suitable for most horticultural tree and row crops, viticulture, and landscaped gardens.

Features

- Standard drip emitter range – 2 Lph, 4 Lph, 8 Lph
- Pressure Compensating drip emitter range – 2 Lph, 4 Lph, 8 Lph
- Positive barb connection – 4 mm Inlet
- Outlet: Push fit 4 mm
- Constructed from UV stabilised material
  Base: Polypropylene
  Cap: Polypropylene
  Diaphragm: Silicon rubber

Midi Drip™ Emitters

Economical and precise watering of individual plants and trees with stable positioning of emitters in tubing or with spike.

Application

Suitable for shrubs and flowers, fruit trees, vines and tomatoes in a wide range of situations from home gardens to large scale nurseries.

Features

- Take apart for servicing
- Barb model for direct insertion into tubing
- Spike model to extend Midi Drip emitter from the main supply line
- Inlet: 4 mm barb
- Constructed from UV stabilised polypropylene

Midi Drip™ Spike 4 mm Barb
Code: 10130195

Midi Drip™ 4 mm Barb
Code: 10130145

Application

A pressure compensating spike dripper with turbulent flow path, sealed to maintain pre-set discharge rates and uniformity.

Suited to use in nurseries, shade houses and residential landscape irrigation systems.

Features

- Registered design
- Pressure compensated flow rate, with turbulent flow path, self-flushing action and insect baffle to minimise blockages
- Three colour coded flow rates available: 2 Lph, 4 Lph and 8 Lph.
- Inlet barb has built-in filter
- Outlet suitable for attaching 4 mm micro tube.
- UV stabilised materials for long life.

NEW

Application

The PotStream™ is a side mounted watering solution for pot plants and containers. The adjustable gentle stream pattern minimises soil erosion and the variable flow rate and pattern radius allows for use in various pot sizes.

Suits pot plants, planter boxes and containers.

Features

- Variable flow rate and pattern size suits 150 mm to 600 mm diameter pots
- Suits pot wall thickness up to 40 mm
- Side mounted installation for clean and tidy location of supply tube
- Low application rate and gentle stream pattern
- Easily adjustable knob for varying spray patterns

PotStream™ Adjustable Flow

Constructed of UV resistant polypropylene, Irritrol's irrigation fittings provide a range of solutions for joining system components such as pumps, risers, sprinklers, valves and filters.

Precision manufacturing combined with tapered threads and heavy wall sections provides maximum sealing performance for reliability you can trust. The robust octagonal nut section allows for quick and easy installation, providing a tight seal across all connections.

Application

Irritrol's irrigation fittings are designed to make a variety of threaded connections, both below and above the ground.

Features

- Made from high grade polypropylene with carbon black for UV protection
- Precision manufacturing and heavy wall sections provides positive seal
- Robust octagonal nut section for easy tightening by hand or spanner
- Full form threads cut to a standard taper of 2º ensures positive seal at high pressure
- Fittings are non-hydroscopic making them moisture resistant
- Highly resistant to a broad range of chemicals and fertilisers
- Maximum pressure rating of 1500 kPa

Impact Sprinkler Threaded Socket

The Irritrol Impact Sprinkler Threaded Socket is engineered to provide a precision BSP tapered thread for a strong and reliable seal between the riser and sprinkler.

Manufactured with UV stabilised high grade polypropylene for UV protection.

The interrupted landing joint prevents the sprinkler bearing from making contact with the riser. This fitting is specially designed with a shorter inlet and longer outlet thread to suit the riser and impact sprinkler threads.

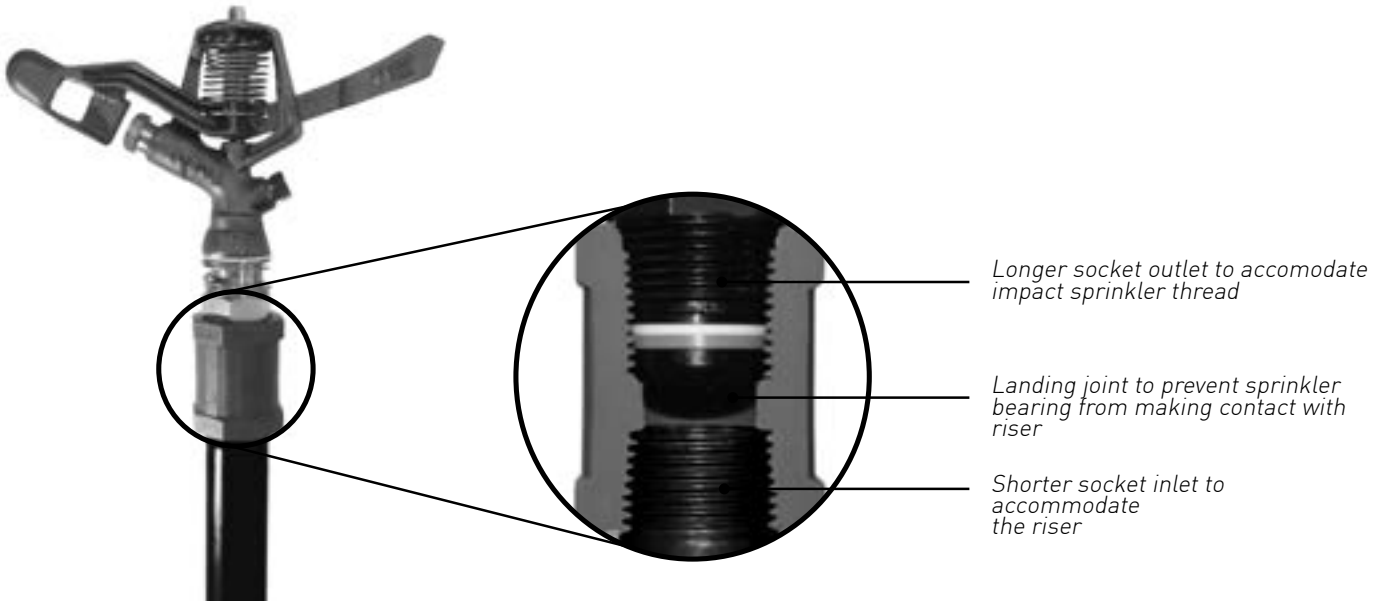
Ordering Information	
Code	**Description**
101IS15	Female Impact Threaded Socket 15 mm BSPF
101IS20	Female Impact Threaded Socket 20 mm BSPF

Application

Designed specifically to meet the needs of growers using impact sprinklers.

Features

- Specifically designed for impact sprinklers
- Made from green high grade polypropylene for UV protection and easy identification
- Precision manufacturing and heavy wall sections provides positive seal
- Tapered thread to maximise seal at high pressure
- Robust octagonal nut section for easy tightening by hand or spanner
- Fittings are non-hydroscopic making them moisture resistant
- Highly resistant to a broad range of chemicals and fertilisers
- Available in 15 mm and 20 mm



Application

Suitable for use in joining uPVC Pipe made to the Australian Standard AS 1477.

Features

- A wide range of uPVC fittings imported from the US
- The majority are schedule 40 fittings with the exception of some specialty fittings in schedule 80 and class 10
- Schedule 40 fittings are white and not suitable for direct sunlight situations
- Schedule 80 fittings are grey and are UV stabilised
- Range of sizes from 15 mm up to 250 mm
- BSP and limited range of NPT threads

Ordering Information
See Toro Australia Irrigation Price List

Application

A non-metal check valve for use in systems where the prevention of flow reversal is necessary.

Features

- Engineered to maximize flow, responsiveness and for positive shut-off
- Compact, space saving design
- Body constructed from PVC
- High grade EPDM seat
- No metal parts
- Excellent for Pool and Spa and general purpose irrigation use
- Suitable for horizontal and vertical up flow installations
- Angled seat and weighted flapper for low-pressure seal
- Slip x Slip socket connections

Installation

Swing check valves are designed for horizontal installations, but may be installed in the up-flow only vertical position.

Check valves MUST be installed with valve's FLOW direction arrow pointing in the direction of the flow. Do not install the valve in the vertical down flow direction.

Flow velocity should not exceed 1.5 metres per second.

Not for use with Compressed Air or Gas.

Specifications

- Maximum opening pressure less than 4 kPa
- Maximum pressure at 23°C
  Full flow (open) – 1034 kPa
  Back pressure (closed) – 517 kPa

S1520-40-A	100 mm PVC Swing Check Valve Slip x Slip

Application

Two, three and four port manifolds for use in residential automatic 25 mm control systems.

Features

- Body – all PVC construction
- Pressure Rating: 1034 kPa at 23°C
- O-ring sealed swivel connections – require no thread sealant and allows hand tight assembly for positive seal
- 25 mm male and female BSP threads

Benefits

- Easy to install – no cutting, no glueing, no thread tape – saves time
- Makes the valve assembly neat
- Additional valves can be added conveniently
- Valves can be removed without cutting the valve manifold which speeds up the process of replacing faulty or damaged valves
- No glueing means the valve manifold can be pressurised immediately
- Swivel connectors mean the valve manifold takes up less room

Double Barb Fittings

The DB range can be confidently installed without clamps when matched to quality low pressure poly tubing with corresponding dimensions (refer to the tubing manufacturer for confirmation of suitability or test under field conditions). Operating pressures should not exceed 300 kPa.

Features

- Double barb for increased retention
- Sharp-edged barbs create leak-proof seal
- Increased strength and superior quality
- Heat, chemical and wear resistant
- UV stabilised materials for long life

Size options

- 13 mm – Suits nominal 13 mm I.D. tube
- 14 mm – Suits nominal 14 mm I.D. and 16 mm O.D. tube
- 15 mm – Suits nominal 15 mm I.D. and 17 mm O.D. tube
- 16 mm – Suits nominal 16 mm I.D. and 18 mm O.D. tube
- 18 mm – Suits nominal 18 mm I.D. and 20 mm O.D. tube
- 19 mm – Suits nominal 19 mm I.D tube
- 21 mm – Suits nominal 21 mm I.D. and 23 mm O.D. tube
- 25 mm – Suits nominal 25 mm I.D. and 27 mm O.D. tube

Antelco Take-Off fittings provide an easy to install method of connecting low pressure irrigation tubing and drip lines to LDPE supply lines.

Application

Sub surface and above ground drip irrigation systems and landscape watering applications.

Features

- Reduce time and installation costs
- 8 mm x 13 mm Elbow suitable for installation from 19 mm LDPE tube
- 10 mm inlet fittings suitable for installation from 25 mm LDPE tube
- Take-Off Elbows are ideal for installing drip lines at any angle to the supply line ensuring parallel lateral lines in sub surface or above ground drip systems

Antelco Take-Off Fittings are an improved method of connecting low pressure irrigation tubes and driplines to polyethylene tubes and PVC mainlines.

Xpando® Take-Off Adaptor

Capo® Rubber Grommet

Application

Agricultural, horticultural, vineyard and landscape applications.

Features

- Easy to install, reducing both time and cost of installation
- Innovative Xpando® (Registered Design) Take-Off Adaptor with collapsible barb prevents pull-out and reduces grommet damage during the installation process
- Capo® Top Hat Grommet with internal step combines with Xpando® interference barb to hold off-take firmly in place
- UV stabilised materials for long life
- Pressure rating: 300 kPa

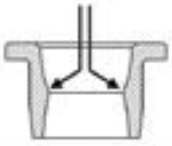
Interference barbs endure seal



On-off device to control the water flow in low pressure irrigation systems.

Application

Secondary zone water diversion and flow control. Always install as an in-line valve with tubes connected to both inlet and outlet.

Features

- Simple on-off operation and straight through flow
- Operating pressure range up to 300 kPa
- Green Back® cap for standard irrigation applications
- Purple Back® cap for recycled water applications
- UV stabilised materials for long life

Essential components in low pressure micro irrigation systems. Used in conjunction with standard low pressure tubing. Antelco fittings are practical and durable. Rigid Risers raise the height of irrigation emitters or act as a drop tube to suspend emitters.

Application

Home gardens, landscaping, glasshouses and hanging baskets.

Features

- Micro fittings single barb connection
- Rigid Risers in three convenient lengths
- UV stabilised materials for long life

Asta® Stakes (Registered Design)

The Asta® Stake range provides a variety of solutions for stabilising the components of micro irrigation systems.

Application

Asta® Stakes for rigid riser stability. Asta® Stake Hold-Down for securing drip and micro irrigation systems.

Features

- Asta® Stakes available in 4 height options: 200 mm, 310 mm, 420 mm and 530 mm
- Asta® Stakes suitable for plasticised PVC and polyethylene tubing (6.9 mm OD)
- Asta® Stake Hold-Down locates and secures polyethylene tubing (up to 22 mm OD)
- UV stabilised materials for long life

Micro Stake and Micro Stake Assembly

Quality fittings for accurate, secure sprinkler placement.

Features

- 320 mm long stake with 4 mm barbed entry and 4 mm off take attached
- UV stabilised materials for long life
- Assembly stake comes fitted with 500 mm length of 4 mm vinyl tube

Micro Stake with 4 mm off-take tube

Filtration device designed to trap foreign particles in the water and reduce clogging of emitters.

Application

For low pressure (up to 300 kPa) micro irrigation systems.

Features

- In-line model with single barb inlet and outlet
- Snap-On model for direct connection to standard tap adaptors
- 80 mesh screen filter
- Easily taken apart for cleaning
- Effective compact filter with minimal flow loss

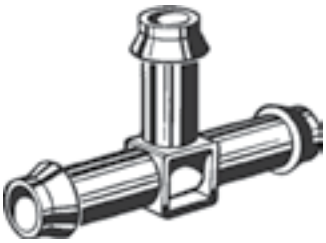
Fittings for LD Polyethylene Tube

Toro and Irritrol Systems offer a range of single barb polypropylene fittings to suit low density polyethylene tube.

Valve Director

To connect lines to threaded fittings

1011068: 32 mm tail × 25 mm BSP male



Tee

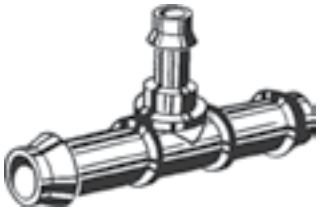
Used to connect three poly lines

1011008: 32 mm tube × all tails

Adaptor

To connect main and feeder lines

1011057: 5 mm × 10 mm tube barbed joiner (use 101P4 punch)



Reducing Tee

To connect a smaller line to larger lines

1011025: 32 mm tube × 25 mm branch

Joiner

To connect main and feeder lines

1011042: 10 mm tube joiner
1011044: 16 mm tube joiner
1011056: 32 mm tube joiner

Reducing Joiner

Used to join poly feeder lines of different sizes

1011057: 5 mm × 10 mm tube joiner (use 101P4 punch)
1011051: 16 mm × 13 mm tube joiner
1011052: 19 mm × 13 mm tube joiner
1011053: 19 mm × 16 mm tube joiner
1011072: 32 mm × 25 mm tube joiner

Take-offs

Used to offtake one poly tube from another

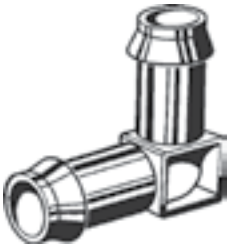
1011160: 10 mm compression take-off

DTO813: 8 mm × 13 mm Drip-Eze take-off adaptor

1011170: 10 mm grommet take-off complete (to connect 10 mm LD poly to PVC)

ETO813: 8 mm × 13 mm Elbow take-off (suit Drip-Eze)

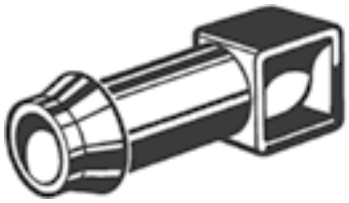
10146415: 10 mm × 13 mm take-off Elbow



Elbow

Used to change the direction of lines

1011070: 32 mm tube elbow



End Plug

Used to permanently seal poly lines

1011089: 16 mm tube end stop
1011095: 32 mm tube end stop

Ratchet Clamp

For securing fittings to poly lines

1011150: Ratchet clamp × 32 mm I.D. tube
101RC13: 13 mm Ratchet Clamp 14 mm - 15.5 mm clamping range
101RC19: 19 mm Ratchet Clamp 20 mm - 22 mm clamping range
101RC25: 25 mm Ratchet Clamp 26 mm - 29.5 mm clamping range

Repair Plug

For repairing wrongly punched holes

FPG02: 5 mm and 8 mm Goof Plug - suit replacement work

A range of punches and accessories are available to suit the commercial installation of drippers. We also have repair plugs and clips.

Application

Plugs are used to repair wrongly punched holes. Trellis Clips are used to fasten drip lines to the trellis wire.

101L24A: Hole Punch

101P3, 101P4: Hole Punch

10142315: Key Punch

101DX25: Emitter Blanking clip, suits 25 mm DripMaxx® and Neptune

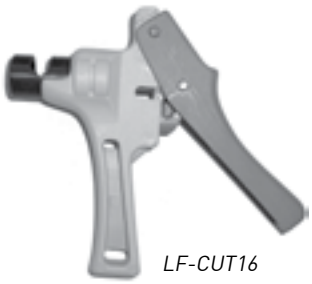
101DI20: Emitter Blanking clip, suits 20 mm Drip-In®

DT08TOOL: 8 mm Punch and Insertion tool. Suits DT0813 take-offs. Punches a hole and inserts the take-off in the same action.

101P5: 5 mm Hole Punch Ergonomic handle with coupon ejector. Suits DT0813 and some Antelco fittings

10142325: 4 mm Goof Plug

VC16, VC20: Trellis Clip



LF-CUT16

Layflat Cutter

- The tool is lightweight, compact and strong, and easy to hold in the palm of the hand
- The waste plastic does not fall into the hose and is discharged from the tool
- This tool cuts a 16 mm hole
- Suits the 1014099 (16 mm tape × double spigot layflat adaptor), 1014115 (22 mm tape × layflat adaptor), FTA5-LF (16 mm tape x layflat takeoff) and FTA7-LF (22 mm tape x layflat takeoff)

101UP3 and 101UP4: Universal Hand Gun Punch

- For low density polyethylene pipes with diameters between 12 to 32 mm
- Size adjustment simply by turning the dial at the base of the punch
- Strong and sturdy design
- Blade is made of hardened and sharpened steel
- Two models available:
- 101UP3 – 3 mm hole suitable for 4 mm barbed fittings
- 101UP4 – 4 mm hole suitable for 5 mm barbed fittings

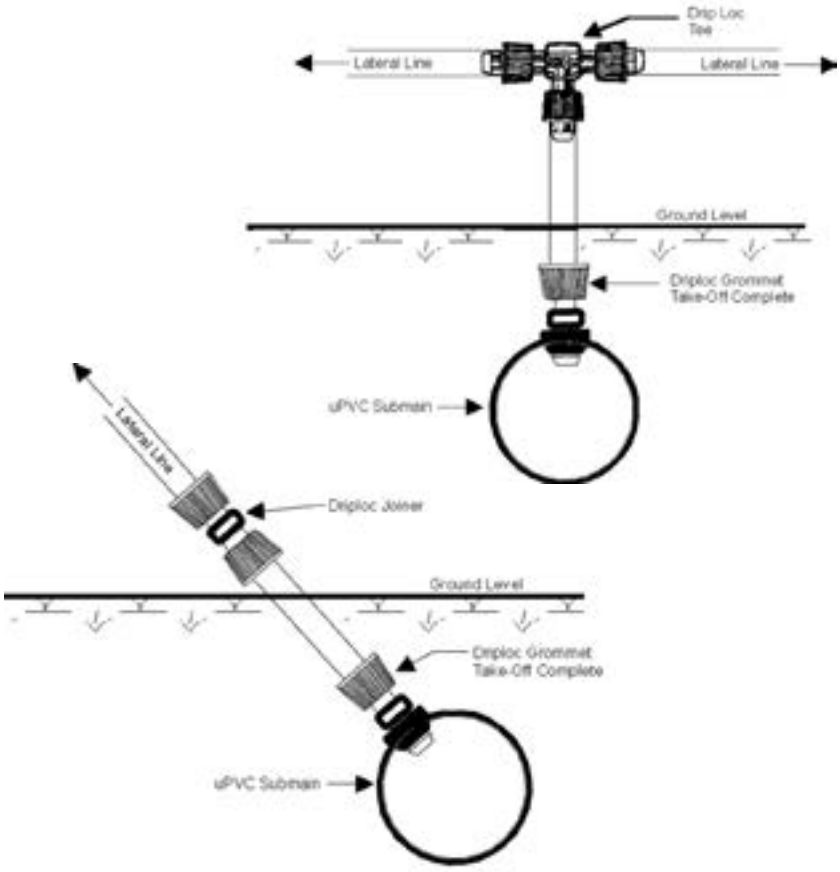
101DX25	Emitter blanking clip to suit 25 mm DripMaxx®
101UP3	Universal Hand Gun Punch – suits 4 mm barbs
101UP4	Universal Hand Gun Punch – suits 5 mm barbs
LF-CUT16	Layflat Cutter – 16 mm hole size

Application

The Drip-Loc® range of fittings have been specifically designed to suit a range of low density polyethylene tube sizes. The fittings come complete with locking rings to ensure positive polyethylene connections.

Features

- Fast and easy to install
- No Ratchet Clamps are required, so more economic than conventional barbed fittings
- The smooth barbed face and backing ring reduces the stress in the tubing and reduces both leakage and blow-off at higher pressures
- Material:
  Fittings: polypropylene
  Curved Grommet: natural black rubber
  Top Hat Grommet: EPDM black
- Pressure rating: 450 kPa
- Manifold pipe wall thickness that suits the curved grommet: 2.2 to 4 mm



Use only slow speed hand drills. Do NOT use high speed drills. Drip-Loc® fittings can handle a range of polyethylene tubing internal diameters, as follows in the table below.

Drip-Loc® Tubing Diameters	
10 mm fittings	For 10 mm I.D.
13 mm fittings	For 12 mm to 14 mm I.D. (can be used for 16 mm O.D. Drip-In Tubing)
16 mm fittings	For 16 mm to 17 mm I.D.
19 mm fittings	For 19 mm to 21 mm I.D.
25 mm fittings	For 25 mm to 27 mm I.D.

Pipe wall thickness must be greater than 1 mm for the locking ring to hold.

Hole size required for the Drip-Loc® Grommets			
Product Code	**LDPE Tube Size (ID)**	**Hole Saw Size**	**Min. Pipe Size (ID)**

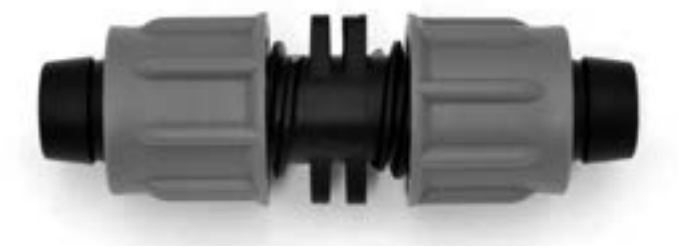
Hippo Clamp	Stainless steel clamp used to secure Drip-In tubing to fittings		101HIP16	101HIP19
Emitter Blanking Clip	Clip used to 'blank off' selected Drip-In emitters			101DI20

Note: Drip-In fittings have either two or three barbs.

Pro-Loc™ Tape Fittings

Easy to install Pro-Loc tape fittings offer a comprehensive range of configurations including couplings, layflat take-offs and valve options. Engineered for use with quality 16 mm and 22 mm tape, Pro-Loc fittings are designed to last for the life of the irrigation system.



FTC500

Application

Pro-Loc tape fittings deliver the quality you expect from Toro for reliable performance, season after season.

Features

- Tight Seal - Coarse thread ensures a tight seal, even in dirty conditions
- Easy to Install - Long double barb for positive installation
- Easy to Grip - Ergonomically designed nut provides a secure connection every time
- Easy to See - Bright blue nut makes tape fittings easy to find, remove and reuse
- Low Profile - Compact design doesn't interfere with retrieving the tape
- UV Resistant - Tough anti-UV stabiliser to suit Australian condition

Designed for reliable, proven results when used with Aqua-Traxx™. For best system results, always demand genuine Pro-Loc fittings.

Aqua-Traxx® Drip Tape Fittings

Use to connect Aqua-Traxx® drip tube run lengths to various submains.

Aqua-Traxx® Fittings				
Description	Use	Drawing	Tube Size	
			16 mm	22 mm
Tape Joiner	Used for joining or repairing tape lines		1014100	1014111
Tape Joiner × Barb	Used for connecting riser tube to tape		1014104 16 mm Barb × 16 mm Tape (use Drip-In plain poly 1015659)	
10 mm Compression × Tape In-Line Tap	Used to turn off supply to tape lines, when connected to Durapol		1014106	
Tape Tee	Used for connection of tape × tape × tape		1014109	
Two Stage Layflat Adaptor	Used for connecting Aqua-Traxx tape to Lay-Flat tubing (16 mm diameter hole required)		1014099 (double spigot)	
One Stage Layflat Adaptor	Used for connecting Aqua-Traxx tape to Lay-Flat tubing (19 mm diameter hole required)		1014103	
Drip-In Tubing	Used for riser tube from the uPVC submains (Plain tube, no emitters)		1015659 (OD 16 mm) (ID 14 mm) 450 m roll	1015660 (OD 20 mm) (ID 18 mm) 300 m roll
Grommet Take-Off Complete	Used for connecting Aqua-Traxx via plain Drip-In riser to uPVC submains (min 32 mm size)		1015678 (hole saw 5/8″)	1015681 (hole saw 5/8″)

Hippo Clamps

For use in all LD Poly and Drip tube systems in securing tube to barbed fittings.

Application

Highly suited for commercial, subsurface drip and high value crops where irrigation is critical.

Features

- Manufactured from 304 Grade Stainless Steel
- Secure latch system ensures a positive lock first time, every time
- Smooth edges to prevent tube/fitting damage
- Each clamp is uniquely colour-coded for quick and easy identification
- UV stabilised and corrosion resistant
- One-hand installation and removal makes the job easy
- Specifically designed Hippo Tool allows for quick and easy one-hand operation
- Band Width
  101HIP12-101HIP28: 8 mm
  101HIP36: 9 mm
- Wide range of clamps available to suit OD's from 12 mm to 36 mm

Hippo Clamp

Clamping Tool

Hippo Clamp Dimensions			
Code	**Colour Code**	**Size Range (mm)**	**Band Width (mm)**
101HIP12	Blue	12.0 – 13.0	8
101HIP14	Red	14.5 – 16.0	8
101HIP15	Gold	15.0 – 16.5	8
101HIP16	Green	16.5 – 18.0	8

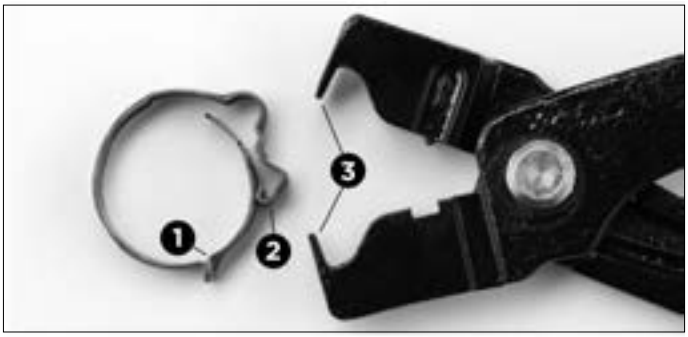
101HIP36	Green	35.0 – 36.0	9
101HIPTOOL2	Toro Hippo Clamping Tool		

Note: To determine the Hippo Clamp best suited to your installation, insert fitting into the tube and then measure the outside diameter of the tube. For optimum performance, the outside diameter should be no larger than the recommended clamping range of the selected clamp.



1 Retainer 2 Latch 3 Hippo Clamp Tool Jaws

To install:

Step 1:

Slide Hippo Clamp over tube and into position. Apply Hippo Clamp Tool Jaws (3) to the retainer (1) and into the latch (2) on the Hippo Clamp.

Step 2:

Squeeze the handles of the Hippo Clamp Tool together until the latch 'locks' over the retainer. Release the Hippo Clamp Tool and remove.

To remove:

Step 1:

Apply the Hippo Clamp Tool Jaws (3) to the retainer (1) and into the latch (2) on the Hippo Clamp.

Step 2:

Squeeze the handles of the Hippo Clamp Tool together and lift the latch (2) over the retainer (1) to unlock the clamp. Release the Hippo Clamp Tool and remove.

Application

Tridon heavy duty Bolt Clamps are suitable for use in applications where large tightening forces are required when the tube is submitted to higher pressures.

Features

- Ideal for heavy duty applications where strong hold and corrosion protection are required
- Rolled edges prevent tube damage
- Easy installation by tightening the bolt
- 304 Stainless Steel band, bridge, trunnion and collar for superior corrosion protection
- High Tensile 316 Stainless Steel Bolt for extra hardness and superior seal
- Superior design and proven reliability
- Range of clamps to suit OD's from 18 mm to 121 mm

Heavy Duty Bolt Clamp

Application

The PR worm drive range provides superior design and proven reliability. Ideal for commercial applications, PR worm drive clamps are designed for maximum sealing capability.

Features

- Ideal for commercial and heavy duty applications
- Non-perforated band for maximum durability
- Technically advanced design improves sealing capability
- Easy to install using the Flexidriver tool
- Rolled edges and smooth underside prevents hose damage and delivers superior sealing
- All clamps are manufactured with 304 Stainless Steel for superior corrosion protection
- Construction material
  Band – 304 stainless steel
  Housing – 304 stainless steel
  Screw – 304 stainless steel (with plating)
- Range of clamps to suit OD's from 8 mm to 120 mm
- Clamp width 9 mm

Application

For use within polyethylene hydraulic tube systems.

Barb Block Fittings

Features

- Constructed from reinforced polypropylene
- Quick and easy installation
- Good resistance to most acids and chemicals used in agriculture
- Maximum working pressure: 1400 kPa
- Temperature range: 4 to 90˚C (subject to application)
- Suitable for indoor and outdoor use
- Blue in colour
- Wide range of fittings available

Pipe Fittings

Features

- Constructed from Nylon 6-6
- Quick and easy installation
- Good resistance to most acids and chemicals used in agriculture
- Maximum working pressure: 1400 kPa
- Temperature range: –20 to 110˚C
- Blue in colour
- Wide range of fittings available

Aluminium Tubing

Toro has a range of quality aluminium tubing manufactured to a high standard with a robust seam for reinforcement.

Features

- Aluminium tube is supplied with plain ends
- Extruded irrigation tube produced to Australian Standard AS1866
- Pressure tested to 2000 kPa
- Standard lenghth 9 m
- Non-standard lengths can be made subject to enquiry approval

Nomimal Diameter (mm)	Mean Outside Diameter (mm)	Wall Thickness Diameter (mm)
50	50.8	1.2
80	76.2	1.2
100	101.6	1.5
125	127	1.6
150	152.4	2.0

Ordering Conditions

1. Please note, standard mill packs will only be supplied. Orders must be complete multiples of mill pack.
2. As this product is manufactured to order and is an extruded product, exact quantities cannot be guaranteed. Our supplier reserves the right to a shipping tolerance of ± 20%. The order will be manufactured, shipped and considered complete.
3. Customer to organise collection from Capral warehouse in nearest capital city. All shipping charges are the responsibility of the customer.

Please confirm ordering requirements with Toro Australia Customer Service prior to quoting and placement of order.

Application

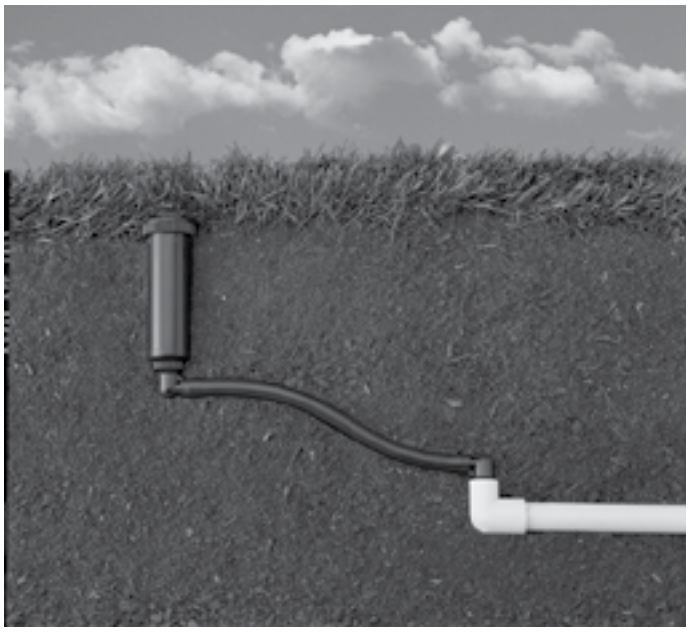
A pre-assembled flexible riser assembly used to connect sprinklers to the pipework. Its flexibility solves many of those tough sprinkler installation and replacement problems.

Features

- Flexible tube cushions the pipework from external impacts to the sprinkler
- Useful tool in difficult fit-out situations where the sprinkler doesn't always suit the pipe location
- 2 year Warranty
- Its flexibility can save time and labour – less trenching/digging

Specifications

- Two pre-assembled lengths: 200, 300mm
- Choice of 15 x 15 or 15 x 20mm MBSP elbow connections
- Tube ID: 12.45mm ± 0.13
- Tube OD: 17.78mm
- Wall Thickness: 2.54mm ± 0.25
- Pressure Rating: 600 kPa
- Material: Polyethylene



Pressure Loss vs Flow

Pressure Gauges and Adapters

Code: 101PGAT

¼" BSPM threaded pressure test point. Suitable for pressures up to 400 kPa. Suits 101PGN.

Code: 1012846

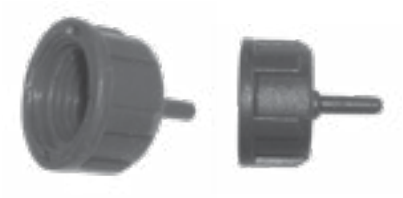
Screws directly onto pressure gauge and used to measure pressure from 1012487

• ¼" FBSP

Code: 1012844

Pitot Tube Assembly for measuring pressure direct from a sprinkler nozzle. Threaded to screw onto pressure gauge.

• ¼" FBSP



Code: 101PGN

¼" female threaded adaptor to suit 1012841, 1012842 and 1012843 pressure gauges. Needle inserts into 101PGAB and 101PGN for pressure measurement

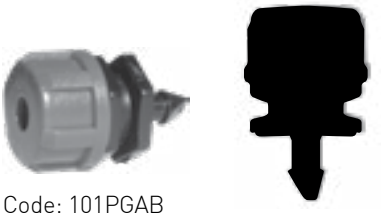
Code: 1012847

1/8" MBSP Schrader Valve

Flow and Pressure Gauge Kit 995-01

Makes determining your water capacity for a sprinkler system a breeze. Simply attach this gauge, and it will tell you the two key factors to designing your system, water pressure and gallons per minute. No more guesswork!

- Use on outside tap, not in line
- Use adjustment knob to balance psi with Gpm
- ½" NPT female threaded inlet
- Maximum pressure 160 psi (1103 kPa)
- Maximum Flow – 13 US Gpm (49 Lpm)
- Gauges show US Gpm and psi only



Code: 101PGAB

4mm barbed pressure test adaptor for direct insertion into low density polyethylene pipe. For use up to 400 kPa. Suits 101PGN.

Pressure Gauges

• Glycerine filled

• ¼" BSP male thread

1012841 0-250 kPa gauge

101PGAT	Pressure Gauge Adaptor 1/4" MBSP Thread
101PGAB	Pressure Gauge Adaptor Barbed
101PGN	Needle to adapt Pressure Gauge (1/4") suits 101PGAT and 101PGAB

Application

Family of products for the control and regulation of valves and filtration systems.

Galit (3 way Hydraulic Relay)

Code: 52101NG

NO/NC hydraulically controlled relay with 3 position handle, all in the one unit. Suitable for control of hydraulic valves up to 400mm and for modifying NO valve to NC.

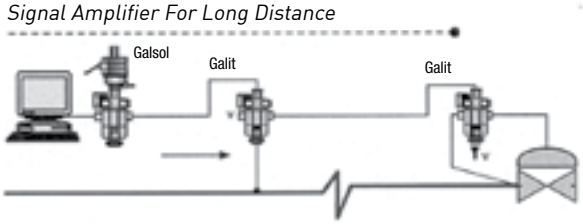
Operating Pressure Range: 50-1000 kPa
Connections: 1/8" FBSP
Orifice Size: 5.8mm
Manual Over-ride: Auto, Open, Closed
Lever Setting: (1) (3) (2)

Features

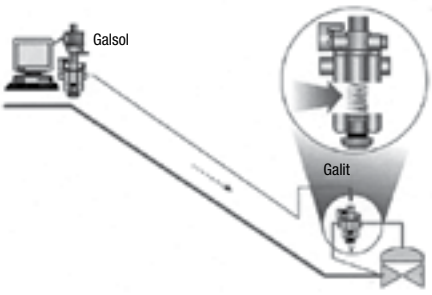
- Wide water passages reduce risk of blockage problems
- Constructed from fibreglass reinforced nylon
- Resistant to most acids and chemicals used in agriculture
- Simple installation and minimal maintenance

Spring Selection Table		
	Galit NC	**Galit NO**
Yellow	50-100kPa	50-100kPa
Green	100-140kPa	100-150kPa
White	140-170kPa	150-200kPa
Red	170-220kPa	200-250kPa

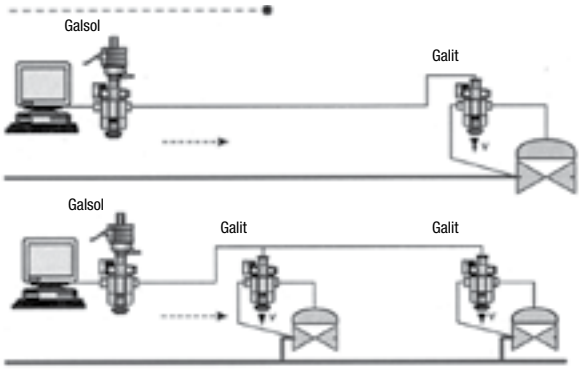
Signal Amplifier For Long Distance



Solution For Topographic Height Difference



Remote Command



Solenoid Adaptor to suit XR-100 and Galit

Code: 52103AD

Used to add a solenoid coil to the XR-100 or Galit to enable electro-hydraulic control.

For use with Galit NB400 - 3 way coils.

NB400 3 Way Solenoids and Adaptors 24VAC 50/60 Hz

Code: 52901PB, 52901NC

Power: 4 watts
Inrush Current: 200mA
Holding Current: 200mA
Max. Pressure: 1000kPa
52901PB: Normally Open
52901NC: Normally Closed

24VAC 50/60Hz
Code: 52901PB, 52901NC

2 Wire DC Latching

Code: 52902AD

Resistance: 4.5Ω
Operating Voltage: 9-40 volts DC
Std. Pulse width: 20-100ms
Red Wire: Latching
Black Wire: Unlatching
Max. Pressure: 1000 kPa

2 Wire DC Latching
Code: 52902AD

3 Wire DC Latching

Code: 52903AD

Resistance: 3.0Ω
Operating Voltage: 9-40 volts DC
Std. Pulse width: 20-100ms
Red Wire: Latching
White Wire: Common (+)
Black Wire: Unlatching
Max. Pressure: 1000 kPa

3 Wire DC Latching
Code: 52903AD

Ordering Information

52903AD	Solenoid and Adaptor 3 wire, 9-40 VDC Latching

Swing Joints

For use within irrigation systems on automatically controlled valves for hydraulic, filter flushing and Gulf valve systems.

Application

Swing joints provide the flexibility to align the sprinkler to proper grade and level positioning to ensure optimum water use through maximum nozzle distribution uniformity.

Features

- Minimize friction loss to ensure optimum pressure is available at each sprinkler
- Standard 2 x 90 models provide two 90's at the outlet for alignment in two directions and the Ultra 4 x 90 models provide four 90's at the outlet for maximum alignment flexibility in four directions
- Glue tees for PVC piping applications and saddle tees for HDPE and PVC piping applications
- Available with a Quick Coupler outlet that includes both an anti-rotation and position stabilizing feature to ensure the quick coupling valve stays secure during key installation and removal

Additional Features

- Schedule 80 PVC construction
- Double o-ring swivel joints
- Low friction loss characteristics
- 2100 kpa pressure rating
- 5500 kPa burst pressure safety rating
- 3 inlet fittings styles: ACME, male thread and 100 mm spigot
- 2 outlet fitting styles: ACME and male thread
- 200 mm and 300 mm lay lengths
- Saddle Tee models: 50 mm and 63 mm tees with 25 mm, 32 mm or 35 mm outlet
- Glue Tee models: 2" tee with 25 mm, 32 mm or 35 mm outlet
- Glue 90°models: 2" 90° with 25 mm, 32 mm or 35 mm outlet
- Quick coupler models with Dura-lock anti-rotation feature
- Compatible with all brands of service and saddle tees

Lasco G465-312 Swing Joint/Articulated Riser

This 50 mm (2") BSP Swing Joint is designed for use in sports fields where large sprinklers with large flow rates are required.

Application

Swing joints provide the flexibility to align the sprinkler to proper grade and level positioning to ensure optimum water use through maximum nozzle distribution uniformity.

Features

- Constructed from Schedule 80 PVC pipe for extra strength
- 50mm (2") diameter body for high flows
- 50 mm BSPM inlet and 50 mm BSPM outlet
- Proven ACME threads for durability and flexibility
- 300 mm (12") lay length
- Designed for use with either bottom or side inlet sprinklers
- Suitable with Perrot VP3 sprinklers
- 1380 kPa Rating

2 Way Solenoids

S-392-2W

2 Way Solenoid Coil Only, 6 – 20 VDC Latching, 2 Wire

Code: S-392-2W

Voltage Range: 6 – 20VDC
Coil Resistance: 6 ohms
Coil Inductance: 90 mH
Pulse Width: 20 – 100ms
Operation: 2 Way

Pressure Rating: 1000 kPa
Cable Colours: Red/Black, 80cm
+Red & -Black: Latch Position
+Black & - Red: Unlatch Position

Bermad Coil Only, Black/Black 3.6 Watt 24 VDC Normally Closed

Code: S390-2W-24VDC-NC

Power: 3.6 Watts
Voltage: 24 VDC
Coil Resistance: 156 ohms @ 20° C
Inrush Current: 180mA
Holding Current: 180mA
Operation: 2 Way, normally closed

Pressure Rating: 1000 kPa
Cable Colours: Black, 80cm

Bermad Coil Only, Red/Red 1.7 Watt Normally Closed

Code: S390-2W-24VAC-R

Power: 1.7 Watts
Voltage: 24 VAC
Inrush Current: 250mA
Holding Current: 125mA
37.5 ohms @ 20° C
Operation: 2 Way

Pressure Rating: 1000 kPa
Cable Colours: Red, 80cm
On/Off Handle: White
Coil Resistance:

Coil and Base, 2 Way, 24 VAC N/C

Code: S390-24VAC-NC2W-BO

Power: 1.7 Watts
Voltage: 24 VAC
Inrush Current: 250mA
Holding Current: 125mA
Coil Resistance:
37.5 ohms @ 20° C
Operation: 2 Way,
normally closed

Pressure Rating: 1000 kPa
Cable Colours: Red, 80cm
On/Off Handle: White
Orifice Diameter: 1.8mm
Ports: 1/8" NPT (female)

3 Way Solenoids

3 way, 2 wire, 12-50VDC Latching Solenoid, Normally Open Pilot Valve

Code: 982-3B

Power Voltage: 12-50VDC Latching
Coil Resistance: 4.2 ohms
Pulse Width: 20-100ms
Ports: 1/8" NPT (female)
Operation: 3 way, normally closed

Cable Colours: Red/Black
On/Off Handle: Green
Orifice Size: 2.2mm
Pressure Rating: 1000 kPa
+Red & - Black: Solenoid vents
+Black & - Red: Solenoid pressurizes

3 way, 3 wire, 12-50VDC Latching Solenoid, Normally Open Pilot Valve

Code: S-985

Voltage: 12-50VDC Latching
Coil Resistance: 4.2 ohms ON, 7.5 ohms OFF
Pulse Width: 20-100ms
Ports: 1/8" NPT (female)
Operation: 3 way, normally closed
Cable Colours: Red/Black/White

On/Off Handle: Green
Orifice Size: 2.2mm
Pressure Rating: 1000 kPa
+ White: Fixed common
- Red: Solenoid vents
- Black: Solenoid pressurizes

Coil and Base, 3 Way, 3 Wire 9-40 VDC, 2 Wire Latch (Suit GDC/TDC/Sentinel)

Code: S402-3W

Voltage Range: 9 – 40 VDC
Coil Resistance: 8 ohms
Coil Inductance: 90 mH
Pulse Width: 20 – 100ms
Operation: 3 Way

Pressure Rating: 1000 kPa
Cable Colours: Red/Black, 80cm
On/Off Handle: Black
Orifice Diameter: 2.2mm
+Red & - Black: Solenoid Vents
+Black & - Red: Solenoid Pressurises
Ports: 1/8" NPT (female)

S402-3W

Coil and Base, 3 Way, 3 Wire 4.2 Watt 24 VDC Normally Closed

Code: S390-3W-24VDC-NC

Power: 4.2 Watts
Voltage: 24 VDC
Coil Resistance: 135 ohms @ 20° C
Inrush Current: 170mA
Holding Current: 170mA
Operation: 3 Way, normally closed

Pressure Rating: 1000 kPa
Cable Colours: Black, 80cm
On/Off Handle: White
Orifice Diameter: 1.8mm
Ports: 1/8" NPT (female)

Coil and Base, 3 Way, 24 VAC N/C

Code: S390-3DB24VAC-BO

Power: 3.5 Watts
Voltage: 24VAC
Coil Resistance: *
Inrush Current: 200mA
Holding Current: 200mA
Operation: 3 Way, normally closed
*The resistance in this coil cannot be measured

Pressure Rating: 1000 kPa
Cable Colours: Orange/Blue, 80cm
On/Off Handle: White
Orifice Size: 1.8mm
Ports: 1/8" NPT (female)

S390-3DB24VAC-BO

3 Way Solenoids cont.

Coil and Base, 3 Way, 24 VAC with Diode, N/C

Code: S390D24VACNC3WBO

Power: 3.5 Watts
Voltage: 24 VAC
Coil Resistance: *
Inrush Current: 200mA
Holding Current: 200mA
Operation: 3 Way, normally closed
Pressure Rating: 1000 kPa
Cable Colours: Orange/Blue, 80cm
On/Off Handle: White
Orifice Diameter: 1.8mm
Ports: 1/8" NPT (female)
*The resistance in this coil cannot be measured

Solenoid Coil, 24 VAC, N.O. 3 Way with Diode

Code: S400NO

Power: 3.5 Watts
Voltage: 24 VAC
Coil Resistance: *
Inrush Current: 200mA
Holding Current: 200mA
Operation: 3 Way, normally open
Pressure Rating: 1000 kPa
Cable Colours: Red/Blue, 80cm
On/Off Handle: Green
Orifice Diameter: Inlet – 2.2mm
Exhaust – 1.8mm
Ports: 1/8" NPT (female)
*The resistance in this coil cannot be measured

S400NO

Coil and Base, 3 Way, 24 VAC N/O with Diode

Code: S400-3W-24VACDNO

Power: 3.5 Watts
Voltage: 24 VAC
Coil Resistance: *
Inrush Current: 200mA
Holding Current: 200mA
Operation: 3 Way, normally open
Pressure Rating: 1000 kPa
Cable Colours: Red/Blue, 80cm
On/Off Handle: Green
Orifice Diameter: Inlet – 2.2mm
Exhaust – 1.8mm
Ports: 1/8" NPT (female)
*The resistance in this coil cannot be measured

Coil and Base, 3 Way, Red/Red 2.9 Watt, 24 VAC N/O

Code: S390R24VACN3W

Power: 2.9 Watts
Voltage: 24 VAC
Coil Resistance: 21 ohms @ 20° C
Inrush Current: 460mA
Holding Current: 240mA
Operation: 3 Way, normally open
Pressure Rating: 1000 kPa
Cable Colours: Red, 80cm
On/Off Handle: White
Orifice Diameter: 1.8mm
Ports:1/8" NPT (female)

3 way, 3 wire, 9-40 VDC Latching Solenoid, Normally Open/Closed Pilot Valve

Code: 1014872

Voltage: 9-40 VDC Latching
Coil Resistance: 3.0 ohms
Pulse Width: 20-100ms
Ports: 1/8" BSP (female)
Operation: 3 way, normally closed/open
Cable Colours: Red/Black/White
On/Off Handle: Black
Orifice Size: 5.8mm
Pressure Rating: 1000 kPa
White: Fixed common+
Red: Latching
Black: Unlatching

3 Way Taps

Bermad 1/8" Sagiv 3 Way Manual Tap

Code: SAGIV-18

SAGIV-18

Bermad Solenoid Coil, 12 VDC, 2 Wire Latching with Galit

Code: S-982-G

Sub Heading: Single Sided Control Bars 12 VDC Solenoid Normally Open

Control Bar Single Sided 4 Port 12 VDC N/O Coil
Code: BE-CB-4-12VDC-NO
Uses S-390-3W-12VDC coil

Control Bar Single Sided 6 Port 12 VDC N/O Coil
Code: BE-CB-6-12VDC-NO
Uses S-390-3W-12VDC coil

Control Bar Single Sided 8 Port 12 VDC N/O Coil
Code: BE-CB-8-12VDC-NO
Uses S-390-3W-12VDC coil

BE-CB-4-12VDC-NO

Sub Heading: Single Sided Control Bars 12 VDC Latching Solenoid Normally Open

Control Bar Single Sided 4 Port 12 VDC Latching N/O
Code: BE-CB-4-12VDCL-NO
Uses S-985 coil

Control Bar Single Sided 6 Port 12 VDC Latching N/O
Code: BE-CB-6-12VDCL-NO
Uses S-985 coil

Control Bar Single Sided 8 Port 12 VDC Latching N/O
Code: BE-CB-8-12VDCL-NO
Uses S-985 coil

BE-CB-4-12VDC-NO

Solenoid Coils and Accessories

588403

- 811B Solenoid Assembly
- 24VAC, 50Hz, 0.34 amp inrush, 0.20 amp holding current
- 45cm Red leads, XLPE insulation, 20AWG conductors
- Captive plunger

DCLS-P

- Potted DC Latching solenoid suits EZ-Flo Plus, P-150, P-220 and 220 series valves. Suits DDCWP
- Wetted parts constructed from 400 stainless steel and zytel
- Voltage: 6-14VDC
- Coil resistance: 9 ohms
- Coil inductance: 65 mH
- Pulse width: 20ms
- Leads: 2, red and black, 45cm long, 20AWG, PVC insulation
- Latch position: + Red and - Black
- Unlatch position: + Black and - Red

HVC-KIT

- Converts standard solenoid operated valve into hydraulic remotely operated valve. Only suits Toro P150, P220, Irritrol Century, Century Plus and S-Series solenoid valves
- Kit consists of a thread x ¼" barbed adaptor (to replace the coil) and 2 PVC plugs. Suits Toro ¼" control tubing
- Cannot be used if EZReg or OmniReg required or fitted

Lilac Valve Accessories

1088501

- Effluent tag for use with Toro or competitive valves

Air Vacuum Breaker – 15 mm MBSP

Application

Designed to allow air into the irrigation system, under vacuum conditions created during shutdown and drainage of drip lines. Aids in the prevention of dirt ingress into drippers under vacuum.

Specifications

- 15mm (½") BSPM thread
- Maximum pressure: 1000 kPa
- Plastic construction with Buna-N o-ring seal

Air Intake vs Vacuum Pressure				
Vacuum Pressure (kPa)	-10	-20	-30	-40
Air Intake (m3/h)	34	51	65	80

Ordering Information	
Code	**Description**
101VB15	Air vacuum Breaker, 15mm BSPM Pack size: 20

ARV-1-A 25 mm MBSP Combination Air Release Valve

Application

Designed to efficiently extract the air trapped in pipes and filter systems.

Features

- One seal which expels both kinetic and residual air automatically, regardless of water pressure.
- Exclusive Y shaped air discharge outlet allows a much greater air flow than in other valves in both the intake and discharge phase.
- Simple design with only five parts. Is easy to disassemble for cleaning and maintenance.
- Red coloured body for easy field identification.

Operation

1. Expels air from the pipe network as the lines fill. When the water reaches the interior of the valve the float rises and seals the discharge outlet.
2. Continually expels air automatically when residual pockets of air reach the valve. Air pockets are expelled regardless of water pressure.
3. Prevents vacuum and subsequent pipe collapse because as soon as pressure is decreased the float drops, opening the seal and allowing outside air into the pipe system.

Specifications

- Inlet: 25 mm (1") MBSP
- Seals at 20 kPa water pressure.
- Maximum working pressure: 1200 kPa.
- Air volume extracted at 70 kPa is 24.5 m3/hr.
- Fibreglass reinforced Polyamide body and base for UV protection.

Ordering Information	
Code	**Description**
1014900	ARV-1-A 25 mm MBSP Air Release Valve
1014900SPK	ARV-I-A Valve Service Kit

ARV-2-KA 50 mm MBSP Combination Air Release Valve

Application

Designed to efficiently extract the air trapped in pipes and filter systems.

Features

- Unique double seal system, one for kinetic performance and another for permanent automatic control.
- Triangular discharge outlet and low density float ensures water tightness. No water discharge regardless how slowly the system is pressurised or emptied.
- Polyurethane main seal resistant to fertiliser and system cleaning chemicals.
- Screen in outlet elbow to prevent entry of foreign material.
- 32 mm FBSP outlet to allow for pipe plumbing exhaust.
- Red coloured body for easy field identification.

Operation

1. Expels air from the pipe network as the lines fill. When the water reaches the interior of the valve the float rises and seals the discharge outlet.
2. Continually expels air automatically when residual pockets of air reach the valve. Air pockets are expelled regardless of water pressure.
3. Prevents vacuum and subsequent pipe collapse because as soon as pressure is decreased the float drops, opening the seal and allowing outside air into the pipe system.

Specifications

- Inlet: 50 mm (2") MBSP
- Seals at 20 kPa water pressure.
- Maximum working pressure: 1600 kPa.
- Air volume extracted at 30 kPa is 370 m3/hr.
- Fibreglass reinforced Polyamide body and base for UV protection.

Ordering Information	
Code	**Description**
1014901	ARV-2-KA 50 mm MBSP Air Release Valve
1014901SPK	ARV-2-KA Valve Service Kit

Application

The air release feature allows air to escape the pipeline during system start-up, while the vacuum relief feature allows air to enter the pipeline during valve closure or system shutdown.

The vacuum relief minimises:

- Collapse of mainline and submain pipes due to the vacuum.
- Back siphonage of dirt into emitters. (Vacuum relief can reduce this problem and in some cases eliminate it)
- Water hammer caused by sudden reversal of flows, especially downstream of a valve.

Features

- Available in 25mm and 50mm MBSP threaded inlets.
- Innovative slam resistant design ensures only water closes the valve.

Performance Chart

150 mm Round Valve Box

- Commercial grade valve box for housing single 25 or 40 mm solenoid valve
- Pipe cuts-outs, 63 mm x 63 mm
- Snap on lid for easy access (no bolt and no provision for bolt
- T-Lip lid to reduce risk of dirt jamming lid lift
- Lid marked "CV"

591-VB1419	352 mm x 483 mm x 305 mm Rectangular Valve box, Green body, Green Lid
591-VB1419RW	352 mm x 483 mm x 305 mm Rectangular Valve box, Lilac Lid and body
591VBL1419	Green Lid to suit 591-VB1419
591VBE1419	Extension (Black body) suits 591-VB1419
591VBL1419RW	Lilac Lid to suit 591VB1419 and 591VB1419RW

** Measurements based on the following: Bottom of Body, Width x Length x Depth*

441 mm x 606 mm x 305 mm Jumbo Rectangular Valve Box

- Commercial grade valve box for housing multiple solenoid valves
- No Pipe cuts-outs
- Snap on lid for easy access with stainless steel bolt for security
- T-Lip lid to reduce risk of dirt jamming lid lift
- Lid marked "Irrigation Control Valve"

Control Valve Wiring – Single Core

Application

For use in automatic irrigation systems to connect solenoid valves to controller. Extra low voltage systems only (as defined by AS3000). Suitable for direct burial. Not suitable for connection to Mains Power Supply.

Specification

Conductor:	Multi-strand plain copper wire
Insulation:	UV stabilised polypropylene to AS3808
Colours:	Black, Blue, Brown, Green,Red, White, Yellow
Coil Lengths:	100 and 500 metres
Sizes:	0.5, 1.0, 1.5, 2.5, 4.0, 6.0 mm^2

Wiring Installation Hints

- It is important to know the current draw of the electrical components so that the correct wire size is used.
- When installing control wire, ensure wire is looped at valve location to allow for expansion/contraction and soil movement.
- All valves to be installed in well drained gravel based valve box enclosures.
- A common wire links one wire on all solenoid valves to the controller and is usually black in colour.
- Ensure all wire connections are accessible for later servicing and fault finding.
- Ensure wire is not taut in the trench, i.e. allow for movement by providing extra slack in all installations.
- An active wire is defined as the wire that connects a valve to a specific station. They can be various colours.
- All wire connections must be waterproof, i.e. use wire connectors and sealant gel to ensure a waterproof connection.

Typical Properties

Nominal Area (mm^2)	Nearest AWG No.	Conductor No/ Diam (mm)	Amp rating (Amps)	Insulation Thickness (mm)	Electrical Resistance @ 20°C ohms/1000 m	Nominal OD (mm)	Weight (kg/100 m)

Control Valve Wiring – Multi-core

Application

For use in automatic irrigation systems to connect solenoid valves to controller. Extra low voltage systems only (as defined by AS3000). Suitable for direct burial. Not suitable for connection to Mains Power Supply.

Specification

Conductor:	Annealed copper to AS1125 drawn from Class 102 copper to AS1574
Insulation:	Coloured UV stabilised polypropylene
Outer Sheath:	Flexible coloured (red) PVC type 4V75 to AS3808
Coil Lengths:	50m (0.5 mm^2 only), 100 and 500 metres
Sizes:	0.5, 1.0, 1.5, 2.5 mm^2

Ordering Information

Twisted Decoder Communication Cable

Application

For use specifically in GDC and TDC control systems to connect decoders to the interface unit. Extra low voltage systems only (as defined by AS3000). Suitable for direct burial. Not suitable for connection to Mains Power.

Features

- Twisted conductors, to reduce interference.
- Heavy duty outer sheath to help retain the integrity of the cable.
- Two cores are colour coded to match the communication cable from the decoders and reduce the possibility of wiring errors.
- Available in 4 standard colours Red, Green, Yellow and Blue. Others made to order.
- Rip cord inside sheath to help installation.

Specifications	
Conductor	Tinned, solid core copper wire
No. of conductors	2
Insulation	V75 PVC to AS3808, 1.5 mm thick
Outer Sheath	Heavy duty, 4V75 PVC to AS3808, 1.2 mm thick
Colours	1 x Black and 1 x white insulation with Red, Green, Yellow, Blue outer sheath
Coil Length	500 metres
Size	2.5 mm^2 (two conductors)
Coil Weight/500 m	66 kg
Nominal Cross section	7.5 mm x 12.5 mm
Electrical resistance @ 20°C, ohms/1000 m	7.35

Decoder-Solenoid Cable

Application

For use specifically in GDC and TDC control systems to connect decoders to each solenoid. Colour coded to match decoder wiring and help avoid incorrect connection. Suitable for direct burial. Not suitable for connection to Mains Power.

Features

- Two products available; 4 core, 8 core.
- Use 4 core on 1 and 2 output decoders
- Use 8 core on 4 output decoders
- Colour coding helps to avoid incorrect solenoid wiring polarity. Always connect the Black striped wire to the Black wire of the latching coil.

Specifications	
Conductor	Tinned, solid core copper wire
Insulation	Coloured UV stabilised polypropylene
Outer Sheath	Red 4V75 PVC to AS3808
Colours: 4 core	Green, Green with Black stripe, Red and Red with Black stripe
Colours: 8 core	Green, Green with Black stripe, Red and Red with Black stripe, orange and Orange with Black stripe, Blue and Blue with Black stripe
Coil Length	500 metres
Size	1.5 mm^2 conductors
Coil Weight	40 kg (4 core) 75 kg (8 core)
Electrical resistance @ 20°C, ohms/1000m	13.6

MC0415500-D	4 x 1.5 mm^2 Solid, Paired, colour coded cable x 500 metre. Use with 1 & 2 output decoders
MC0815500-D	8 x 1.5 mm^2 Solid, Paired, colour coded cable x 500 metre. Use with 4 output decoders

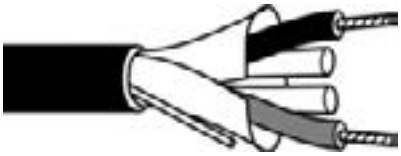
Grounding Cable – Bare Copper, Single Core

Application

For use in grounding controllers and decoder systems and providing extra lightning protection. Connection to copper rods and plates. Not for use in connecting to solenoids.

- Soft-Annealed, bare, solid, single core copper, 6AWG (13.2 mm^2).
- Coil length - 75 metre.
- Weight - 9.6 kg

Ordering Information	
Code	**Description**
6AWG075BCC	Single Core 13 mm^2 x 75 m coil, single core bare copper cable (no insulation)



Communication Cable – Double Screened

Application

For use in central control systems where the communication from the central PC to the field controllers is via hard wire. Also for use, in some circumstances, for connection of various sensors to field controllers.

Features

- The cable comprises two stranded, insulated conductors, and aluminium shield and drain wire to protect signals from electrical, magnetic or RF interference, and a sunlight resistant PE outer jacket. The wires are twisted with a 75 mm maximum lay.
- Suitable for below ground installation but not armour protected.

Specifications	
Insulation	Polyethylene to ICE S-61-402 and ASTM D-1248.
Insulation Colour	Black
Insulation thickness	0.41 mm (16 mils)
Shield	A 2 mil aluminium backed polyester shielding with a 1.37 mm^2 (#16 AWG) solid, tinned copper drain wire in contact with the aluminium
Sheath	Black heat stabilized, high density Polyethylene, sunlight and moisture resistant, conforming to ICEA S-61-402, NEMA WC-5 and ASTM D-1248.
Sheath Thickness	1.14 mm (45 mils)
Sheath OD	7.6 mm (0.3")
Conductors	Stranded soft annealed tin coated copper conforming to ASTM-B-3 and B-8.
Conductor Size	1.37 mm^2 (#16 AWG)
No. of Conductors	Two

Scotchlok® Gel-filled 314, 316IR 2/3 Wire Connector

- Moisture resistant wire connector for two or three copper wire connections. Suitable for 0.5-1.5 mm^2 cables. Maximum insulation OD is 3.8 mm.
- No need to strip the insulation back. Push the cable all the way to the stop. With all cables inserted, squeeze the cap with a pair of pliers. Check the gel oozes out of the connector slots.
- Test to ensure cables are firmly held within the connector.
- 314 0.5 – 1.0 mm^2, 316IR 0.5 – 1.5 mm^2.
- Not suitable for decoder systems.

1012589 | 1012589P

Twist Lock Gel-filled Wire Connector

- Silicone filled, moisture resistant connector for copper wire connections. Suitable for joining from 2 x 1 mm^2 up to 2 x 2.5 mm^2.
- Strip insulation back 20mm, group bare wire end together. Insert wires through flexible sealing fingers. Pre-twisting is unnecessary unless using stranded cable. (Wrap stranded wire around solid wires). Bend wires over completely into one V-channel. Squeeze inner sleeve into pre-filled outer sleeve until locked.

1012590

Gel-filled Wire Connector

- Moisture resistant wire connector for two or three copper wire connections. Suitable for 0.5 mm^2 cables (19-26 AWG). Maximum insulation OD is 2 mm for the two outside slots and 1.9 mm for the centre slot.
- No need to strip the insulation back. Push the cable all the way to the stop. With all cables inserted, squeeze the cap with a pair of pliers. Check the gel oozes out of the connector slots.
- Test to ensure cables are firmly held within the connector.

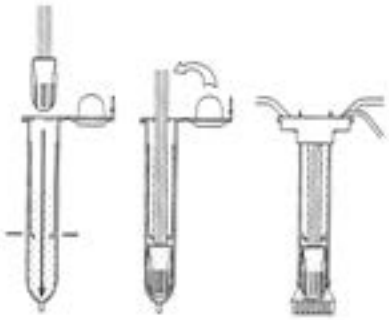
3M Direct Bury Splice Kits

3M DBR/Y and DBO/B Direct Bury Splice Kits are real time savers when installing underground electrical systems. Every component for the splice is included in the kit. The insulator tube is pre-filled tube is prefilled with a moisture resistant gel. No crimping tool, no waste, no mess. Just quick, reliable underground splices for irrigation and sprinkler systems, landscape lighting.



Features

- Sealant does not set up hard, allowing splice to be reworked without cutting wires (new tube required).
- Application temperature range: 32° - 120°F (0° - 49°C).
- Storage Temperature: 120°F (49°C) maximum.
- U.V. resistant
- DBY-6 and DBR-6 introduced for use in Toro GDC and GAC decoder systems.

Ordering Information	
Code	**Description**
DBR/Y	3M Waterproof Connector. 600VA rated. ROHS compliant. Suitable for 2.1mm² decoder cable.
DBO/B	3M Waterproof Connector. 600VA rated. ROHS compliant. Suitable for 1.5mm² cable joins or smaller.

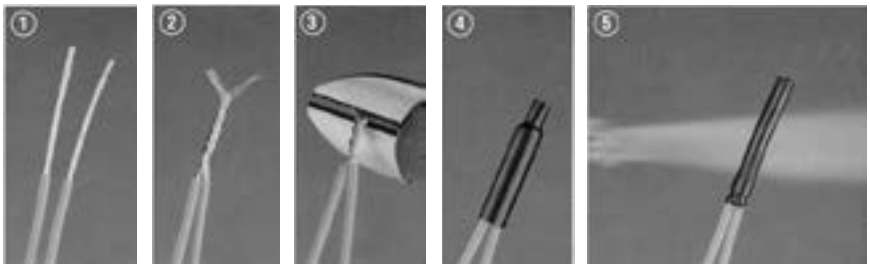
DBR/Y

DBO/B

Heat Shrink Wire Connector

A heat shrinkable cap for simple, fast sealing of multiple wire connection without the need for soldering.

- Strip wires to 25 mm, twist bare wires together. Trim to 12 mm. Put on cap and apply heat until cap achieves uniform length and the mastic sealant is visible at the end.



Cap Type	No. of Cables	Cable Diam mm²
Cap 48	2	0.5 - 1.0

3M Scotch 35 Vinyl Electrical Tape Rainbow Pack

A premium grade electrical tape that stretches to conform to virtually any shape that requires colour coded insulation.

Abrasion and weather resistant, with excellent mechanical and electrical insulation properties that wraps smoothly and holds tight over a wide range of temperatures.

Tape Thickness: 0.17 mm (7 mil)

UV Resistance: Exceeds UL510 requirements

Temperature Rating: 105°C (220°F)

Size: 19 mm x 20 m roll

Rainbow Pack consists of 10 assorted vinyl electrical tape rolls, containing black, red, blue, white and green/yellow.

Copper grounding plates with welded insulation cover

- Required for supplementary grounding of any irrigation controller, weather station or interface forms a low inductance path to ground.
- Ground plates to be installed to a minimum depth of 76cm or below the frost line if it is lower than 76cm.
- Product Code:
  182199L – Grounding Plate with Exothermically Welded 100 mm x 2.44 m and 7.6 m of 17 mm2 Bare Copper Wire.

182199L

Copper Grounding rods

- Used as a standalone or combined with a ground plate to form a ground grid for supplementary grounding of any irrigation controller, weather station or interface.
- Full length must be installed completely into the earth.
- Product Codes:
  182000IC6 – Copper Grounding Rod 16 mm x 2.4 m with Exothermically Welded 4.57 m of 6 AWG Insulated Green Wire
  182000 – Copper Grounding Rod 16 mm x 2.4 m
  182005 – Grounding Clamp (182000)

182000IC6

182000

Decoder Cable Switches with lighting protection

Decoder Cable Switches are specifically designed as electrical isolation devices to help with troubleshooting of damaged or non-functioning 2-Wire irrigation systems. Single or multiple sections of the electrical circuit can be disconnected or isolated by simply removing a fuse, without cutting wires or undoing splices/ joints.

Ordering Information	
Code	**Description**
270DCFD1L	Single Decoder Cable Switching Device w/ Lightning Protection
270DCFDL	Two-way Decoder Cable Switching Device w/ Lightning Protection
270DCFD3L	Three-way (1 input & 3 output cables) w/ Lightning Protection

Decoder Cable Fuse Device (DCFD)

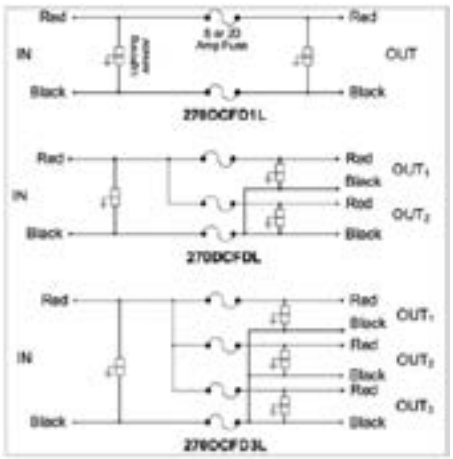
Application

Specifically designed as electrical isolation device for quick troubleshooting of damaged or non-functioning 2-Wire irrigation systems. Single or multiple sections of the electrical circuit can be disconnected or isolated by simply removing a fuse, without cutting wires or undoing splices/joints.

Features

- The isolation of circuit sections minimises electronic component failure
- Cap is unscrewed to access the fuses, the O-Ring Seal provides a waterproof capsule.
- Lighting protection models incorporate lightning arresters on the input and outputs wires.
- All wires are 0.91 m 14 AWG UF/TWU for direct burial and to allow the assembly to be brought above grade when troubleshooting and accessing the fuses.
- Standard 20-amp Mini Automotive fuses act as circuit switches when inserted (closed/on) or removed (open/off)
- Provides lightning protection when the electrical surges exceed 20-amp.
- For more sensitive circuit during a lightning strike, 5-amp fuses are included on the lightning protection models.

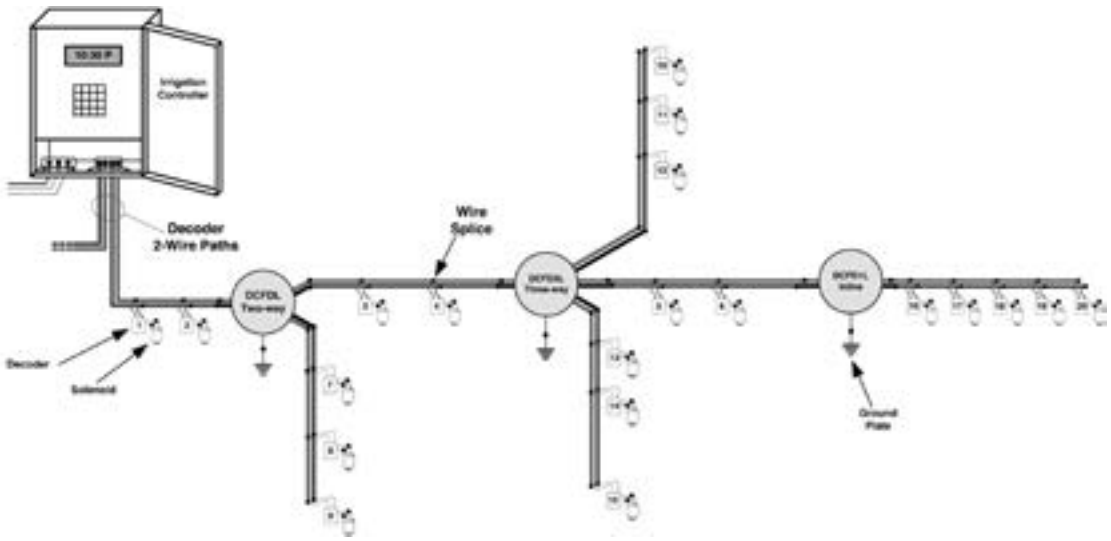
Ordering Information	
Code	**Description**
270DCFD1L	Single Decoder Cable Switching Device w/ Lightning Protection
270DCFDL	Two-way Decoder Cable Switching Device w/ Lightning Protection
270DCFD3L	Three-way (1 input & 3 output cables) w/ Lightning Protection



Decoder Cable Fuse Device Installation

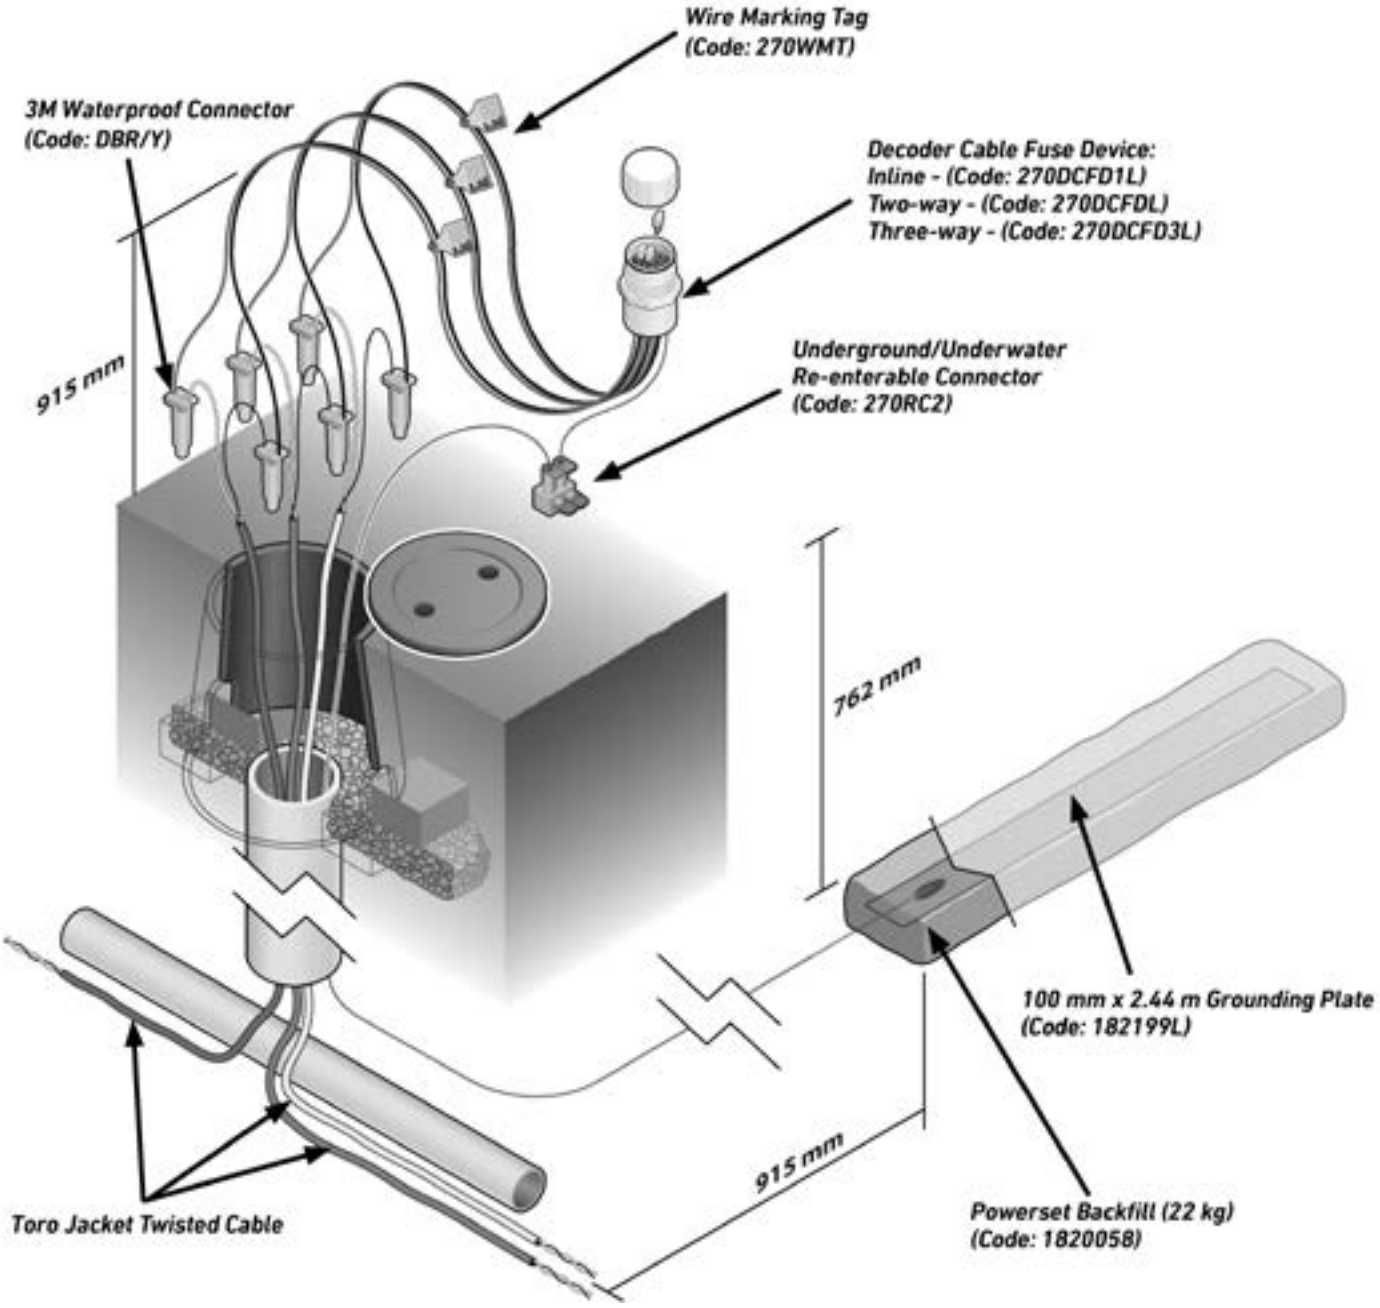
Decoder Cable Fuse Devices should be strategically installed at the points where cables split in different directions and in long straight wire sections to isolate it in half for troubleshooting.

The typical Installation below shows locations where you would undo the splices when troubleshooting. The electrical circuit should be looked at as if it was a hydraulic system and the DCFDs are isolation valves.



Decoder Cable Fuse Device Installation (cont.)

The DCFD must be installed inside an accessible irrigation valve box and the wire connections must be made using the connectors as illustrated in the drawing below.



TMR-1 Maintenance Remote

750 m Range

Designed for convenience and usability, the Toro® TMR-1 is a maintenance remote system that allows a single operator to perform irrigation checks and operate a system from up to 750 m away. A large, easy-to-read LCD, push button interface and intuitive command set make the TMR-1 easy to use and operate.

TMR-1 KIT-A

Transmitter

Receiver

Features

- Operates on unlicensed frequency
- Up to 750 metre line-of-sight range without the need for ACMA licensing.
- Toro Exclusive All Stations Cycle (ASC) Function
- Provides one-start system operation for walk-throughs, maximizing productivity – 2 minute runtimes per station.
- Quick-Connect System (For Toro Controllers)
- Allows receiver to easily be moved from one controller to another; circular connector can be bracket-mounted or mounted using 12.7mm (½") conduit.
- Multi-Controller/Multi-Site Capability Programmable address allowing selection of up to 999 different remote receivers at controllers.
- Two year warranty

Additional Features

- Intuitive, easy-to-use keypad
- Large, easy-to-read LCD display
- Remotely controls up to 500 stations
- Battery life indicator
- Circular connector comes standard with 1.2 metre cable
- Simple, intuitive command set
- Default run time is 10 minutes
- Display shows countdown of time left to run
- Ergonomic design and removable belt clip make for easy handling

Specifications

- Receiver size: 255 mm x 76 mm (with antenna)
- Transmitter size: 255 mm x 76 mm (with antenna)

Electrical Specifications

- Receiver input voltage: 22-26 VAC input
- Transmitter DC Operating voltage: 6-8V DC (4 AA Standard or NiMH rechargeable batteries)
- User may use NiMH rechargeable batteries or standard AA alkaline cells
- Battery charger: Dual rate 12-hour charger
- Receiver operates off of the 24 VAC power from the controller
- TUV-GS, CE compliant

Operating Specifications

- Frequency: 430-450 MHz
- Operating temperature range: -10° to 60° C
- Up to 750m line-of-sight range

Ordering Information

Code	Description
TMR-1-KIT-A	Toro Maintenance Remote Complete Kit
TMR-1-CC	Cable connect for Toro Maintenance Remote Receiver
CMR-ADP	Adaptor for use TMR-1 with MC-E, KwikDial and RainDial

Application

A reliable wired rain sensor system suitable for use with most irrigation controllers to help conserve water by sensing rain events.

Features

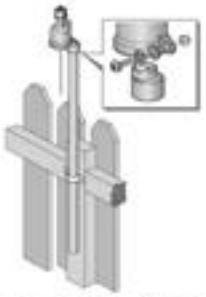
- Compatible with all Toro and other Manufacturers controllers.
  Universal Normally Open and Normally Closed operation for compatibility with all controllers that are designed to accept a sensor device.
- Maintenance Free Hygroscopic Discs
  Industry standard sensing discs with adjustable rain shut-off indexes at 3.2, 6.3, 12.7 and 19 mm.
- 7.6 Metres of UV Resistant Cable
  Includes 7.6 metres of white outdoor rated, UV resistant cable.
- Three Mounting Options
  (See schematic below)

Specification

- Dimensions
  Transmitter: 44 mm W x 89 mm H x 49 mm D.
- Weight (product and carton): 0.36 kg
- Relay contacts output, normally open or normally closed: 3A, 24VAC
- Operating temperature: -29° C to 49° C
- Low profile design and UV resistant housing for sensor.
- No special tools for installation.
- Warranty: 2 years

Quick Clip gutter bracket

Wall mount



Conduit adapter

Ordering Information	
Code	**Description**
TRS	Toro Wired RainSensor

Application

A reliable wireless rain sensor system suitable for use with most irrigation controllers to help conserve water by sensing rain events. The patent pending Water Conservation Mode™ helps to save even more water by extending the controller reset beyond where conventional rain sensors reset.

Features

- Normally Open or Normally Closed
  Either sensor can be set for either normally open or normally closed making them compatible with almost all electronic timers.
- Selectable Water Management Modes
  Delay resumption of irrigation by intelligently extending beyond the mechanical reset time and save water.
- Smart Bypass ™
  Allows the sensor to be overridden and resets automatically. Handy for irrigating special need zones.
- LCD Display
  Provides informative system feedback including outside temperature, transmitter signal strength and battery life.
- Rain/Freeze Combination
  Features digital programmable accuracy. The freeze shut-off can be set from 2°C to 7°C. (Note, the Freeze sensor should not be used to control frost control systems.)
- Wireless Sensor
  Ease of installation and suits retro-fits.

Dimensions

- Transmitter
  44 mm W x 89 mm H x 44 mm D
- Receiver
  50 mm W x 102 mm H x 44 mm D
- Weight (product and carton) 0.35 kg

Specifications

- Operating temperature
  -29° C to 49° C.
- Housing material
  Weather and UV resistant engineered polymer
- Transmitting range
  Up to 150m (line of sight) with adjustable antenna
- Sensor
  Maintenance free hygroscopic discs; adjustable rain sensitivity (3.2 mm to 19 mm)
- Low battery Indicator
- Signal Strength indicator/scale
- Rain delay
  Feature that works intelligently with the rain sensor.
- Fail safe Mode
  For loss of communication or failed sensor events.
- Real time outside temperature displayed on the LCD (TWRFS only)
- Easy to replace, standard coin batteries (5 year lifetime)
- Versatile mounting bracket
  One piece Quick-Clip™ gutter bracket or 15mm (1/2") conduit adaptor.
- Can control multiple receivers/ controllers with one sensor transmitter.
- Warranty: 5 years

Electrical Specifications

- Transmitter Power:
  2 replaceable lithium cells (CR2032-3V)
- Receiver Power Source:
  22-28 VAC/VDC, 100 mA (from existing timer or optional transformer)
- Relay Contacts Output:
  Normally open or normally closed; 3 A at 24VAC
- FCC, IC, AVA, CUL, CE and C-tick approved

Ordering Information

Code	Description
TWRS-I	Toro Wireless Rainsensor
TWRFS-I	Toro Wireless Rain/Freeze Sensor

No guesswork for ease of use

- Simple programming
- Signal strength indicator
- Battery life indicator
- Temperature Indication (Rain/ Freeze model)

Water Conservation Modes

Selectable water conservation modes delay resumption of irrigation by intelligently extending beyond mechanical reset time and can save you up to 30%* more water.

** Savings vary based on sensor setting, watering schedule and other conditions.*

Application

Two water conservation devices that can operate with almost all controllers. The sensor senses a rain event and prevents programmed irrigation from happening. Suitable for use in residential and commercial systems.

Key Benefits of Wireless Sensor

- Wireless models – saves labour, suits retro-fit projects
- Constant communication – assures that even after a controller power outage, the controller is continually updated with the sensor's status
- Signal Strength Indicator – Aids installation and troubleshooting
- Smart Bypass – Allows deactivation of the sensor temporarily – handy for watering special needs zones.
- Dry out Rate Adjustment – increases water saving ability by setting the ideal dry out time

Features

RS1000-I

- Enhanced communication and signal link integrity features.
- Fully adjustable shutoff points from 1/8" to 3/4" (3-19 mm) of accumulated rainfall.
- Compatible with nearly all controllers.
- 91m transmission range offers virtually limitless installation options.
- Easy, versatile one-piece mounting requires no special tools.
- Quick-Clip™ gutter bracket included.
- Visual sensor status and alert indicators verify consistent operation.
- Signal strength indicator ensures correct installation, communication link and signal integrity.
- Smart Bypass™ for easy system override—sensor switches back automatically on next activation.
- Slide/snap-on cover protects receiver from the elements.
- Five-year battery life (typical). Wireless.
- Three-year warranty.

RS500

- Fully adjustable shutoff points from 1/8" to 3/4" (3-19 mm) accumulated rainfall.
- Compatible with virtually any AC powered controllers.
- 7.6 m (25') cable (white, UV resistant,UL-rated) provides installation flexibility.
- Five-year warranty.

Operating Specifications

- Sensor type: industry-standard hygroscopic discs.
- Rain sensitivity: adjustable nominal 1/8" to 3/4" (3–19 mm).
- Operating temperature: -29°C to 49°C.
- Housing material: UV resistant engineered polymer.

Wireless only:

- Transmission range: Up to 91m line of sight
- Battery: Two CR2032 3 V cells, 5-year life (typical).

Electrical Specifications

- Receiver power: 24VAC/VDC, 100mA.
- Load rating: normally open or normally closed, 3A @ 24 VAC
- UL Listed.

Dimensions

- Sensor:
  38 mm H x 44 mm W x 95 mm D
- Receiver:
  38 mm H x 25 mm W x 76 mm D

Smart Approved WaterMark

Irritrol Pump Start Relay

Application

A low power pump start relay or Landscape lighting relay. With a lockable, vandal and weather-resistant case, the Irritrol® SR-1 can be mounted indoors or outdoors to provide reliable switching control for pumps or other electrical devices from the controller.

Features

- Electrical relays for both low voltage (24V AC) control switching and high voltage (240V AC) main power contacts
- Allows remote pump switching using 24V AC output from an irrigation controller's master valve/pump start circuit
- Opens and closes main power contacts for pumps (1.5kW at 240V AC 1 Phase)
- Highly efficient 0.1 Amp operating requirement
  Draws less holding power than most solenoid valves.
- Enclosed, weather-resistant case – indoor or outdoor mount

Electrical Specifications

- Contacts: Up to 1.5kW at 240V AC, 1 Phase (20A at 240V AC)
- Coil: 24V AC, 3VA (19V AC Min, 30V AC Max)
- Coil Draw: 0.1Amp

Dimensions

- 241 mm H x 159 mm W x 95 mm D

Ordering Information	
Code	**Description**
SR-1	Richdel Pump start relay, 1.5kW, 240V AC single phase

Profile Plug-In Transformer

- Heavy duty black plastic case
- Will operate up to two solenoid valves simultaneously
- For indoor use or within water-proof enclosure only
- Direct plug-in to standard three pin 240VAC outlet
- IP20 Rating
- Input: 240VAC, 50Hz
- Output: 24VAC, 50Hz, 900mA. Max 22VA
- Casing Dimensions: 56 mm wide, 58 mm high, 84 mm long (excludes two pins)
- 1.8 metre long lead

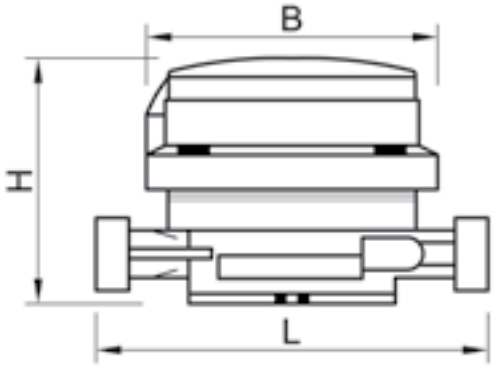
Ordering Information	
Code	**Description**
101PIT	Plug-In Transformer

Application

For use in agricultural, commercial turf and landscaping irrigation systems where water usage totals are required.

A factory fitted pulse output enables the water meter to be connected to a suitable irrigation controller to monitor flow rates and the controller to create flow alarms for valve and mainline failure.

Not suitable for Water Authority metering.



Features

- Conform to OIML R49 Class 2
- Cyclometer is hermetically sealed and can be rotated through 360
- The body is made of high quality brass with anti-corrosion baked powder external surface treatment
- Minimal moving parts – less maintenance
- Maximum working temperature: 30°C
- Factory supplied pulse output as standard
  1 pulse = 10 Litres
- Supplied with couplings, washers and internal filter
- 12 Month Replacement Warranty

Ordering Information

Application

For use with Toro TMC-424, Sentinel®, Irritrol MC-E and other compatible controllers where you need to monitor the system for flow. The Toro TFS series flow sensor is a cost effective water saving tool. The potted electronics are designed for valve box or buried installation, making them suitable for most residential, commercial and municipal irrigation application.

Features

- Simple impeller-based design
- Potted electronics designed for valve box or underground applications
- Sensor pre-installed in tee
- Removable sensor design for easy replacement without removal of tee
- Socket end tee
- Compatible with TMC-424, Sentinel® and Irritrol MC-E
- Compatible with Competitors controllers that require frequency output flow sensors (pulses per second proportional to flow velocity.
- Colour coded leads to reduce chance of incorrect connection at the controller. Red wire (+) and Black wire (-).
- Two year warranty

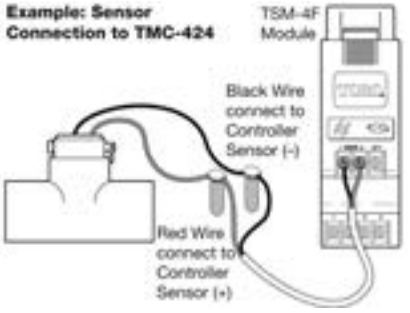
Specifications

- Output: 2-wire, unscaled pulse – pulse width 5 msec +/- 25%
- Frequency: 3.2 to 200 Hz
- Pressure Rating:
  - 15,20,25 mm - up to 1034 kPa
  - 40,50,80,100 mm – up to 690 kPa
- Temperature Rating: Up to 60°C
- Flow Range (Velocity):
  - 15,20,25 mm – 0.6-6 metres per second
  - 40,50,80,100 mm – 0.15–9 metres per second
- Accuracy:
  - 15,20,25 mm – +/- 3 to 5%
  - 40,50,80,100 mm – +/- 1%
- Linearity/repeatability:
  - 15,20,25 mm – ± 1.5%
  - 40,50,80,100 mm – ± 0.3%
- Slip x Slip Tee: Suits AS1477 PVC Pipe
  - 15,20,25 mm – Schedule 40 PVC
  - 40,50,80,100 m – Schedule 80 PVC
- Sensor Housing: Potted, PPS
- Impeller:

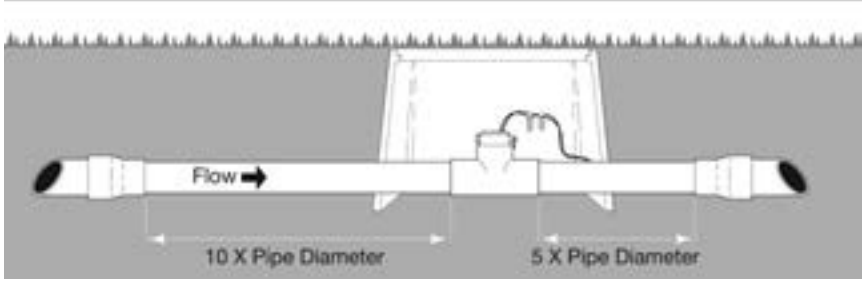
  - 15,20,25 mm – 300SST
  - 40,50,80,100 mm – Glass-filled nylon
- Shaft: Tungsten Carbide
- Bearing: UHMWPE
- Wires: 0.82 mm² (18AWG) direct burial irrigation wire (solid copper)

Installation

- Choose a location along the pipe where 10 pipe diameters upstream and 5 pipe diameters downstream of the sensor provide no flow disturbance, ie. pipework with no fittings or bends.



Model	Description	Suggested Flow Range (Lpm)
TFS-050	15 mm Flow Sensor	6 – 38
TFS-075	20 mm Flow Sensor	11 – 75
TFS-100	25 mm Flow Sensor	19 – 114
TFS-150	40 mm Flow Sensor	18 – 380
TFS-200	50 mm Flow Sensor	38 – 750
TFS-300	80 mm Flow Sensor	75 – 1135
TFS-400	100 mm Flow Sensor	150 - 1895



Controller Compatibility

- Toro TMC-424
- Toro Site-Pro®
- Toro Sentinel ™
- Irritrol MC-E
- Hunter® ACC
- WeatherTRAK® ET Pro™
- Calsense®
- Rain Bird Maxicom, MDC and Site Control

In-field Wiring

- Use shielded twisted pair cable suitable for direct burial. Use Toro Communication cable (code 591-008/HC). Maximum distance from sensor to controller is 600 metres.
- When connecting to a Toro controller, connect the red wire to "IN", "SIGNAL" or "(+)" terminal and the black wire to "GND", "SIGNAL", "(–)" or "COM" terminal.
- Ensure connections are made and kept waterproof. Use 3M DBY wire connectors.
- To avoid signal corruption, do not install wiring alongside high voltage cables.

Electric-Hydraulic Converters

Toro® Electric-Hydraulic Converters (EHC) provide the ability to bring together electrical outputs from sophisticated electric controllers and the pressure-based signals in hydraulic irrigation systems. EHC is ideal for retrofitting hydraulic systems, enabling Normally-Open (NO) or Normally-Closed (NC) hydraulic valves to be operated with a 24 VAC output irrigation system controller. For new installations, hydraulic control valves are ideal for applications in areas with increased lightning risk. What's more, you can add as many converters as you need – expansion is unlimited.

Features

- Supplied pre-plumbed with in-line filter on inlet supply line, pre-assembled on sturdy plastic mounting plate.
- Direct manual control activates any sprinkler from the converter
- Any single converter unit can be replaced easily without affecting other converters
- Easily added to for system expansion

Specifications

- Pressure: 280-1034 kPa
- Wiring: 0.82 mm^2 x 1.2 metre wire leads
  - Maximum distance from converter to valve: 1/4" OD – 300 metres
- Normally open: Valve elevation should not exceed 7.6 metres above, 21 metres below controller elevation
- Normally closed: Valve elevation should not exceed 0 metres above or 21 metres below controller elevation
- Suits Toro hydraulic tube ¼" x 1/8"

Electrical Specifications

- Input power:
  – 24VAC, 50 Hz
  – Holding – 0.30 amps
  – Inrush – 0.37 amps

Warranty

- Two years

Dimensions

- 4 station: 224 mm W x 115 mm H x 64 mm D
- 12 station: 224 mm W x 318 mm H x 64 mm D
- 16 station: 224 mm W x 420 mm H x 64 mm D

Application

Used to inject fertilisers, chemicals and water treatment additives through your irrigation system.

Features

- Extremely efficient and compact venturi design with no moving parts for minimised maintenance operation.
- Available in a wide range of sizes for varying flow rates and injection capacities.
- Powered by motive fluid so no external energy is required for most installations.
- Moulded from a chemically coupled polypropylene with 40% glass fill, with internal mixing vanes. Model 4091 constructed from PVDF (Kynar).

Benefits

- Substantial fertiliser savings can be made through irrigation application.
- Can also be used for injecting system cleaning chemicals through micro irrigation systems.
- Selection of flow meters, metering valves and foot strainers.
- Can be used to inject air into the system for aeration/oxidation purposes.

Injector Accessories

- **Flow Meters**
  Four variable area flow meters available:
  0.4-4 L/m, 0.8-8 L/m
  1.8-18 L/m, 5-38 L/m
  Pressure Rating:
  1000 kPa at 20˚C
  Polysulfone bodies and adaptors.
  Stainless Steel Grade 316 internal parts.
  Inlet/outlet size: 15 mm male NPT.
- **Tube Fittings - Tails**
  High density polyethylene.
  Two sizes, 15 mm male NPT x 6 mm barb, and 15 mm male NPT x 8 mm barb.
- **Strainers**
  Tube end polypropylene strainer.
  500 micron screen.

Flow Meters

Strainers

Tails

Standard Equipment Required

Model 584 (20 mm)
Suction inlet, built-in check valve
with Viton™ seat, PTFE ball, and Hastelloy-C™ spring. Suction inlet has 1/4" NPT thread and 6 mm hose tail. Use with 6 mm Clear Vinyl Tubing. Use 1014831 Flow Meter, 1014843 Metering Valve and 1014848 Strainer if required.

Model 1078 (25 mm)
Suction inlet includes check valve with Viton™ seat, PTFE ball and Hastelloy-C™ spring. Suction inlet has 15 mm NPT thread and 8 mm hose tail. Use with 8 mm Clear Vinyl Tubing. Use 1014831 or 1014832 Flow Meter, 1014842 Metering Valve and 1014844 Strainer or 1014841 Strainer assembly if required.

Model 1583-A (40 mm)
Suction inlet includes check valve with Viton™ seat, PTFE ball, and Hastelloy-C™ spring. Suction inlet has 15 mm NPT thread and 12.5 mm hose tail. Use with 12.5 mm Clear Vinyl Tubing. Use with 1014833 Flow Meter, 1014842 Metering Valve and 1014845 Strainer if required.

Model 2081-A (50 mm)
Suction inlet, 32 mm MBSP thread. Check Valve is not included with this model. Use with Check Valve, code 1012872 and Foot Valve code 1012871, and 25 mm Clear Vinyl Tubing.

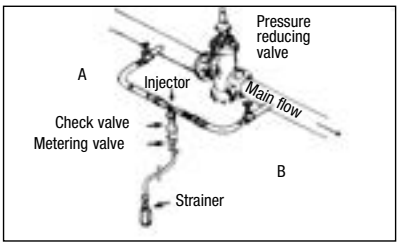
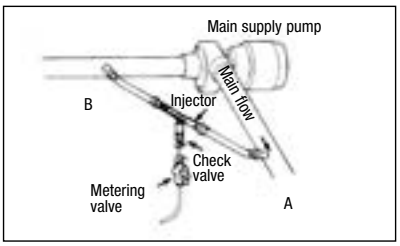
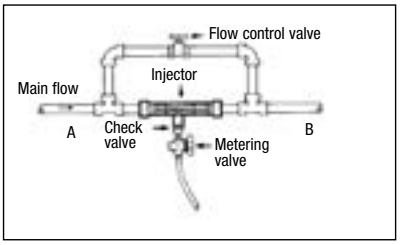
Typical Installations



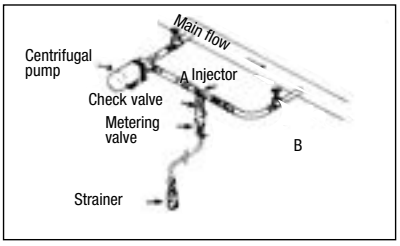
Example A. Injector installed around a point of restriction such as a regulator valve or gate valve which creates a pressure loss, thereby allowing the injector to produce a vacuum.



Example B. Injector installed across the differential pressure created by an existing booster or supply pump in the system. It is plumbed from the discharge side to the intake side of the pump.



Example C. Injector installed in main flow line with flow control valve on by-pass line.



Example D. Installed in conjunction with a centrifugal pump to boost pressure through the injector thereby creating a differential pressure and producing a vacuum for chemical induction downstream from the pump.

Mazzei™ Injectors Required Information

The following information and calculations are required to determine the correct size and model of injector for an irrigation system.

1. Total water flow of the irrigation system (in litres per minute).

   .....L/m

2. Rate of fertilizer/chemical injection required (in litres per hour).

   .....L/h

3. Pressure differential available in the system.

   i). Maximum available water pressure (System Pressure prior to the pressure reducing or flow control valve in installation examples A and C, or pressure at the discharge of the main supply pump in installation example B).

   .....kPa (a)

   ii). Minimum water pressure required to operate the system (Pressure after the pressure reducing or flow control valve in examples A and C, or pressure at the inlet of the main supply pump in example B).

   .....kPa (b)

   iii). Available pressure differential (a-b).

   .....kPa (c)

   iv). Percentage of pressure differential (c/a x 100).

   .....%

- If the pressure differential (as calculated) is 20% or greater, a bypass installation method can be used. (See examples A, B and C of typical installations).
- If there is not at least 20% pressure differential, the injector must be installed in series with a booster pump. (See example D of Typical Installations).

Injector Selection

The Injector Performance Chart on the following page lists the motive flow requirements and suction capacities of several models of Mazzei Injectors at various differential pressure conditions.

From the calculations, use the Performance Chart on the next page to select an injector model that can exceed the required injection (suction) rate. For the injector to operate, the motive flow (flow through the Injector) must not exceed the total flow of the irrigation system.

1. Locate the Injector Inlet Pressure (kPa) which most closely corresponds to your maximum available water pressure (3i above).
2. Locate the Outlet Pressure (kPa) which most closely corresponds to your pressure required to operate the system (3ii above).
3. Read across the table (next page) to locate the Injector Model with a Liquid Suction Rate which will exceed your injection requirements. (Use a metering valve to adjust to the desired injection rate).

Numbers in red brackets indicate the injector outlet pressure when suction stops (Zero Suction Point)

Application

Used in conjunction with sub-surface ROOTGUARD® Drip Tube and Aqua-Traxx® tape systems to aerate the root zone and improve harvest results.

Rainbow A-Series injectors are designed to be installed one injector per lateral line.

- In areas with long above-ground submains.
- In areas with submains that have elevation changes.

Features

- Available in one 1/2 " and two 3/4" male NPT models.
- Motive flow rates ranging from 3.41 to 52.11 Lpm.
- 10%+ increase in yields as compared to conventional drip *
- 50% increase in root mass - healthy and more vital plant *
- Less stress on plant as it is able to absorb water, air and soil nutrients simultaneously during the irrigation cycle.
- Ease of operation
- Efficient, compact venturi design with no moving parts
- Colour coded units for ease of identification
- Moulded from 40% glass filled polypropylene

** Increase in yields and root mass based on results obtained at a commercial farming operation and a study performed by CIT at CSU Fresno.*

The name says it all – EZ. Easy to install and easy to service, these Toro® valves are easy to choose. Perfect for residential applications, EZ-Flo Plus valves are available in a range of configurations providing the flexibility you need.

Features & Benefits

Jar-Top Design
No screws mean less time flushing out the system on start-up. Cleaning the diaphragm area is uncomplicated as it requires no tools. EZ-Flo Plus valves are simple to service – it's that easy.

PVC, Glass-Filled Polypropylene and Stainless Steel Construction
Provides longer life span and leak protection in nearly any environment.

Double-beaded, Chloramine and Ozone-Resistant Santoprene® Diaphragm
Ensures a consistent, leak-proof seal all the way up to 1000 kPa.

Optional Flow Control
Adjusts the flow of each zone on a system.

Specifications

Dimensions

- **Electric Models**

The search for a full-featured yet economically priced, residential and commercial valve is over thanks to Toro's 25 mm TPV Series valve offering. These full-featured, rugged, debris-resistant valves feature flow ranges from 1.0 to 150 Lpm, making them ideal for everything from drip to high-flow residential and light-commercial applications.

Features & Benefits

Tough Double-Beaded, Chloramine and Ozone-Resistant Santoprene® Diaphragm
Ensures a consistent, leak-proof seal all the way up to 1200 kPa.

Patented DBS (Debris Bypass System) Technology™
Metering system ensures proper functionality, even in tough environments.

Wide Range of Flows and Pressure
One valve for all site specific needs.

Robust Solenoid Design
Ensures reliable opening and closing.

Water Management Highlight

DBS Technology™ (Debris Bypass System)

DBS is a patented vibrating metering pin and diaphragm assembly that allows for small particles to pass through the valve without clogging.

Specifications

Dimensions
- 130 x 70 x 127 mm H x W x L

Operating Specifications
- Flow Range: 1.0-150 Lpm
- Operating Pressure: Electric; 70-1200 kPa
- Burst pressure safety rating: 3600 kPa
- Solenoid: 24 VAC (50 Hz) Standard (588403)
  - Inrush: 0.4 amps
  - Holding: 0.2 amps

Additional Features
- Operates in low-flow and landscape drip applications when a filter is installed upstream
- Manual Operation without the use of a controller—Internal and External Bleed
- Captured hex/Phillips screws
- Optional flow control allows precise zone adjustment and manual shutoff
- Encapsulated solenoid with captured hex plunger assembly
- Removable flow control handle to ensure vandal-resistance
- Self-aligning bonnet permits fast and easy servicing
- Large directional flow arrows

Options Available
- DCLS-P - Potted DC Latching Solenoid Assembly (max. pressure 820 kPa)

Warranty
- Five years

- **40 and 50 mm BSP (Female)**
- **Electric Models**

40 and 50 mm in-line globe/angle valves for light commercial applications. The P150 Series valves are the "value" work horses of plastic valves.

Features & Benefits

Heavy-duty glass-filled nylon (GFN) and stainless-steel construction

Globe/Angle configuration
Rated at 1000 kPa with flows from 80 to 568 Lpm

Filter-controlled Water
To resist contamination of solenoid port. Filter serviceable from top of valve.

Precise pressure control option with compact EZReg® dial-design
Serviceable under pressure – no need to shut down system

Pressure regulates in electric and manual modes
Serviceable under pressure

Operating Specifications

- Flow range: 80-568 Lpm
- Pressure range: 140-1000 kPa
- Solenoid: 50Hz (24 VAC)
- Inrush current: 0.4 amps
- Holding current: .2 amps

Additional Features

- Non-rising, manual flow control handle; adjustable to zero flow
- Manual internal bleed
- Rugged Santoprene, double beaded diaphragm
- Forward flow design for precise pressure regulation
- No external tubing for either electric or pressure regulating models
- Encapsulated solenoid with captured hex plunger assembly
- Lilac Recycled Water Tag available (code: RWSG-KIT)
- Positive O-ring seal on inlet plug
- Unique 3-way SS bonnet screws accept Phillips or hex driver tools
- Slow closing design reduces water hammer

Options Available

- EZR-30 - EZReg, 30-200 kPa Regulator Module
- EZR-100 - EZReg, 30-700 kPa Regulator Module
- DCLS-P - Potted DC Latching Solenoid Assembly (max. pressure 820 kPa)

Warranty

- Five years

P-150 Series Plastic Valve Model List

Model	Description
P150-23-56	Electric, Globe/Angle, 40 mm BSP Plastic Valve, 50 Hz Solenoid
P150-23-58	Electric, Globe/Angle, 50 mm BSP Plastic Valve, 50 Hz Solenoid

P-150 Series Friction Loss Data (kPa)

		Flow – Lpm														
Size (mm)	Configuration	80	100	120	140	160	180	200	250	300	350	400	450	500	550	568
40	Globe	22	21	21	17	18	20	31	46							
	Angle	21	21	22	15	13	13	19	26							
50	Globe					22	22	20	19	26	34	42	42	52	62	67
	Angle					18	17	14	13	16	24	24	26	32	37	39

Note: For optimum performance when designing a system, be sure to calculate total friction loss to ensure sufficient downstream pressure. For optimum regulation performance, size regulating valves toward the higher flow ranges. Flow rates are recommended not to exceed 35 kPa pressure loss.

- **Electric Models**
- **Pressure-regulating option**
- **Globe, Angle**

For proven reliability in the field, the Toro® P220 Series valves deliver. Constructed of heavy-duty, glass-filled nylon material, these valves are ready to consistently withstand pressures up to 1500 kPa.

Features & Benefits

Durable Glass-Filled Nylon
Ensures the P220 can operate at pressures up to 1500 kPa.

Precise Pressure Control Option
Compact EZReg® dial-design technology (field installed - no need to remove solenoid).

Internal And External Manual Bleed
Internal bleed keeps valve box dry and easy to use.

Schrader Valve Pre-Installed
Simple verification of downstream pressure.

Filter Screen on 50 mm and 80 mm Models
Allows for upstream filtration of control water to reduce risk of clogging inside the valve.

Water Management Highlight

Pressure Regulator
The EZReg® module can regulate with flows of only 20 Lpm with a 25mm valve and it only requires 70 kPa differential to operate. The pressure regulator can be easily and quickly installed—even under pressure, with no danger of water geysers.

Specifications

Dimensions

- 25 mm: 171 x 92 mm H x W
- 40 mm: 184 x 92 mm H x W
- 50 mm: 241 x 156 mm H x W
- 80 mm: 273 x 156 mm H x W

Operating Specifications

- Flow Range:
  - 25 mm: 20-140 Lpm
  - 40 mm: 120-400 Lpm
  - 50 mm: 300-650 Lpm
  - 80 mm: 600-1100 Lpm
- Operating Pressure:
  - Electric: 70-1500 kPa (25, 40 mm models)
  - Electric: 140-1500 kPa (50, 80 mm models)
- Minimum pressure differential (between inlet and outlet) for pressure regulation: 70 kPa
- Burst pressure safety rating: 5000 kPa
- Body styles:
  - Globe/Angle: 25, 40, 50, 80 mm female threads
- 588403 Solenoid: 24 VAC (50 Hz)
  - Inrush: 50 Hz: 0.40 amps
  - Holding: 50 Hz: 0.2 amps

Options Available

- EZR-30 - EZReg, 30-200 kPa Regulator Module
- EZR-100 - EZReg, 30-700 kPa Regulator Module
- DCLS-P - Potted DC Latching Solenoid Assembly (max. pressure 820 kPa)

Additional features

- Tough glass-filled nylon and stainless steel construction
- Internal and External bleed
- Standard, built-in Schrader-type valve for downstream pressure verification
- Flow control independent of solenoid
- Self-aligning bonnet to ensure correct installation
- Self-cleaning, stainless steel metering rod
- Low-flow capability down to 20 Lpm with EZReg

Warranty

- Five years

P-220 Series BSP Thread Model List

80 mm	Globe																		18	19	22	32	41	52	65
	Angle																		14	15	18	26	34	43	54

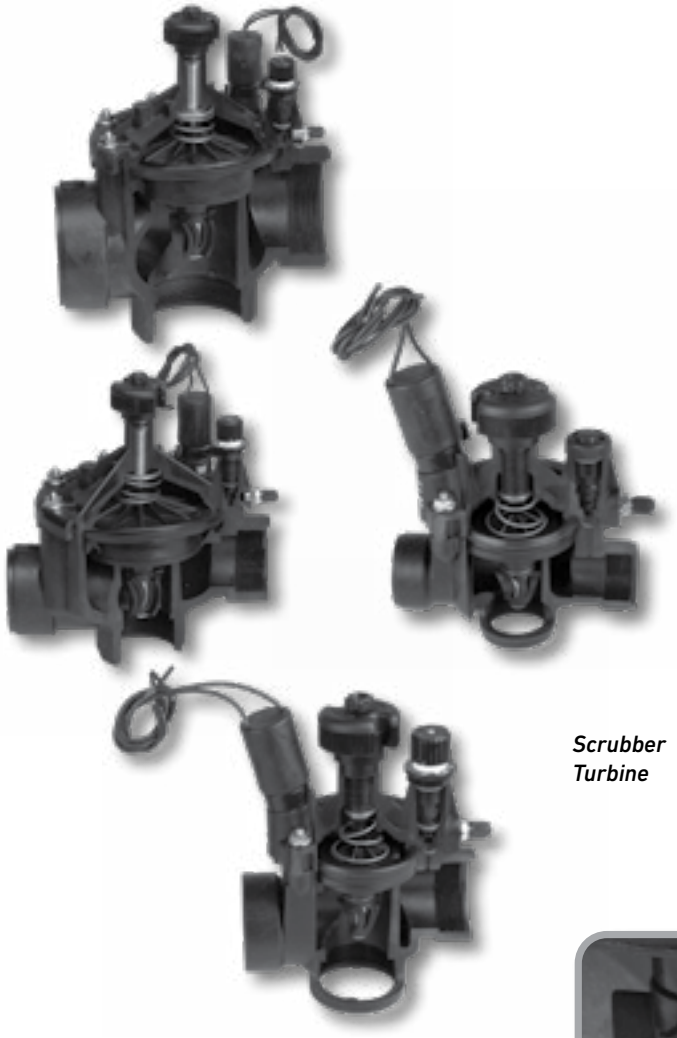
Shading indicates flow range.

Flow rates are recommended not to exceed 35 kPa loss.

For optimum regulation performance, size regulating valves toward the higher flow ranges.

- **25 mm, 40 mm, 50 mm, 80 mm BSP**
- **Electric Models**
- **Pressure-regulating**
- **Globe, Angle**

A true dirty water irrigation valve, able to handle chlorine and other chemicals found in reclaimed and other non-potable water systems. Constructed of heavy-duty, glass-filled nylon and EPDM rubber materials, these valves resist clogging and feature a patent-pending active cleansing technology (ACT™ System) to actively fight sand, algae and other particles from blocking the proper metering through the valve.



Features & Benefits

Durable Glass-Filled Nylon
Ensures the P220 can operate at pressures up to 1500 kPa (220 psi).

Active Cleansing Technology (ACT™)
Industry's first active scrubber valve cleans continuously whereas competitive valves only clean on opening and closing.

Fabric-reinforced EPDM Diaphragm and EPDM Seat
Designed to work in virtually all water applications.

Rugged Internal Plastic and Stainless Steel Parts
Scrubber fan, nut and metering system are designed with marine and aerospace plastics and metals which make them resistant to water treated with chlorines and ozones.

Precise Pressure Regulation Option
Compact EZReg® dial-design technology ensures precise downstream pressure for optimizing sprinkler head performance.

Completely Serviceable and Retrofittable
Diaphragm assembly may be replaced or retrofitted to previous models.

Pressure Regulator

The EZReg® module can regulate with flows of only 20 Lpm with a 25 mm valve and it only requires 70 kPa differential to operate. The pressure regulator can be easily and quickly installed—even under pressure, with no danger of water geysers.

Scrubber Turbine

Filter Surface

ACT™ System

Patent-pending Active Cleansing Technology – in which the turbine is constantly rotating to clean the metering/filtration area. This ensures that dirt, algae, chlorines, chloramines and water treated with ozone will not impede valve performance.

	Angle												19	26	35	43	53	63						
80 mm	Globe																15	18	21	28	37	46	56	67
	Angle																13	16	19	24	32	40	50	61

Flow rates are recommended not to exceed 35 kPa loss.

Note: For optimum performance when designing a system, be sure to calculate total friction loss to ensure sufficient downstream pressure. For optimum regulation performance, size regulating valves toward the higher flow ranges.

Solenoids

DCLS-P

- Potted DC latching solenoid for Toro valves used with EZ-Flo Plus, TPV, P150, P220 or P220S

588403

- Solenoid assembly for EZ-Flo Plus, TPV, P150, P220 or P220S
- Captive hex plunger assembly
- 0.5 m leads

SGS-12

- Spike Guard Solenoid compatible with EZ-Flo Plus, TPV, P150, P220 or P220S
- 24 Vac, 50/60 Hz
- Inrush 0.2A
- Holding: 0.1A
- 20,000 volts lightning rating

LWS

- Low Wattage Solenoid compatible with EZ-Flo Plus, TPV, P150, P220 or P220S
- 24 Vac, 50/60 Hz
- Inrush 0.2A
- Holding: 0.1A

EZReg™ Pressure-Regulation Options

EZR-30 and EZR-100

- Pressure-regulator module for use with P150, P220 or P220S
- Precise pressure control with dial design
- EZR-30: 35-200 kPa
- EZR-100: 35-690 kPa

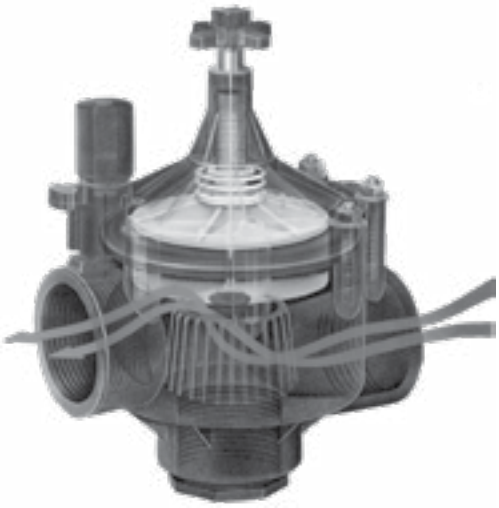
** Reduce maximum pressure rating to 820 kPa if DCLS-P coil fitted.*

When installing valves, please ensure the following:

- PTFE thread tape is used to seal all threaded fittings
- The valves are installed in position such that air can be evacuated from the bonnet, i.e. never install a valve upside down or on an angle as this could entrap air and possibly cause the valve to chatter and prevent valve closure
- In turf/landscape situations the valves are installed below ground in valve boxes for aesthetics and for easy valve adjustment and maintenance
- Loop 30 cm of extra cable inside valve box for wire contraction/expansion
- Use waterproof wire connectors
- Allow a valve box of sufficient size to provide access to all valves

Application

These heavy-duty globe/angle valves, designed primarily for commercial applications, offer superior performance and durability under the most demanding conditions. Tracing its origin back to the highly popular Century Series, the 100 Series (Century PLUS) delivers reliable performance with a host of enhanced features.



Century Plus Commercial Valve

Features

- Available in 25, 40, 50 and 80 mm BSP
- 1500 kPa rating (820 kPa if using DCLS-P)
- Manual internal and external bleed
- Flow control allows flow adjustment and manual shutoff
- Globe/angle configuration
- Glass-reinforced nylon body withstands high temperatures under pressure
- Rugged, double-beaded, nylon-reinforced Buna-N diaphragm
- Stainless steel metering system
- Captive plunger solenoid
- Positive O-ring seal on inlet plug
- Moulded-in studs allow positive bonnet attachment
- Brass flow control stem (50 and 80 mm models)
- Pressure Regulation (OmniReg® modular option). See OmniReg® page for performance data and specifications.
- 9–12 VDC Latching Solenoid option (DCLS-P) (max. pressure 820 kPa)

Electrical Specifications

- Solenoid: 24 VAC
- Inrush volt-amp: 24 VAC - 9.6 VA
- Inrush current: 0.4 amp
- Holding volt-amp: 24 VAC - 4.8 VA
- Holding current: 0.2 amp

Operating Specifications

- Flow range: 20-1100 Lpm
- Pressure range: 70-1500 kPa

80 mm	Globe																		18	24	32	41	52	65
	Angle																		14	19	26	34	43	54

Flow rates are recommended not to exceed 35 kPa loss.
Note: when designing a system, the industry standard maximum flow rate velocity through pipes and fittings is 2m/s. Please refer to relevant pipe velocity data.

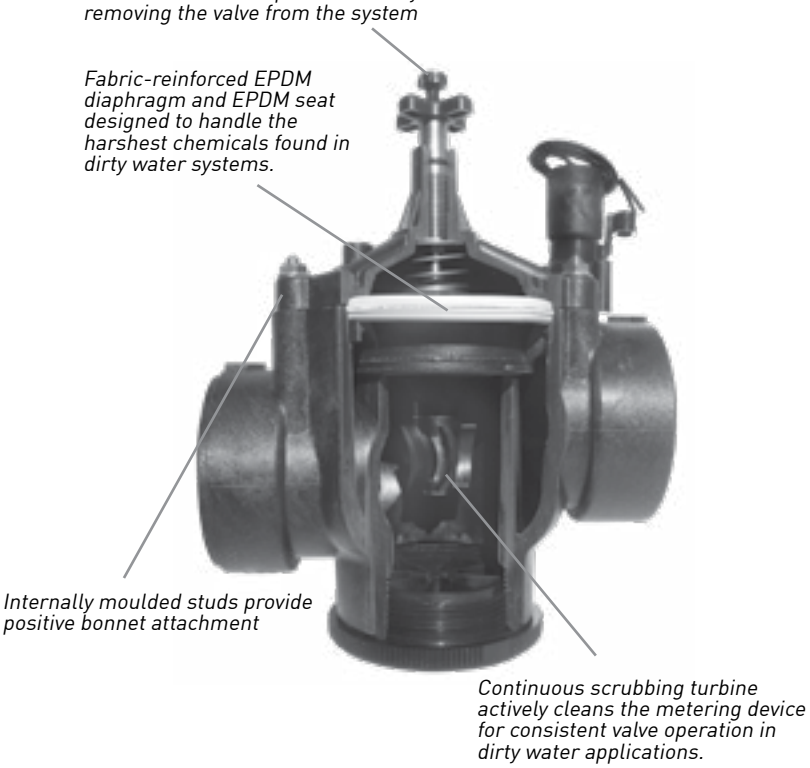
Century Plus Scrubber Valve

Constructed of heavy-duty, glass-reinforced nylon, stainless steel, brass and EPDM rubber materials, the Century Plus scrubber valves resist clogging and feature a patent-pending continuous scrubbing mechanism to actively fight dirt, algae and other particles from disrupting the functionality of the valve. The Century Plus scrubber valves are true dirty water irrigation valves, able to handle the harsh chemicals found in dirty water systems, such as chlorines, chloramines and water treated with ozones.

Features

- **Continuous Scrubbing Feature**
  Actively cleans the metering device for consistent valve operation
- **Tough, Glass-reinforced Nylon, Stainless Steel And Brass Construction**
  Withstands high temperatures and system surges under pressure for long-term reliability
- **Fabric-reinforced EPDM Diaphragm and EPDM Seat**
  Designed to operate in virtually all water applications
- **Rugged Internal Plastic and Stainless Steel Parts**
  Scrubber fan, nut and metering system chlorine and chemical resistant
- **Completely Serviceable and Retrofittable**
  Diaphragm assembly may be replaced or retrofitted to previous models
- **1500 kPa Pressure Rating**
  Prevents water hammer and system damage in high-pressure installations
- **Internal and External Bleed (Flush Mode)**
  Manual operation
- **Externally Removable Self-cleaning Metering System**
  Provides consistent performance in recycled-water applications
- **Accepts OmniReg® Modular Pressure Regulator**
  Ensures consistent performance

Next Generation Scrubber Valve



Added Features

- Flow control allows flow adjustment and manual shutoff
- EPDM valve seat seal
- Encapsulated injection-moulded solenoid with a captive hex plunger 24 VAC
- Positive O-ring seal on inlet plug prevents leaks without damaging seal threads
- Moulded-in and anchored studs allow positive bonnet attachment and removal
- Brass flow control stem on 50 and 80 mm models
- Easily serviced without removal from the system
- Five-year warranty

Operating Specifications

- Flow range: 20-1100 Lpm
- Pressure range: 140-1500 kPa

Electrical Specifications

- Solenoid: 24 VAC
- Inrush volt-amp: 24 VAC - 9.6 VA
- Inrush current: 0.4 amp
- Holding volt-amp: 24 VAC - 4.8 VA
- Holding current: 0.2 amp

Options Available

- OmniReg® 35-210 kPa regulator (OMR-30)
- OmniReg® 35-700 kPa regulator (OMR-100)
- DC latching solenoid (DCLS-P)
  Note: Maximum pressure for a valve that utilizes latching solenoid is 820 kPa.

  * Optional accessories are field-installable. Must specify separately if required.

Application

A straight-through flow path for minimum pressure loss and a host of standard and optional operating features make these heavy-duty electric globe valves ideal for a variety of challenging residential and light commercial applications.

Features

- Manual internal bleed
- Self-cleaning, 150-mesh, stainless steel filter screen on 25, 40 and 50 mm models
- In-line FBSP inlet and outlet
- Straight-through flow path provides low pressure loss
- Slow-closing design reduces likelihood of water hammer
- Flow control allows flow adjustment and manual shutoff (not available on 20 mm model)
- Compact, low-profile design
- Glass-reinforced nylon body and bonnet construction with stainless steel spring and hardware
- Rugged, nylon-reinforced EPDM diaphragm
- Captive plunger solenoid
- Three-way stainless steel bonnet screws accept Phillips, flat-blade and hex-driver tools

Operating Specifications

- Flow Range:
- 20 mm: 1 to 110 Lpm
- 25 mm: 1 to 180 Lpm
- 40 mm: 60 to 530 Lpm
- 50 mm: 120 to 680 Lpm
- Consult your irrigation designer before using any solenoid valve where flow velocities exceed 2 m/sec
- Pressure Range: 70 - 1034 kPa (maximum pressure drops to 820 kPa if using DCLS-P coil)

Electrical Specifications

- Solenoid: 24 VAC.
- Inrush volt-amp: 24 VAC–9.6 VA
- Inrush current: 0.4 amp
- Holding volt-amp: 24 VAC–4.8 VA
- Holding current: 0.2 amp

Independently tested at the CIT, California, USA

Application

These durable, heavy-duty commercial valves are designed to provide reliable, cost-effective performance under the most challenging conditions.

Features

- Double-beaded diaphragm provides leak proof seal. Santoprene construction.
- Buna-N valve seat seal
- High-strength ribbed bonnet and bottom inlet
- Manual internal and external bleeds
- Slow-closing design reduces water hammer
- Flow control allows flow adjustment and manual shutoff
- Heavy-duty, construction. Corrosion- and UV-resistant PVC with stainless steel spring and hardware
- Threaded inlet plug O-ring seal minimises leaks
- Captive plunger feature eliminates loose parts in solenoid
- Easily serviced without removal from the system
- Three-way stainless steel bonnet screws accept Phillips, flat-blade and hex-driver tools
- Pressure regulation: OmniReg® modular option

Operating Specifications

- Flow Range:
  40 mm: 80 to 300 Lpm
  50 mm: 225 to 450 Lpm
  Consult your irrigation designer before using any solenoid valve where flow velocities exceed 2 m/sec
- Pressure Range: 140–1034 kPa
- Maximum pressure of 820 kPa if using latching coil (DCLS-P)

Electrical Specifications

- Solenoid: 24 VAC
- Inrush volt-amp: 24 VAC–9.6 VA
- Inrush current: 0.4 amp
- Holding volt-amp: 24 VAC–4.8 VA
- Holding current: 0.2 amp

Accessories

- 9–12 VDC Latching Solenoid (DCLS-P) (max. pressure 820 kPa)
- OmniReg® Pressure Regulating Kit

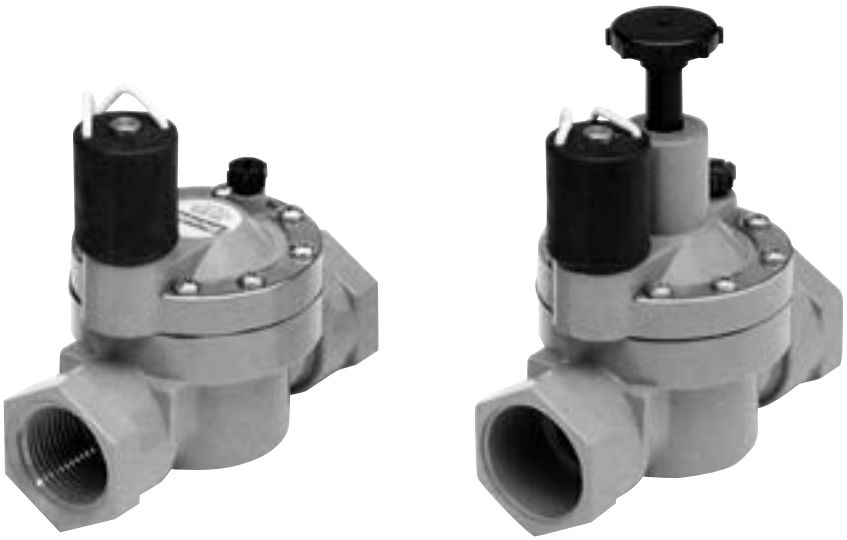
Application

Designed primarily for light commercial and residential use, these rugged electric valves have offered debris-tolerant operation and a high-flow, low-friction-loss design for optimum performance for nearly 40 years.



204/205 Series Valves give optimum performance at all times.

Features

- Improved bonnet design interlocks with the diaphragm and base for greater pressure tolerance
- Manual external bleed
- Debris-tolerant design for use in lightly contaminated dirty water
- High-flow, low-friction-loss design
- Optional flow control allows flow adjustment and manual shutoff
- Heavy-duty construction. Corrosion and UV-resistant PVC
- Rugged, nylon-reinforced Buna-N diaphragm
- Buna-N valve seat seal
- Encapsulated solenoid
- Available in female BSP
- Removable, tamper-resistant flow control handle
- Easily serviced without removal from the system

	Description							
Size	1	10	20	40	60	80	100	110
25 mm	32	25	20	15	14	23	30	34

Shading indicates flow range.

Application

Designed primarily for light commercial and residential use.

Features

- Manual internal bleed enables the valve to be opened without filling valve box with water
- Manual external bleed allows valve to be opened with less pressure and keeps valve clean from debris (flush mode)
- Floating' metering system makes the valve suitable for most bores and dirty water applications
- High flow, low friction-loss design
- Optional ergonomic flow control allows flow adjustment and manual shutoff
- Self-aligning bonnet for fast and easy servicing

Construction

- Heavy-duty, corrosion and UV resistant PVC and stainless steel construction
- Rugged, double-beaded EPDM diaphragm provides leak-proof seal for long-term performance
- Buna-N valve seat seal
- Encapsulated injection-moulded solenoid
- High-strength, self-aligning ribbed bonnet permits fast and easy servicing
- Available in female BSP configuration
- Removable, tamper-resistant flow control handle
- Captured hex/Phillips screws allow easy servicing without removal from bonnet
- Full stainless-steel, "floating" metering system for long-term performance
- Enhanced flush mode seal
- Captive plunger

2400MT-DCL-A	25 mm FBSP Screw Top Solenoid Valve with DC Latching Coil Installed

Application

Designed for light commercial and residential use, suited to contractor installation with enhanced performance and exceptional reliability.

Features & Performance

- Watermark approved
- Perforated (14 paths) debris resistant, Nitrile diaphragm assembly
- Large balanced diaphragm (no spring)
- Extremely slow closing (only causes pressure spike of 15%)
- Heavy duty, corrosion and UV resistant 30% glass filled nylon 66 construction
- Threaded bonnet permits fast and easy servicing
- Australian made and designed
- Manual internal bleed enables valve to be opened without filling valve box with water
- Encapsulated 25% glass filled nylon 66, solenoid assembly
- Ergonomic flow control handle allows precise flow adjustment
- Removable, "tamper resistant" flow control handle
- Easy to read "Flow" direction arrows for installation
- Serviceable with 22 mm metric socket/ spanner
- IV25FC-L valve with DC latching coil does not include flow control and internal manual bleed lever.

Operating Specifications

- Flow range: 1.3–120 Lpm
- Pressure range: 70–1250 kPa

Electrical Specifications

IV25FC

- Inrush Volt-amp: 24 VAC–6.0 VA
- Inrush Current: 0.25 amp
- Holding Volt-amp: 24 VAC–4.5 VA
- Holding Current: 0.18 amp

IV25FC-L

- 4-9 V DC Latching (max. pressure 820 kPa)
- Pulse Width: 20-40 ms

Application

For use in residential drip or spray/ jet irrigation systems. Rugged plastic construction with one-piece moulded "bonnet".

Features

- Available in three models, 13 mm Mini-Barb™, 19 mm Mini-Barb™, and 20 mm BSP Mini-Thread Solenoid Valve
- Working pressure range, 20-1250 kPa
- Internal filter to reduce risk of valve blockages
- For use with low density polyethylene tubing with barbed outlet providing positive sealing
- Simple operation for reliable performance
- Heavy duty engineering plastic construction
- Australian made

Electrical Specifications

- Solenoid: 24 volt AC, 50 Hz
- Inrush current: 0.32 amp
- Holding current: 0.26 amp

OmniReg®, a modular pressure regulating device, enabling the user to quickly and accurately set the exact downstream pressure required for any application. No more guessing. No more estimating.

Simply turn the dial to the desired pressure

Graduated dial features easy-to-read settings

Features

- Compatible with 100, 100S, 200B and Ultra Flow series valves
- Simple and easy to install
- Enables the user to quickly and accurately set the downstream pressure
- Easy-to-read, top mounted graduated dial with clearly marked settings for control of downstream pressure
- Operates with a downstream pressure regulation range up to 690 kPa and inlet pressure up to 1400 kPa, and requires only 4 L/m to operate
- Delivers accuracy of +/- 20 kPa
- Desired pressure can be set with water on or off
- Low profile design permits use in applications with limited space
- Manufactured of heavy-duty, corrosion-resistant glass filled nylon with stainless steel and brass hardware
- Maintains constant downstream pressure, regardless of widely varying inlet pressure

Operating Specifications

- Flow Range: 4-1100 Lpm
- Inlet Pressure Range: Up to 1400 kPa
- Pressure Regulation: 35-210 kPa (OMR-30), 35-690 kPa (OMR-100)
- Inlet pressure must be 70 kPa greater than the desired downstream pressure setting

Note:

Compatible with Century Series and Ultra-Flow valves manufactured after January 1996 and 200B Series valves after January 1998.

Performance You Can Count On

TORO DCLS-P Solenoid

- Potted DC Latching solenoid suits Richdel, 700 series and Century Plus series valves.
- Wetted parts constructed from 400 stainless steel and zytel
- Voltage: 6-14VDC
- Leads: 2, red and black, 45 cm long, 20AWG, PVC insulation
- Latch position: + Red and – Black
- Unlatch position: + Black and - Red

HVC-KIT

- Converts standard solenoid operated valve into hydraulic remotely operated valve. Only suits Toro P150, P220, Irritol Century, Century Plus and S-Series solenoid valves.
- Kit consists of a thread x ¼" barbed adaptor (to replace the coil) and 2 PVC plugs. Suits Toro ¼" control tubing.
- Cannot be used if EZReg or OmniReg® required or fitted.

Brass Ball Valves

Applications

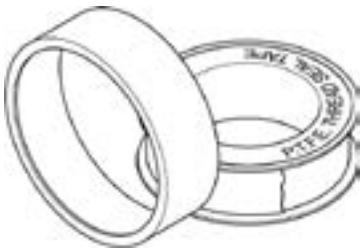
- Isolation of Valve hurdles
- End of line flushing

Features

- Pressure rating: 1035 kPa
- Construction Material:
  Nickel plated Brass body
  Stainless steel handle and nut
- FBSP threads, 15 mm to 100 mm
- Working Temperature: -10˚C to 120˚C

Brass Ball Valves

PVC Ball Valves



PTFE Tape

PVC Ball Valves

Applications

- Isolation of Valve hurdles
- End of line flushing

Features

- Pressure rating: 1035 kPa
- Construction Material:
  ABS handle, PVC body and ball
  EPDM seat seal and O-Ring
- FBSP threads, 15 mm to 100 mm
- Working Temperature: 5˚C to 50˚C

PTFE Tape

- 12 mm wide × 10 & 30 m rolls
- 0.1 mm thick, white tape
- Heavy duty 0.3 grams per cubic centimetre

Extra Heavy Duty Pink Plumbers Tape

- 12 mm wide × 10 m roll
- 0.1 mm thick, pink tape
- 1.0 gram per cubic centimetre

Applications

The Dual Check Valve provides protection to the potable water supply from contamination in low hazard applications like meter connections on domestic properties.

Features

- Protects against back pressure and back siphonage
- Suitable for low hazard applications
- Compact and lightweight
- Corrosion resistant
- Independently operating check valves
- Operating temperature range of 1°C to 60°C
- Suitable for vertical and horizontal installations
- Approved to AS 2845-1

Plastic Dual Check Valve

60	28	26
80	62	58
100	100	95
120	157	145

Applications

A heavy duty pressure regulating valve, for use in irrigation systems like residential and commercial turf/landscaping, drip and other low flow micro, centre pivot, nurseries and greenhouses.

Features

- Wide operating flow range 1.9 to 45 Lpm
- 7 models effectively regulate downstream pressures at the following settings: 69, 103, 138, 173, 208, 242 and 276 kPa all preset to exacting factory specifications
- High strength ABS construction – impact resistant
- 20 mm FBSP inlet and outlet
- Tamper-proof joints sonically welded to eliminate unauthorized changes to pressure settings

Specifications

- Body: chemical resistant ABS plastic
- Diaphragm: EPDM
- Spring: stainless steel
- Inlet: 20 mm (¾″) FBSP
- Outlet: 20 mm (¾″) FBSP
- Overall length: 102 mm
- Outside diameter: 47 mm
- Operating pressure range: 70-1104kPa

Quick Coupling Turf Valves

- One or two piece brass construction for a wide range of applications
- Weighted cover to prevent dirt entry
- Optional lockable yellow vinyl cover uses valve key handle as locking key
- Lilac colour rubber top to indicate reclaimed water use (sold seperately)
- Pressure rating: 1000 kPa

Quick Coupling Valve Keys

Provides instant sprinkler or hose swivel connection to quick coupling valve.

- Durable de-zinc resistant brass construction
- Double as security key on lock-up models (1013472 and 1013474 only)

Swivel Elbows

Provides swivel connection of hose to coupler to prevent hose kinking.

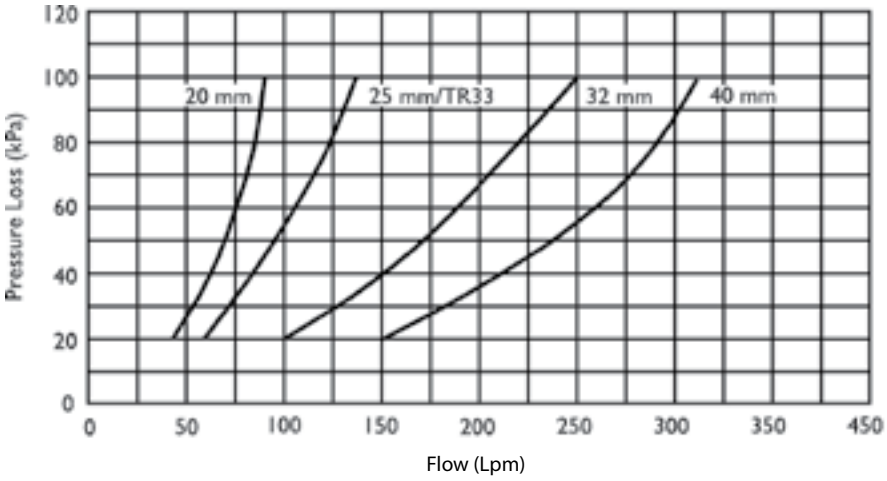
- Durable de-zinc resistant brass construction

Swivel Elbows are used to prevent hose kinking when connecting a hose to a coupler

The range of Quick Coupling Turf Valves is extensive with models to suit almost every need

Valve Keys are used to open Quick Coupling Valves

Quick Coupling Valves – Flow vs Pressure



(Note: 32 mm model shown, but no longer available)

1012712	25 mm MBSP TR Plastic Quick Coupling Valve
1012713	Plastic Key to suit 1012711, 1012712, with 20 mm MBSP outlet

Applications

For use with F600 Sand Media Tanks. The valves provide three way operation for backwashing.

Features

- Unique diaphragm actuated plug assembly for smooth operation
- No rolling diaphragm
- Closes supply port before backflush port opens
- No supply water to waste
- High flow capacity

Pressure Loss, Kv Factor for Bermad 350 series Backwash Valves (Angle Flow)

Code	Valve	Filtering Mode	Backwash Mode
BFLV22P	2x2-350-P	K_v = 52	K_v = 48
BFLV33P	3x3-350-P	K_v = 110	K_v = 100
BFLV44P	4x4-350-P	K_v = 225	K_v = 205

Pressure Loss Equation : $P = (Q / K_v)^2$ where P = pressure loss in bar, Q = flow in m^3/hr, $K_v = m^3/hr$ at pressure loss of 1 Bar

** WaterSmart® Feature*

- **2-, 4-, 6- and 8-Stations**
- **Battery-powered**
- **Waterproof**

Looking for a rugged waterproof controller ideal for remote or isolated installations? Toro's DDCWP Series controller provides all that and more. Using the potted DC latching solenoid, the DDCWP is battery-operated using two 9V batteries.

Features & Benefits

Fully Waterproof and Submersible
Submersible up to 1,9 m per IP-68 standards, allowing contractors to mount up to an 8-station controller in a valve box.

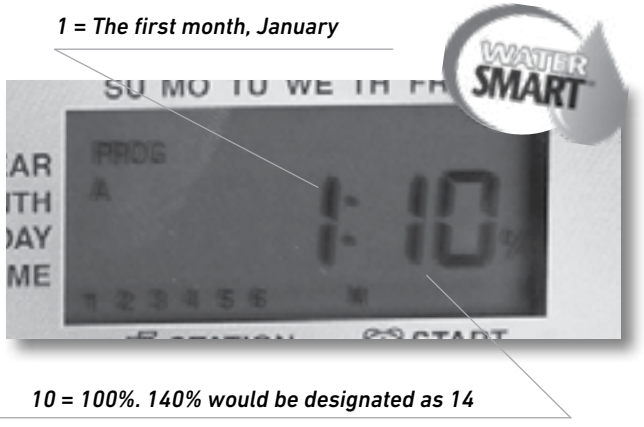
Operates DC Latching Solenoids
Controller is compatible with most manufacturers' DC Latching solenoids.

Exclusive "Digital Dial" Technology
Simple programming functions.

Unique Power Feature
Verifies sufficient voltage level for turning stations off before turning any stations on.

Monthly Watering Schedule
Monthly preset option – ideal for automatic runtime adjustments.

Water Management Highlight



Monthly % Adjust

DDCWP adjusts annual irrigation run time during initial controller set up. Options include from 0-200% and January to December scheduling. With easy adjusting for seasonal watering, water savings is enhanced for all-around intelligent programming.

Specifications

Dimensions

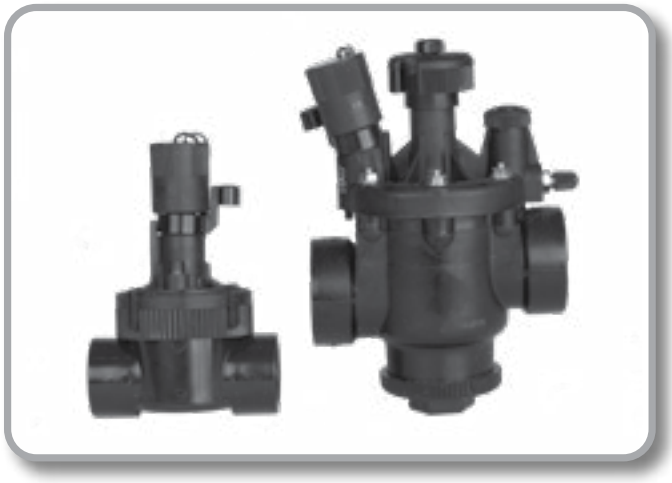
- 146 mm (W) x 127 mm (H) x 50 mm (D)
- Weight: 660,5 g without 9V batteries (batteries not included)

Operating Specifications and Additional Features

- Operating temperature: 0°C to 60°C
- Operates using two x 9V alkaline batteries (not supplied)
- Operates one latching solenoid per station and one latching solenoid-equipped master valve
- Controller is compatible with all Toro valves accepting latching solenoids (model DCLS-P or equivalent) and competitive valve models/latching solenoids
- Accepts Toro TRS Wired RainSensor™, Wired Rain/Freeze and other normally-closed sensors
- Low-battery indicator visible on LCD screen
- Three independent programs and three start times per program
- Three scheduling choices by program
- Seven-day calendar
- 1 to 7-day interval
- Odd/even with 365-day calendar and 31st day exclusion
- Station run times from one minute to four hours in one-minute increments
- Seasonal adjust by month from 0-200% in 10% increments
- Manual operation by station or program
- Self-diagnostic circuit breaker skips shorted stations
- Up to five-year program retention with on-board coin battery saves time of day and all programming features

Warranty

- Two years



EZ-Flo® Plus and P-220 valves shown with the DCLS-P Latching solenoid which provide cost and labor savings

Battery Cap

Easy installation of two 9V batteries with the simple screw on/off lid. The battery cap provides a dependable leak-proof seal allowing submersion up to 1.9 m per IP-68

DDCWP Series Model List

Model	Description
DDCWP-2-9V	2-station
DDCWP-4-9V	4-station
DDCWP-6-9V	6-station
DDCWP-8-9V	8-station

Wire Run Lengths for DDCWP

With battery voltage at 9 VDC, maximum recommended wire runs for an 8-station DDCWP are:

Multi-strand Wire	Distance
	Meters
1.0 mm² (18 AWG)	60 m
1.5 mm² (16 AWG)	93 m
2.5 mm² (14 AWG)	150 m
4.0 mm² (12 AWG)	250 m

DDC™ Series Residential Controller

- **4, 6 and 8 Station**
- **Digital Dial Technology**
- **Indoor and Outdoor**

The DDC features an exclusive, patented virtual dial interface that guides a user through simple programming functions. Although compact in size, several large features are packed into the DDC – making it extremely affordable for any residential application.

Features & Benefits

Toro exclusive "digital dial" technology
Simulates the simplicity of a mechanical dial

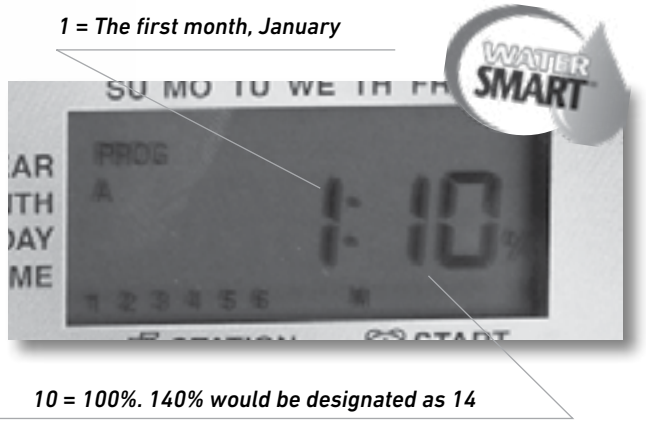
3 independent programs
Easily identified within "digital dial" interface

Water Budget: 0 to 200% in 10% increments
Monthly preset option — ideal for system start-up or shutdown in advance

Self-diagnostic circuit breaker
Identifies irrigation faults

Multi-lingual Display
User selectable multi-language overlays

Water Management Highlight



Monthly Season Adjust:
Irrigation run times can be set and then pre-adjusted for entire year from 0-200% in 10% increments by month. With easy adjusting for seasonal watering, water savings is enhanced for all around intelligent programming.

Specifications

Operating Specifications and Features

- Indoor:
  - Weight without 9-volt battery: 280 g
  - Dimensions:
    127 mm (H) x 146 mm (W) x 40 mm (D)
  - 500mA class 2 transformer
- Outdoor:
  - Weight without 9-volt battery:
    1.14 kg
  - Dimensions:
    220 mm (H) x 178 mm (W) x 89 mm (D)
- Input power:
  - 240 VAC, 50 Hz (Plug-in transformer, CE Mark)
  - 0.50 amps (60 W) maximum
- Station Output Power:
  - 24 VAC
  - 0.25 amps (6 VA) per station maximum
  - 0.25 amps (6 VA) pump start/master valve
  - 0.50 amps (12 VA) total load

Additional features

- Large LCD display
- 3 Start Times per Program
- Key locking outdoor cabinet provides vandal resistance
- 1 to 240 minute run times with delay between stations
- Multiple watering days options:
  - 7 day calendar
  - 14 day interval
- Odd/Even day watering, with 31st day exclusion
- Manual programs start for programs stored in controller memory
- Built-in Rain delay with sensor terminal hookups
- Arm-Chair programming with 9-volt battery power source
- Programmable Master Valve
- Convenient program review feature
- Program retention with on board coin battery
- Default program if loss of power occurs
- Quick reference card for programming assistance
- Accepts Toro TWRS or TWRFS wireless rain/freeze sensor
- Self diagnostic circuit breaker
- 365 day calendar

Warranty

- One year

Tempus™ DC Series Controller

- **Bluetooth Connectivity**
- **1, 2, 4, 6 Stations**
- **Waterproof**
- **Battery-powered**

Take watering to the next level with Toro's innovative NEW Tempus™ DC Battery-Operated Controller. Ideal to manage irrigation in areas without electricity and enabled with Bluetooth® technology to provide you full control of your watering from your smartphone or device.

Features & Benefits

Bluetooth® Connectivity
Allows instant control from your smartphone device without having to access the valve box.

Simple Intuitive Programming via App
Simple, user-friendly programming using the new Toro App.

2 Display Versions To Choose from - WITH and WITHOUT LCD Screen
Available in versions with and without LCD display to suit your controlling and programming needs..

Waterproof
Housed in a durable IP68 rate plastic case to withstand water and extreme weather conditions.

Battery-Operated
Ideal for use in areas without mains power available.

Water Budget
Enables the run time to be adjusted from 0% to 200% in 10% increments.

Rain Sensor-Ready
Has set input for rain sensor to make water conservation easy and simple.

With LCD

No LCD

Specifications

Dimensions

- Size:
  - TEMPUS™ DC without LDC: 12 cm x 11,5 cm x 5 cm (W x H x D)
  - TEMPUS™ DC with LCD: 10,5 cm x 15,5 cm x 5 cm (W x H x D)
- Weight:
  - TEMPUS™ DC without LDC: 250 gr.
  - TEMPUS™ DC with LCD: 260 gr.

Operating Specifications & Additional Features

- 1, 2, 4, 6 stations.
- 4 independent programs
- 3 start times per program.
- Non-volatile memory retains programming in the event of power outage or battery replacement.
- Bracket for optional on-valve installation.
- Watering time from 1 minute to 8 hours in 1 minute increments.
- Flexible irrigation programming:
  - Daily
  - Weekly
  - Odd/Even Day
  - 1 to 31-day intervals.
- Automatic, semi-automatic and manual start.
- Programmable rain delay from 1 day up to 15 days.

Electrical Specifications

- Battery-operated (4 x 1.5V battery for LCD Model; 9V battery for NO LCD Model).
- Operating temperature of -10˚ C to 50˚ C.
- Output 9V DC latching.
- Compatible with Toro DCLS-P DC latching solenoid (max pressure 6 bar) and works with most competitor coils.
- Maximum distance of 300 m between controller and DC latching solenoid (cable section 0.75mm^2).
- IP68-rated, 100% waterproof case.

Warranty

2 years

TEMPUS™ DC SERIES MODEL LIST

MODEL	DESCRIPTION
TEMP-1-DC	Battery-powered controller, 1 station with bluetooth, no LCD
TEMP-2-DC	Battery-powered controller, 2 station with bluetooth, no LCD
TEMP-4-DC	Battery-powered controller, 4 station with bluetooth, no LCD
TEMP-6-DC	Battery-powered controller, 6 station with bluetooth, no LCD
TEMP-1-DC-L	Battery-powered controller, 1 station with bluetooth and LCD
TEMP-2-DC-L	Battery-powered controller, 2 station with bluetooth and LCD

TEMP-6-DC-L	Battery-powered controller, 6 station with bluetooth and LCD

- **4- to 24-Stations**
- **Outdoor**
- **Modular**
- **Flow-Sensing**

The TMC-424E Series takes modularity to a whole new level. Toro's advanced modular technology combines sophisticated features with simple operation to provide a customizable controller.

Expandable with 4 and 8 station modules :

Normal Surge *High Surge* *Flow monitoring*

Features & Benefits

Station Count Modularity
Station count modularity from 4 to 24 stations using 4- or 8-station modules for flexibility.

Two Levels of Surge Protection
Standard or High Surge modules provide options to meet regional lightning protection needs.

Flow-Sensing
Monitor and react to system leaks or breaks.

Up to 4 Master Valve or Pump Start Connections
Options for connection of up to four Master Valve or Pump Start Relays utilizing TSM-4F or TSM-8F modules.

Run Times In Minutes or Seconds
Ability to set run times for less than a minute provides efficient watering for planter box, misting cycle, nursery, or syringe cycle needs.

Armchair Programming
Removable Timing Mechanism can be powered by 9V battery allowing for easy and comfortable programming.

Water Management Highlight

Flow-Sensing for Greater Water Savings

With flow-sensing capability that monitors up to three independent flow sensors, the controller consistently monitors for problems and takes action as needed to isolate breaks or system issues.

Specifications

Dimensions

- 273 mm (W) x 260 mm (H) x 117 mm (D)
- Weight: 3.2 kg

Electrical Specifications

- Input power:
  - 240 VAC, 50 Hz
  - 30 VA
  - UL, CUL-listed
- Station output power:
  - 24 VAC
  - 0.50 amps (12 VA) per station maximum
  - 0.50 amps (12 VA) pump/master valve
  - 1.20 amps total load
- Surge Protection:
  - Standard: 6.0 KV common mode; 600 V normal mode
  - High Surge: 6.0 KV common mode; 6.0 KV normal mode

Specifications and Features

- Four programs with a total of 16 start times that can be allocated between the programs
- Three Scheduling choices
  - Seven-day calendar
  - 1- to 31-day interval with day exclusion
  - Odd/even days with day exclusion
- Station run times in minutes or seconds
- Programmable well recovery/station delay from 1 to 60 seconds or 1 to 60 minutes (8 hrs is the maximum run time)
- Pump start/master valve settable by program and station
- Operate up to three programs simultaneously
- Rain delay from one to 14 days and water budgeting from 0-200% in 10% increments
- Hot-swappable station modules
- Review feature quickly recaps all program information
- Short detection for faster troubleshooting
- Valve Test mode for quick system checks
- Multi-language capability (English, Spanish, French, Italian, German and Portuguese)
- Program erase
- 12/24-hour real-time clock
- Non-volatile memory

Optional Accessories

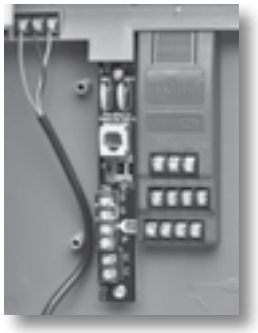
- TRS: Wired RainSensor
- TWRS-1/TWRFS-1: Wireless RainSensor or Wireless Rain/Freeze Sensor
- TFS: Flow Sensor

Warranty

- Five years

Up to 4 Master Valve/PS Connections

One on controller terminal block and 3 flow-sensing modules. Any station can be assigned to any MV. Options for a single station to activate both a controller and flow module MV/PS connection (e.g., MV and Booster Pump activation).



TMC-424E Series 220 VAC Model List	
Model	**Description**
TMC-424E-ODC-50H*	Modular, Outdoor, 240VAC/50Hz
Base models include TSM-4 (4-station Module)	
Station Modules - ***Base model includes 4 stations***	
Model	**Description**
TSM-4	4-station Expansion Module
TSM-4H	4-station Expansion Module, High-Surge
TSM-4F	4-station Expansion Module, Flow-Sensing
TSM-8	8-station Expansion Module
TSM-8H	8-station Expansion Module, High-Surge
TSM-8F	8-station Expansion Module, Flow-Sensing

- **12, 15, 18, 24, 36, 48 Stations**
- **Wall or Pedestal Mount**

With the highest surge protection in its price range, the Toro® Custom Command offers durability and performance in one rugged commercial-grade controller.

Features & Benefits

Versatile Runtimes
Run times from one minute to ten hours in one-minute increments meet the needs of standard or drip applications.

Independent Programs
Four fully independent programs and 16 start times that can run concurrently with start time overlap protection within each program.

High Surge Protection
Highest surge protection in its price range for lightning-prone areas.

Water Management Highlight

Wired RainSensor or Wireless Rain/Freeze sensors will stop irrigation when it rains or when temperature drops below a user-defined point.

Specifications

Dimensions
- Plastic 12-24 Stations – 292 mm (W) x 149 mm (H) x 219 mm (D)
- Weight: 6.8 kg
- Metal 36-48 Stations – 273 mm (W) x 399 mm (H) x 146 mm (D)
- Weight: 8.1 kg

Electrical Specifications
- Input Power
  - 240 VAC, 50 Hz
  - 50VA
- UL, CUL Listed
- Station output power
  - 24 VAC (60 Hz)
  - 0,50 amps (12 VA) per station maximum
  - 0,50 amps (12 VA) pump/master valve
  - 1,25 amps (30 VA) total load

Operating Specifications
- Three selectable watering schedules:
  - Seven-day calendar
  - Odd/even days with day exclusion
  - 31-day interval
- 365-day calendar with automatic compensation for leap year
- Rain delay from one to seven days
- Program stacking for simultaneous operation of one to four programs
- Season % Adjust by month
- Individual station manual start and manual start by program
- Independent program erase for each program
- Master valve/pump start operation selectable by program
- Available in 12, 15, 18, 24, 36 and 48 station models
- Non-volatile memory retains programmed information in event of power failure
- Self-diagnostic circuit breaker that identifies and overrides faulty stations

Optional Accessories
- TRS: Wired RainSensor
- TWRS-1/TWRFS-1: Wireless RainSensor or Rain/Freeze Sensor

Warranty
- Five years

High-Surge Protection

With the highest surge protection in its competitive price range, a self-diagnostic circuit breaker and a five-year warranty, this controller withstands the test of time.

CC-M36-50HC	36-station
CC-M48-50HC	48-station

- **100-200 Stations**
- **1, 2 or 4-Station Decoders**

For an energy efficient, highly cost-effective way to irrigate large commercial installations, you'll want the TDC Series from Toro®. Using a two-wire path to communicate to buried decoders, the TDC system eliminates high costs associated with traditional valve wiring, trenching and trouble-shooting.

Features & Benefits

ISP Decoders
Industry leading surge protections up to 20 KV means less grounding in the field than competitive products.

Advanced Diagnostics
The TDC provides true two-way communication with each decoder in the field, thus providing communication verification to decoders in the field, as well as shorted or open solenoid conditions, making troubleshooting a breeze.

Low-Power Operating Costs
The TDC Decoders operate DC Latching Solenoids which utilize no power when valves are in operation.

Water Budget
Water budget by controller, by program and by station (Season Adjust) 0 to 250% in 1% increments.

Simple, Intuitive Programming
Installation and future servicing are quick and simple thanks to the large LCD display and the industry's most intuitive interface.

Key-locking, Front-Entry, Metal Cabinet
TDC offers a key-locking cabinet in both the outdoor and indoor model controllers. Constructed from heavy-duty powder-coated metal, this is a wall-mount cabinet that provides superior weather and vandalism resistance.

Modular Design
The base model of the TDC offers 100 stations with capability to easily add another module allowing up to 200-station control. This is ideal for phased projects. Independently fused wire paths (4 per 100 stations = 8 for 200 stations) provide protection to the controller in the event of a short in field wiring.

Specifications

Dimensions
- Cabinet: 356 mm (W) x 330 mm (H) x 152 mm (D)

Electrical Specifications
- Input Power: 240 VAC (50 Hz)
- Station Output Power: Up to 38 VAC maximum; 3 amps maximum output
- Wiring-two wire path: Jacketed, twisted pair 2.1 mm^2 to 4200 m
- Wiring-decoder to solenoid: Standard pair 1.0 mm^2 to 100 m, 1.5 mm^2 to 150 m

Operating Specifications
- 20 KV surge protection with proper grounding of 10 Ohms or less at the controller
- 10 independent irrigation programs
- Six start times per program
- Day of the week programming, odd/even, interval (1-31 days)
- 0-255% adjust by controller, by program, by station
- Day Exclusion (remove a day from standard program)
- Programmable master valve and pump start, by station
- Manual start of each station or entire program
- Non-volatile memory retains programming
- Self-diagnostics circuit breaker skips shorted/open stations
- Two-way confirmation of decoder activation
- Activate up to 20 solenoids at up to 4.2 km away
- Programmable rain delay up to 31 days
- Water window calculator
- 10-digit alpha-numeric zone identification
- RainSensor-compatible
- Upgradeable to Sentinel® Central Control
- Utilizes DC latching solenoids for valve control

Optional Accessories

DEG-SG-LINE	Decoder, Line Surge Protector
118-2749SK	100 Station Expansion / Replacement Board (new style blue daughterboard)
TRS	Wired RainSensor
TWRS-1	Wireless RainSensor

Warranty
- Five years

TDC Series Model List

Metal Wall Mount

Model	Description
CDEC-SA-100	Turf Stand-Alone Decoder Controller, D.C. latching, 100 station output
CDEC-SA-200	Turf Stand-Alone Decoder Controller, D.C. latching, 200 station output

Two-Wire Station Decoders

Model	Description
CDEC-ISP-1	1 station decoder w/ integrated surge protection
CDEC-ISP-2	2 station decoder w/ integrated surge protection
CDEC-ISP-4	4 station decoder w/ integrated surge protection

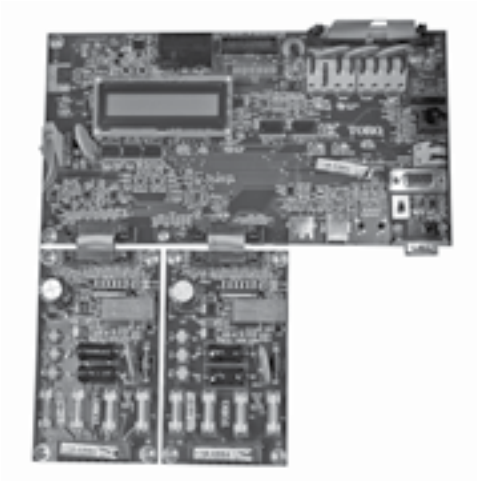
Cable

Model	Description
MC0221500-T	2 x 2.1 mm^2 communication cable 500 m
MC0415500-D	4 x 1.5 mm^2 decoder to solenoid cable x 500 m (1-2 zone decoder)
MC0815500-D	8 x 1.5 mm^2 decoder to solenoid cable x 500 m (4 zone decoder)

Decoder Control
Choose from 1, 2 or 4 station decoders. Each decoder has the ability to drive 2 DCLS-P Latching Solenoids.

Low Power Operating Costs
The TDC Decoders operate DC Latching Solenoids which utilise signficantly less power than AC solenoids.

Modular Design
The TDC has a base of 100 stations and can be upgraded to 200 stations without purchasing a new controller.

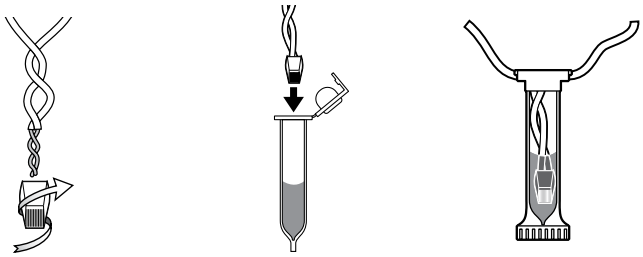


Advanced Diagnostics
The TDC provides true two way communication with each decoder in the field, thus providing communication verification to decoders in the field, as well as shorted or open solenoid conditions, making troubleshooting a breeze.

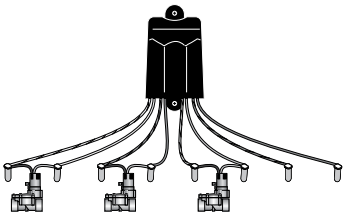
Accessories
Wired or wireless rain or rain/freeze sensors are available to shutdown irrigation if user defined conditions occur in the field.

Important Installation Practices

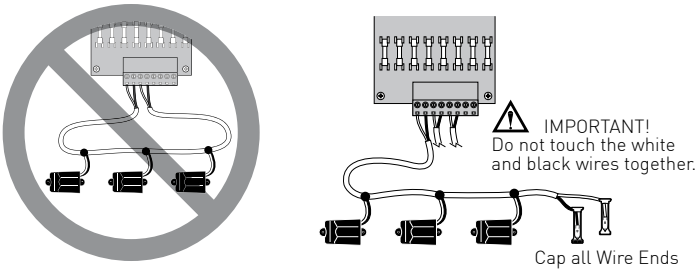
Waterproof all communication cable splices using DBR/Y by 3m®.



All decoder to solenoid wires must be connected with the correct polarity to properly operate the solenoid. The decoder's SOLID ouput wire is connected to the RED solenoid wire. The decoder's output wire with BLACK STRIPE is connected to the BLACK solenoid wire.

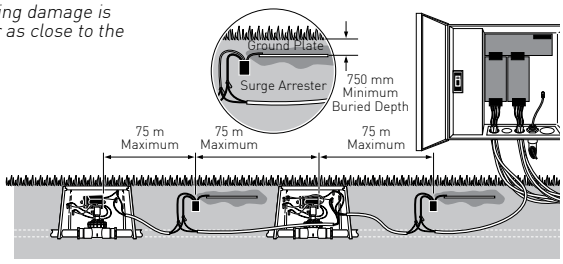


Do not loop or connect the decoder cable back to the controller board circuit. All wire path from the daughter board will end at a decoder. Communication cables not being used must be capped and water proofed.



Two Wire Decoder Systems must be properly grounded in order to protect against lightning surges. The communication cable must be grounded no further than 150 m from any decoder. In high lightning areas, Toro recommends that a decoder be no more than 75 m from a surge device/ ground plate, or total of 150 m between ground plates. The surge device must be a Toro DEC-SG-LINE and must be grounded to a copper rod 2.4 m long and plate that is at least 10.16 cm x 240 cm x 1.6 mm, as per diagram below.

Note: A best practice on installation to avoid surge/lightning damage is to locate the decoder as close to the valve(s) as possible.



** High lightning set up. Double distances for standard install.*

** WaterSmart® Feature*

- **Soil Moisture**
- **Salinity**
- **Temperature**
- **Web-based Interface**

The Toro® Turf Guard Wireless Soil Monitoring system helps you improve your turf, soil and water efficiency. The system is a revolutionary technology that lets you know what's going on beneath the surface of your turf, so you can make timely, more-informed adjustments.

Features & Benefits

Monitor Moisture Levels And Adjust Irrigation

Reduce water usage and improve playability without risking turf quality. Promote root growth by avoiding over watering. Detect dry areas before it impacts the turf's health.

Track Salt Build-up And Schedule Flushing

Take the guesswork out of monitoring and managing salinity levels. Get positive confirmation that your flushing reduced soil salts. Know when and how much water to flush with.

Monitor Daily Soil Temperatures

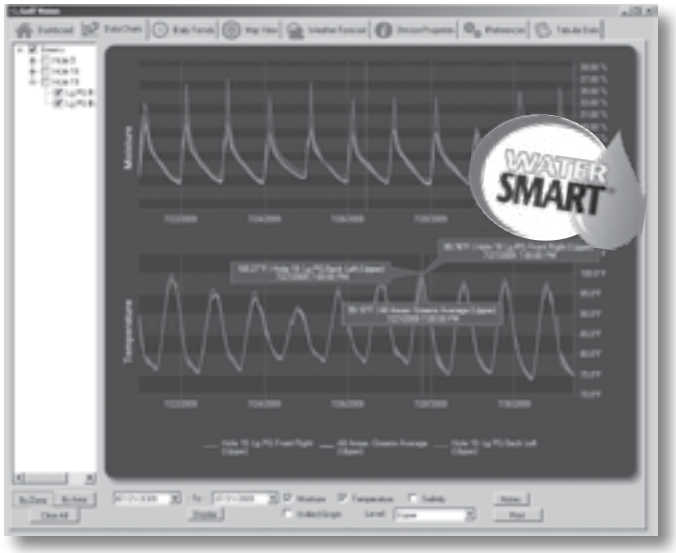
Predict peak soil temperatures early in the day to start remediation activities before an emergency. Schedule fungicide applications and pesticides for optimal effectiveness. Understand evaporation rates and syringing needs.

Wireless Network

No wires between the repeaters and the sensors, or the sensor and the probes means that sensors can be installed anywhere on your turf without disrupting play. Install sensors in other areas without having to trench or pull wires.

Water Management Highlight

No need to guess at how much water to apply for flushing an area, let Turf Guard tell you when enough water has been applied to push the salts out of the root zone. Don't wonder if you need to irrigate an area tonight, let Turf Guard tell you if the area is in an acceptable moisture level range.



Specifications

Dimensions

- Body: 50 mm (W) x 92 mm (H) x 156 mm (D)
- Spikes: 44 mm x 5 mm
- Installation Hole Diameter: 108 mm

Electrical Specifications

- Input Power:
  - Repeater: <.02A @ 6 VDC
  - Base Station: 240 VAC, 50 Hz

Temperature Specifications

- Operating: 0°C to 60°C
- Storage: -30°C to 82°C

Sensing

- 0.1°C Temperature resolution
- 0.1% Volumetric soil moisture content resolution
- 0.1 dS/m Soil conductivity resolution (Salinity)

Communication

- Repeater Range: Up to 1525 m line-of-sight
- Buried Sensor Range: Up to 150 m line-of-sight
- 900 MHz FHSS Communication
- Additional licensing not required

Operating Specifications and Additional Features

- Password Protected Web-based Interface
- Moisture Data available in Sentinel® Software Interface
- Immediately ready for operation after installation
- Advanced MESH routing technology overcomes obstacles
- Repeater can adapt to standard 240V outlet
- Durable sensor housing is resistant to aeration damage
- Supports up to 500 sensors per system
- Expected sensor battery life of 3 years, field replaceable
- Sensor reading sent every 5 minutes
- Automatic network configuration and failure recovery
- Graphical system overview displays sensor data-at-a-glance
- Plots trends and compares historical and current readings
- Move quickly from system-wide averages to individual sensor readings

Warranty

- Comes with 1 year of NSN support (extended support plans available)

How it works:

Multiple sensors buried in a site at critical root zone levels.

Above-ground repeaters installed on or in existing irrigation controller enclosures.

Wireless MESH networking links all sensors to central computer

Moisture, Temperature and Salinity readings displayed in your office

Sensor

Measures soil moisture, temperature, and salinity.

Repeater

Can run off of a standard 240V outlet or controller power-supply with adaptor.

Multiple sensors can be run through just one repeater, no configuration required.

Base Station

Connects to Internet in the office.

Web-based Interface

View current sensor readings and historical data remotely from any Web-connected computer or Web-enabled Mobile Phone or PDA.

Turf Guard Model List

Model	Description
AU	
TG-S2-R-AU	Turf Guard Sensor With Replaceable Battery
TG-R-INT-AU	Repeater-Internal Mount
TG-R-EXT-AU	Repeater-External Mount
TG-B-AU	Base Station
TG-PS-AU	Power Conversion Board
TG-S2-BAT	Replacement Battery
TS-TGB	Turf Guard Receiver for Sentinel

- **Rain or Rain/Freeze Sensor**
- **152 m Range**

No wires. No hassle. Just reliable rain sensing that provides optimum water savings. Toro® innovative wireless technology provides easy to use, advanced features for prompt reaction when it starts to rain.

Specifications

Dimensions

- Transmitter: 44 mm (W) x 89 mm (H) x 44 mm (D)
- Receiver: 51 mm (W) x 102 mm (H) x 44 mm (D)
- Weight: 0.4 kg product and carton

Electrical Specifications

- Transmitter Power: Two replaceable lithium cells
- (CR2032-3V)
- Receiver Power Source: 22-28 VAC/VDC, 100mA (from existing timer or optional tranformer)
- Relay contacts output: Normally-opened or normally-closed; 3A @ 24VAC
- FCC, IC, AVA, UL, CUL, CE and C-tick approved

Specifications and Features

- Operating temperature: -28°C–49°C
- Housing material: Weather and UV resistant engineered polymer
- Transmitting range: up to 152 m (line-of-sight) with adjustable antenna
- Sensor: maintenance free hygroscopic disks; adjustable rain sensitivity: 3 mm-20 mm
- Low battery indicator
- Signal strength indicator/scale
- Rain delay feature that works intelligently with the rain sensor (unlike most controller-based rain delays)
- Fail-safe modes in the event of loss of communications or failed sensor
- Real-time outside temperature displayed on the LCD (TWRFS only)
- Five year easy to replace, standard coin batteries
- Versatile mounting options – one-piece Quick-Clip™ gutter bracket or ½"(13 mm) conduit adapter
- Can control multiple receivers/controllers with one sensor transmitter

Warranty

- Five years

Features & Benefits

Smart Bypass™

Allows for system override at any time and resets automatically.

Rain/Freeze Combination

Features digital programmable accuracy – a first in the industry – The Freeze shutoff can be set from 2° to 7°C in 0.5°C increments.

Water Management Highlight

Water Conservation Modes

Selectable water conservation modes delay resumption of irrigation by intelligently extending beyond mechanical reset time and can save you up to 30%* more water.

* Savings vary based on sensor setting, watering schedule and other conditions.

First LCD In A Wireless Rainsensor

Provides informative system feedback including outside temperature, and transmitter signal strength and battery life

Wireless RainSensor Model List

Model	Description
TWRS-I	Toro Wireless RainSensor, 433,92 MHz
TWRFS-I	Toro Wireless Rain/Freeze Sensor, 433,92 MHz

- **Wired Rain**
- **Normally-Open or Normally-Closed**

When it rains sometimes all you need is a simple sensor that ensures the job gets done. With multiple set-points for adjustable rain sensitivity and maintenance-free sensing disks, Toro's TRS provides the reliability required.

Features & Benefits

Compatible With All Toro and Other Manufacturers' Controllers

Universal Normally Open and Normally Closed operation for compatibility with all controllers that are designed to accept a sensor device.

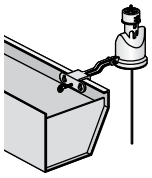
Maintenance Free Hygroscopic Discs

Industry standard sensing discs with adjustable rain shut-off indexes at 3 mm, 6 mm, 13 mm and 20 mm of rain.

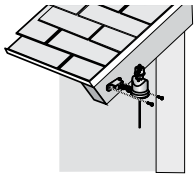
7.6m of UV-Resistant Cable

Includes 7.6 m of white outdoor-rated, UV-resistant cable.

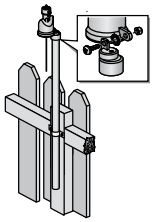
Three Mounting Options



Quick Clip gutter bracket



Wall mount



Conduit adapter

Specifications

Dimensions

- Transmitter: 44 mm (W) x 89 mm (H) x 44 mm (D)
- Weight: 0.4 kg product and carton

Specifications and Features

- Relay contacts output, normally open or normally closed: 3A, 24 VAC
- Operating temperature: -28°C to 49°C
- Low profile design and UV-resistant housing for sensor
- No special tools required for installation

Warranty

- Two years

** WaterSmart® Feature*

- **Central Control Software**
- **PC-based**
- **Flow Optimisation Across Satellites**

Sentinel Central Control from Toro® is a powerful system that literally "stands guard" over large irrigation sites. With the ability to control up to 999 field satellites from one location, users have a water management tool that provides reliability, accuracy and water savings.

iPhone®, iPad® and Android® Connectivity

Features & Benefits

Simple To Use
Microsoft® Windows-based software – daily operations and scheduling are made quick and easy.

Features For Water Management
ET-based watering, flow sensing and optimisation, water usage report with historical comparison.

Smartphone and Tablet Connectivity
The new Sentinel WMS software package also includes iPhone®, iPad® and Android® connectivity for remote programming and alerts on ALL new systems.

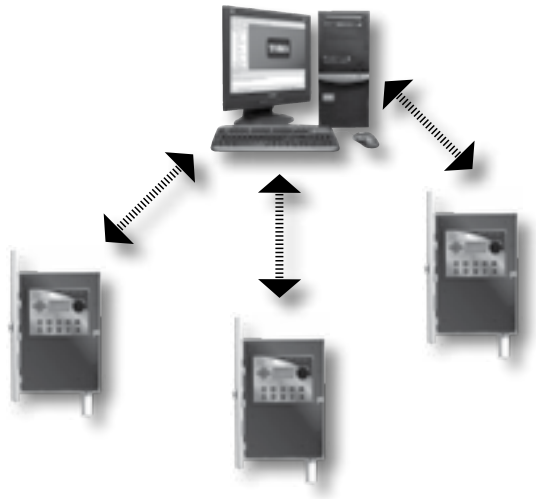
- iPhone® and the Apple logo are registered trademarks of Apple Inc. in the US and other countries.
- Android® and the Android logo are trademarks or registered trademarks of Google Inc.

Multiple Communication Options
Communication options like radio, telephone, fiber optics cellular, and Ethernet can be mixed and matched to meet system requirements.

Distributed Programming
Stores irrigation programs in the computer while allowing irrigation control at the satellite level, ensuring the loss of a component does not result in the loss of irrigation across the system.

Toro NSN® Support
All centrals come with a minimum of two years of NSN support – unlimited 24-hour toll-free support with 24/7/365 emergency paging.

Distributed Intelligence



Each Sentinel® controller is a fully intelligent unit with program data stored at both the field satellite and within the central computer. In the event the computer goes off line, there will be no loss of irrigation. True two-way communication allows programming changes to occur at the on-site field controller and uploaded to the central computer. Protection from unauthorized changes is ensured as the controller program can be easily compared to the program saved in the central computer.

Specifications

Specifications and Features

- Control up to 999 field satellites
- Group controllers into "systems" for system-wide adjustments:
  - Rain Days
  - Percent Adjust
  - ET-Adjustment from shared weather station
- Field changes to controller programs can be uploaded to computer
- Support for the System Administration
  - Set system, program and satellite descriptions
  - Map valve positions on site maps
  - Mark special dates on on-screen calendar
- Alarm reporting of any system component failure, including communications, over/under-flow conditions, electrical problems or power failure
- Extensive reporting features:
  - Run time reports
  - Water usage
  - Alarms
  - Logging of system changes
- Water use, rain and ET accumulation
- Flow optimizing to maintain optimum flow and shorten water window
- Ability to redefine valve sequence without physically changing wire terminations in field satellite
- Information overview by group and satellite
- System status indications for individual field satellite
- On-line help screens
- Map-based feedback on system status
- Standard internet connection allows for remote access to central software via NSN® Connect
- Multiple master valves programmable per station or program

Warranty

- Two year extendable by continuous NSN TotalCARE plan subscription

Sentinel Central Model List	
Central Software/Computer Models	
Model	**Description**
SGIS-1-T	Software Only w/2 years of NSN Support
SGIS-1-C	Software and computer w/2 years of NSN Support
SGIS-1-0	Software, Computer Equip, Peripheral Radio Hardware w/2 years of NSN Support

Sentinel Communications Options
Narrowband Radio (450-470 MHz)
Ethernet/Internet
Cell Enabled Data Modem
Landline Telephone
Spread Spectrum Radio (900 MHz)
Fiber Optics

ET-Based Watering

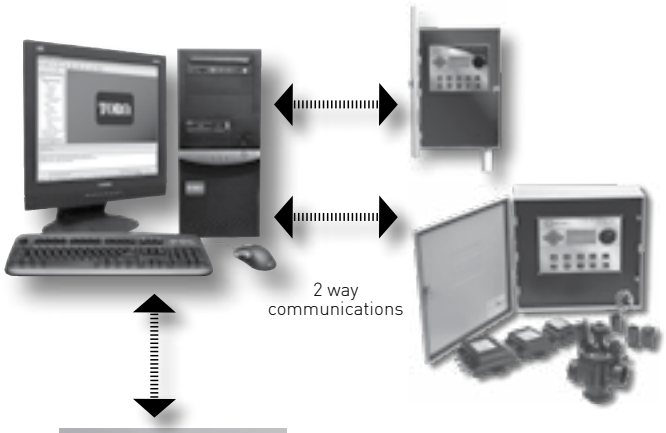
Maximise efficiency on your Sentinel system by using ET-Based watering. ET-Based watering automatically schedules irrigation based on individual landscape needs and local weather conditions, resulting in lower water bills and a healthier environment. Sentinel works in conjunction with multiple weather sources including wired and wireless on-site weather stations.

Recommended On-Site Weather Station

- Davis Vantage Pro 2
- Less Expensive
- Wireless (6162)
- AC powered
- Solar

Supported Weather Sources:

- Davis Instruments®
  - Vantage Pro 2 Plus™
- Campbell Scientfic®
  - ET 106
  - Turf Weather



On-site
Weather Station

- **12 to 48 Station models**
- **204 Stations with MapTo**
- **Flow Sensor Ready**

Toro® Sentinel field satellites are commercial grade, units that do the irrigation control work in the field. Designed to operate in both stand-alone and central mode.

The newly-redesigned satellite controller offers a number of new features and enhancements, including a completely-redesigned interface for easier standalone programming that incorporates a large backlit graphical display, new shortcut buttons for frequently-used functions, as well as a number of other additions.

WS1

Powder-coated, wall-mount enclosure

Features & Benefits

Flow Sensing
Reads, displays and reacts to under and over flow situations and track water usage. No additional circuit boards are required.

Weather Based Irrigation
Sentinel waters according to ET values by using one or a number of onsite weather stations.

Expanded Wireless Connectivity
Sentinel offers true two-way communication via several different connectivity options that can be mixed and matched to meet system requirements.

Firmware Updating
Firmware is now easier than ever to update or upgrade by simply inserting a USB thumb drive.

Advanced Troubleshooting
The new satellite controller has significantly more internal memory, allowing for extensive event logging and data storage, making it easier to diagnose issues in the field.

Water Management Highlight

The new satellite controller can easily be upgraded to operate with Turf Guard® wireless soil sensors, communicating directly with up to 16 sensors per controller (1 per program), continually measuring moisture, levels in the soil, and adjusting irrigation as needed.

Specifications

Dimensions

- Small wall-mount:
  260 mm (W) x 387 mm (H) x 133 mm (D)
- Weight: 9.5 kg

Electrical Specifications

- Input power:
  - 240 VAC/50 Hz
- Station output power:
  - 24 VAC
  - 1.0 amps per station maximum
  - 2.0 amps total load
- Surge protection: 24 V output boards, 20 KV @ 10 KVA

Specifications and Features

- 16 programs
- Eight start times per program
- 6-week scheduling calendar
- Station runtimes from one minute to 4 hours and 15 minutes
- Global adjustment from 0-255%
- Flow sensor ready
- Turf Guard ready
- Two sensor inputs included for rain sensors or other switch sensors
- ET and soil sensing options
- Operating temperature: -10˚ to 60˚C

Specifications and Features (cont.)

- Ability to connect to a laptop to download large station count programs
- Upgrade to a central computer system without additional field satellite hardware or costs
- Program single or multiple stations to operate sequentially or start a program or multiple programs with just a few keystrokes
- Ability to read open- or closed-contact switches in any station count configuration
- Current monitor will disable a station if excessive amp draw is detected
- Non-volatile memory will retain all programming and real-time data for 10 years
- Operating temperature: -10° to 60°C
- Surge rated to 20 KV @ 10 KVA

Optional Accessories

- TRS: Wired RainSensor
- TWRS/TWRFS: Wireless RainSensor or Wireless Rain/Freeze Sensor
- TFS: Flow Sensors
- TS-TGB: Turf Guard Base Station Module for Sentinel Satellite Connectivity

Warranty

- Five years

Sentinel® Wireless Wall Mount Controller

Sentinel Wireless Output Boards utilize spread spectrum radio communication between the control module and the output boards, allowing nearly unlimited installation flexibility while virtually eliminating surge damage to the control module. Retrofits and remote flow sensing are a snap as hardscape crossing issues are eliminated.

Warranty

- Five years

Specifications

Operational

- Wireless Output Controllers allow expansion of Sentinel Master Controllers to 204 stations
- Ability to mount outputs remote from Sentinel® Control Module
  - No cabling between output boards and control module improves protection of control module from power surges
- Improved sensing includes real-time current draw per station
- Manual station activation switches
- Long range and short range models

Dimensions

- Small wall mount 360 mm (W) x 330 mm (H) x 150 mm (D)

Specifying Information—Sentinel

Example: A 24-station wired Sentinel Controller in a powder-coated wall-mount cabinet would be specified as: **TS24WS1NR50HC**					

Easy to install and expand – a highly cost effective field controller for large central control installations. Using a two-wire path to communicate to decoders, the Sentinel Two-Wire controller eliminates high costs associated with traditional valve wiring.

Flow Sensor Compatible

Soil Sensing Option

DC Sentinel Two-Wire Station Decoders	
Model	**Description**
DEC-ISP-1	1-station with integrated surge protection (Operates up to two DC latching coils)
DEC-ISP-2	2-station with integrated surge protection (Operates up to four DC latching coils)
DEC-ISP-4	4-station with integrated surge protection (Operates up to eight DC latching coils)
DEC-SG-LINE	Sentinel two wire DC inline surge protection

Specifications

Operational

- Up to 204 stations
- Operates Valves with DC-Latching Solenoids
- 16 programs, eight start times per program
- 6-week or 365-day scheduling calendar
- Station runtimes from one minute to 4 hours and 15 minutes
- Global adjustment from 0-255%
- Flow sensor ready
- Two sensor inputs included for rain sensors or other switch sensors
- Operating Temperature: 0° to 60°C

Electrical

- Input power:
  - 240 VAC (50 Hz)
- Output power:
  - Up to 2 DC latching solenoids per station
  - Up to 16 simultaneous DC latching stations
- Two-wire path wiring (jacketed, twisted pair):
  - 2.1 mm^2
  - 4200 m max
- Decoder-to-solenoid wiring:
  - 1.5 mm^2
  - 150 m max

Dimensions

- Small wall-mount: 36 cm W x 33 cm H X 15 cm D
- Weight: 9.5 Kg

Optional Accessories

Sentinel® Flow Sensing

Toro Sentinel satellites have extensive flow reading, reaction, and reporting capabilities. All controllers come with two flow inputs and two alarm inputs available, and are compatible with both standard flow sensors as well as most hydrometers, including reed-switch and 3-wire pulse-diode models.

Specifications

- Two flow inputs available on all Sentinel controllers
- High, low, and zero flow detection by station or group of stations
- Unexpected flow detection outside of scheduled watering
- Volumetric flow shutdown option
- Projected and actual flow graphing
- Data exportable to customized Excel spreadsheets
- Each controller stores two years of flow data

Isn't it nice to know someone's got you covered? Available day or night, you can count on the Toro® National Support Network (NSN) team for total operational confidence.

Support for the Sentinel® Central Control

- Every Sentinel central package comes standard with 2-years NSN support
- Unlimited 24-hour support Technical assistance by email with next business day response
- Remote PC assistance where connectivity is available
- Support of Microsoft® operating system software when purchased from NSN
- NSN lab for field issue duplication and diagnostics
- Technical bulletins
- Remote data storage for duration of subscription period
- Extended warranty on central hardware components with continuous subscription

Features & Benefits

24-Hour, Seven-Day, 365 Support

Worldwide, Toro NSN is always available to answer your questions, troubleshoot your system and solve your problems. And if needed, our rapid central computer and component replacement service ensures minimal disruption to the operation of your irrigation system

The Confidence Of Working With The Best In The Business

NSN has a diagnostic lab on-site for each irrigation platform, all field hardware, plus ancillary products. The lab is used to duplicate field issues and investigate causes and solutions as part of Toro's commitment to continuous improvement. NSN is dedicated to irrigation — we know your business and expectations.

New System Support, Flexible Options To Renew

Every new Sentinel offering includes Toro NSN support. To protect your Toro investment long-term, choose a renewal option that gives you exactly what you need for continued reliable, cost-effective support and extended warranty, including equipment upgrades to keep your technology current and powerful.

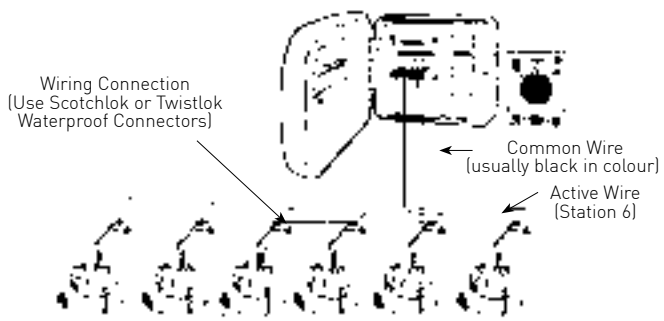
Basic Control Wire Layout for Raindial Controller



Please Note:

- *The common wire links one wire on all solenoid valves to the controller and is usually black in colour.*
- *An active wire is defined as that which connects a valve to a specific station. They can be various colours.*
- *When installing control wire, ensure wire is looped at valve location to allow for expansion/contraction and soil movement.*
- *Ensure all wire connections are accessible for later servicing/fault finding. All wire connections must be waterproof.*

Application

A battery operated, single or four station controller for situations where automatic control is required but power is not available, is difficult or expensive to procure.

Features

- Fully waterproof and submersible (to 2m, per IP68 standard) cabinet
- Mount directly on to valve, wall or valve box wall
- 1 and 4 station configurations
- Flip cover protects large LCD display
- Two independent programs
- "Water Budget" 10 to 200% (in 10% increments)
- Program start time stacking
- Low battery power indicator
- Watering times: 1 minute to 9 hours, 59 minutes, in 1 minute increments
- Start times: 3 starts per program
- Manual and semi-automatic starts
- Multiple watering day options – 7 day calendar or up to 14 day interval
- Rain off function
- Toro latching solenoid (DCLS-P) and 2400 MTF included with the 1 station model, waterproof wire connectors included
- Screwed cap / o-ring battery compartment
- Mounting bracket included
- Easy 4 button programming
- Smart "Reserve Power" feature will not allow activation without sufficent power to deactivate

Specifications

- Uses one 9 volt alkaline battery
- Operates 2 wire 9 volt DC coils (Toro DCLS-P)

Dimensions
(without mounting bracket)

- Height 125 mm
- Width 100 mm
- Depth 45 mm

Valve Compatibility

- DCLS-P suits Irritrol valves and Toro 220, P220, P150 and Ez-Flo Plus™ Solenoid valves.

Junior DC Controller

DCLS-P

Ordering Details	
Code	**Description**
JRDC – 1A	Single station Junior DC controller complete with 9 VDC latch coil and 2400MTF valve
JRDC – 4	Four station Junior DC controller only
DCLS-P	DCL Potted Latching Solenoid, 6-24 VDC

• 6, 9 and 12 Station Outdoor and Indoor

These popular, long-standing controllers offer exceptional scheduling flexibility and a host of new features for speed of progamming and maintenance and more pump control for bore and booster pump applications.

Key Features & Benefits

- 6, 9 and 12-station models
  - provides irrigation control for most sizes of residential landscapes
- Three independent programs
  - programming flexibility to meet the needs of a wide variety of plant material on the landscape site
- Three water day choices
  - Any-day-of-the-week
  - Skip days between water days (with day exclusion)
  - Odd or Even date watering (with day exclusion)
- Non-volatile memory
  - retains user's program during power outages
- Water budgeting per program
  - for quick changes to the watering durations of all stations on a program at one time. Changes, in 10% increments, reduce the need to readjust individual station running times for an entire program, 0-200%
- 365 calendar for odd/even date watering
  - meets the Odd/Even date watering mandates often used for landscape water reductions
- Master valve/pump start circuit assignable per station
  - Stations requiring a booster pump can be supplied while other stations can run on street water pressure
- Bore level recovery (delay between stations) 0-59 secs, 1-59 mins, 1-2 hrs
  (Option of pump circuit ON or OFF during delay)
  - bores that need recovery time from ground water between stations would not need the pump circuit on between stations
- Rain delay up to 9 days
  - saves water by allowing a manual setting of days of delay before automatically resuming the watering schedule
- Test all stations program
  - allows a quick test of all stations from lowest to highest zone number
- Manual station advance
  -during automatic, semi- automatic, and station test cycles, allows advancement of operation up through the stations
- Clear/erase memory by program
  - saves time by quickly erasing the program desired while leaving the others intact
- Program stack or overlap option
  - allows three programs/stations on at once or restricts operation to no overlapping station runs (to prevent too many valves on at one time)
- Snap-out face panels
- 9 and 12-station models have 12-station terminal boards allowing interchange front panels to change station number
- Self-diagnostic circuit breaker

Added Features

- Easy-to-read programming dial and self-prompting LCD
- Anywhere programming (under battery power)
- Automatic, semi-automatic and manual operation
- Weather-resistant plastic, key-lock cabinet with an internal transformer (outdoor models)
- Durable plastic cabinet wih an external transformer (indoor models)
- Electrical surge protection (on both input and output lines) resists damage from lightning storms and power surges
- Five-year warranty

Dimensions		
	OUTDOOR	INDOOR
H	197 mm	197 mm
W	273 mm	178 mm
D	102 mm	95 mm

Operating Specifications

- Station run times: 1-59 minutes in 1-minute increments or 1-5.9 hours in 0.1-hour (6 minute) increments
- Start times: 3 per program per day for 9 starts total
- Watering schedules per program:

Any day of the week
Skip days from 1 to 31 days between irrigation days
Odd or even date watering

Electrical Specifications

- Transformer input: 240VAC, 50Hz
- Transformer outpu: 24VAC, 1.25 amps
- Maximum output per station: 24VAC, 0.5amps
- Maximum output to valves: 24VAC, 1.0 amps (including master valve/pump start circuit)
- Battery backup for "armchair" programming and keeping current time and date: 9-volt alkaline (not included)
- Program memory: non-volatile

Optional Accessories

- RS1000-I Wireless Rain Sensor
- RS500 Wired Rain Sensor
- SR-1 Pump Start Relay

• 6, 9 and 12 Station
• Outdoor

Three fully independent programs, three start times per program and up to 12 stations make the KwikDial ideal for a wide range of residential applications.

Key Features & Benefits

- Three independent programs

Allows differing watering days, start times, station run times and station assignments

- Multiple watering day options

Provides flexibility to meet water restrictions and diverse plant requirements

– Days-of-the-week watering

– Odd/even date watering with 31st day skip

– Repeating-day-interval watering (every day, every 2nd day, every 3rd day, etc., up to once every 31 days)

- Self-diagnostic, electronic circuit breaker

Identifies and overrides an electrical "short" in a valve or in valve wiring and continues to water operable stations

- Sensor hookup with bypass switch compatible with the Irritrol Rainsensor™ series

Saves water by shutting off the system during rain

- "Program Stacking" feature

Prevents program overlap

- Electrical surge protection (on both input and output lines)

Resists damage from lightning storms and power surges

KD6-EXT-AC

Added Features

- Automatic, semi-automatic (manual program) and manual station(s) operation
- Programmable "Rain Off" up to seven days
- Dial and four push buttons for ease of programming
- Large LCD displays status of programs scheduled to run each day
- Multiple language capabilities (English, French, German, Italian and Spanish)
- Built-in memory maintains real time and programming information for a minimum of 24 hours in the absence of AC power (no battery required)
- "All stations" test program
- Water budgeting feature for each program (0-200% in 10% increments)
- Weather-resistant plastic case with internal transformer and provision on door for a padlock
- Complies with Australian electrical safety standards; C Tick approved
- Three-year warranty

Operating Specifications

- Station run times: 1-240 minutes (4 hours) in 1-minute increments
- Start times: 3 per program for up to 9 daily starts
- Watering day schedules: selectable per program for any days-of-the-week watering, interval watering (selectable in 1-day increments) from daily to once every 31 days, and odd/even-date watering (weekday exclusion option available in odd/even date and day-interval modes; e.g. water on all odd dates except Saturdays or water every three days except Tuesdays)

Electrical Specifications

- Transformer input: 240 VAC, 50Hz
- Transformer output: 24 VAC, 0.8 amp (including master valve)
- Capacity: One station valve plus a master valve (or 24 VAC pump start relay) on at a time
- Maximum output per station: 24 VAC, 0.4amp

Optional Accessories

- RS1000-I Wireless Rain Sensor
- RS500 Wired Rain Sensor
- SR-1 Pump Start Relay

- **6-1835 Lpm**

Features & Benefits

Effective Flow Monitoring Even In Flows Down to 6 Lpm

Effective in ranges from 6-1835 Lpm.
Teamed with the Toro TMC-424, 15 mm, 20 mm, 25 mm sensors provide a cost-effective flow monitoring and alarm system.

Compatible With Competitive Controllers

In addition to the TORO compatible controllers – TDC+, TMC-424E, TIS-PRO and Sentinel® – these flow sensors work with any controller or control system compatible with frequency output flow sensors (pulses per second proportional to flow velocity).

Recommended Operating Ranges for the TMC424 with TFS

Specifications

Specifications and Features

- Simple impeller-based design
- Potted electronics designed for valve box or underground applications
- Sensor pre-installed in tee
- Removable sensor design for easy replacement without removal of tee
- Socket end tee
- Output: 2-wire, unscaled pulse–pulse width 5msec +/- 25%
- Frequency: 3.2 to 200 Hz
  - Pressure Rating:
    15, 20 and 25 mm: up to 1030 kPa
  - 40, 50, 80, and 100 mm: up to 680 kPa
- Temperature Rating: Up to 60° C
- Flow Range (Velocity):
  - 15, 20 and 25 mm: 0.6-6.0 m per second
  - 40, 50, 80, and 100 mm: 0.1-9.1 m per second
- Tee:
  - 15, 20 and 25 mm: Schedule 40 PVC
  - 40, 50, 80, and 100 mm: Schedule 80 PVC
- Sensor Housing: Potted, PPS
  - Impeller:
    15, 20 and 25 mm: 300SST
    40, 50, 80, and 100 mm: Glass-filled nylon
- Shaft: Tungsten Carbide
- Bearing: UHMWPE
  - In-Field Wiring
- Use shielded twisted pair cable suitable for direct burial. Use Toro Communication cable (code 591-008/HC). Maximum distance from sensor to controller is 600 metres.
- When connecting to a Toro controller, connect the red wire to "IN", "SIGNAL", or "(+)" terminal and the black wire to "GND", "SIGNAL", "(-)" or "COM" terminal.
- Ensure connections are made and kept waterproof. Use 3M DBY wire connectors.
- To avoid signal corruption, do not install wiring alongside high voltage cables.

Warranty

- Two years

• 6, 9, 12, 15, 18 and 24 Stations
• Outdoor and Indoor

Maximum scheduling flexibility in an easy-to-use format makes this innovative controller ideal for a wide range of sophisticated watering requirements.

Key Features & Benefits

- Four independent programs offer concurrent operation capability - for scheduling flexibility
- Seven-day calendar, odd/even day or day - interval options of one to 30 days - provides the flexibility to meet water restrictions or plant water requirements
- Programmable master valve on/off per program - provides the flexibility of running some programs with a booster pump and some without
- Non-volatile memory - holds program during power failures for reliable operation
- Snap-out design - allows easy removal of control module without disturbing valve wiring for hassle-free station upgrade (6 to 9 or 9 to 12 and 15 to 18 or 18 to 24) and servicing
- Flexible station run times and start times - meet a broad range of watering requirements
- 6, 9 and 12-station models have 12-station terminal boards; 15, 18 and 24 models have 24 station terminal boards - allows increase of station count simply by changing face panel module (6 to 12 and 15 to 24)
- Sensor hooked up with bypass switch compatible with the wireless Rainsensor™ series. - saves water by shutting off the system during rain

Dimensions	
	OUTDOOR
H	216 mm
W	267 mm
D	127 mm

Added Features

- User-friendly, 10-position programming dial and large, easy-to-read display
- Excluded-day option, when used with the odd/even day option, allows selection of specific day(s) not to water
- 365-day calendar for odd/even day programming
- Start time stacking within each program
- Water budgeting
- Programmable "Rain Off" up to seven days
- Automatic, semi-automatic, manual and timed-manual operation
- Self-diagnostic circuit breaker identifies and overrides an electrical malfunction on a valve
- Electrical surge protection (on both input and output lines) resists damage from lightning storms and power outages
- Battery backup keeps accurate time for up to 90 days during power failures
- Valve test terminal for easy valve identification
- Weather-resistant, plastic key-lock cabinet with an internal transformer
- Wall mount
- Complies with Australian electrical safety standards; C Tick approved
- Five-year warranty

Operating Specifications

- Station run times: 1 minute to 10 hours in 1 minute increments
- Start times: 16 total starts assignable to any program
- Watering schedule: 7 day calendar, odd/even day or interval option of 1-30 days
- Water budgeting: 10-200% in 10% increments

Electrical Specifications

- Electronic circuit breaker: 1.25 amps minimum holding
- Maximum output per station: 24 VAC, 0.5 amp
- Maximum output to valves: 24 VAC, 1.25 amps (including master valve)
- Battery backup: 9-volt alkaline battery (not included)
- Transformer input: 240 VAC, 50 Hz
- Transformer output: 24 VAC, 1.67 amps

Ordering Information	
Code	Description
TC6A	Total Control 6 Station Controller - 4 Program with Built-in Transformer, Remote Ready
TC9A	Total Control 9 Station Controller - 4 Program with Built-in Transformer, Remote Ready
TC12A	Total Control 12 Station Controller - 4 Program with Built-in Transformer, Remote Ready
TC18A	Total Control 18 Station Controller - 4 Program with Built-in Transformer, Remote Ready
TC24A	Total Control 24 Station Controller - 4 Program with Built-in Transformer, Remote Ready

Application

For use in automatically controlling filter flush solenoid valves and motors.

Features

- Easy scroll through programming allows program to be altered for each site
- Microprocessor control
- Able to control 24 VAC or 12 VDC, 2 wire latched solenoids
- Can control a maximum of 8 filter flush valves and one 240 VAC motor
- Flushing based on Time or Pressure Differential or Flow input (PD or flow switch required)
- Display shows time to next flush (if time based) and total number of flushes
- Controller can be set up to detect periods of no flow and to prevent filter flushing during this time - requires a flow switch or pulse meter
- Capable of flushing after specific volume - pulse flow meter required
- Weatherproof cabinet
- Can also control downstream isolating mainline solenoid valve during filter flushing

Power Inputs

- 240 VAC IEC female connector
- 24 VAC
- 12 VDC

Inputs

- Three input terminals - Pause, Differential Pressure Switch and Flow Input
- Requires Normally Open switch (not supplied with controller)

Programmable Output

- Output relay can be programmed to perform any one of four functions - filter flushing, fault output, alarm output, excess flow
- Relay suitable for maximum of 5 amps. Power supply to this relay must be fused to maximum 5 amps

Multiple Sand Filter Setup

In-Line and Snap-On Filters

Filtration device designed to trap foreign particles in the water and reduce clogging of emitters.

Application

For low pressure (up to 300 kPa) micro irrigation systems.

Features

- In-Line model with single barb inlet and outlet
- Snap-On model for direct connection to standard tap adaptors
- 80 mesh screen filter
- Easily taken apart for cleaning
- Effective compact filter with minimal flow loss

In-Line Filter *Snap-On Filter*

Ordering Information	
Code	**Description**
IN-LINE FILTERS: 80 MESH SCREEN	
10144355	In-Line Filter 13 mm Barb
10144375	In-Line Filter 19 mm Barb
SNAP-ON FILTERS: 80 MESH SCREEN	
10144355	Snap-On Filter 13 mm Barb
10144375	Snap-On Filter 19 mm Barb

Pressure Reducing Filter

Application

All in one pressure reducer and filter. Pressure regulator regulates water pressure downstream and the filter prevents dirt and debris blocking the irrigation system.

Specifications

- Filter Screen: 200 mesh
- Maximum input Pressure: 1,000 kPa
- Output pressure: 172 kPa
- Maximum flow of 27 Lpm downstream of unit
- Made from Glass filled Polypropylene

1011680/1011681 Pressure Reducing Filter

Ordering Information	
Code	**Description**
1011681	20 mm Pressure Reducing Filter, 200 Mesh, 172 kPa
1011680	25 mm Pressure Reducing Filter, 200 Mesh, 172 kPa

PBS Plastic Body Screen Filter

Application

- Ideal for smaller drip and micro sprinkler systems with flows up to 6.0 m³/hr.
- Hydraulic valve command water filtration
- Sizes available:

  20 mm - Maximum
  Flow rate 1.8 m³/hr (10 kPa loss)

  25 mm - Maximum
  Flow rate 2.8 m³/hr (10 kPa loss)

  32 mm - Maximum
  Flow rate 4.5 m³/hr (10 kPa loss)

  40 mm - Maximum
  Flow rate 6.0 m³/hr (10 kPa loss)

1011122

Features

- Male BSP connections
- Rugged corrosion resistant nylon canister and cap, stainless steel screen
- Easily dismantled for thorough cleaning
- Inox screen cartridge
- O'ring in Buna-N
- Locking ring glass reinforced Nylon 6
- Maximum working pressure: 1000 kPa
- Available in 150 mesh / 100 micron

Ordering Information	
Code	**Description**
1011120	20 mm (¾") - 150 Mesh Screen
1011122	25 mm (1") - 120 Mesh Screen
1011124	32 mm (1¼") - 150 Mesh Screen
1011126	40 mm (1½") - 150 Mesh Screen
1011126SCN	150 Mesh Screen, to suit 1011122, 1011124, 1011126

PBD Plastic Body Disc Filter - MBSP

25, 40 mm Disc Filter

Application

- For smaller drip and micro sprinkler systems with flows up to 7 m³/hr
- Sizes available :

  25 mm - Max Flow rate 4.5 m³/hr

  40 mm - Max Flow rate 7 m³/hr

  (Flow rate based on 10 kPa loss)

Features

- Male BSP connections
- Rugged corrosion resistant nylon canister and cap
- Easily dismantled for thorough cleaning
- Disc cartridge
- Maximum working pressure: 1000 kPa
- Available in 150 mesh / 100 micron disc

Ordering Information	
Code	**Description**
1011165	25 mm (1") MBSP Disc Filter - 150 Mesh
1011167	40 mm (1½") MBSP Disc Filter - 150 Mesh

XD Plastic Body Disc Filter - MBSP

Application

For in-field back-up filtration and other situations where manual cleaning is suitable.

Features

- 50mm and 80mm MBSP models
- Angle or In-line configuration in the same model
- 80, 120 mesh discs available
- Glass fibre reinforced nylon body with polypropylene discs
- Ring nut collar for easy disassembly and maintenance
- Maximum working pressure: 1000 kPa
- 25mm plastic ball valve supplied as manual filter flush valve
- Patented disc system greatly increases the effective filtering surface area
- Inlet and outlet ports for pressure gauges. Ports need to be drilled and tapped

** Based on 10 kPa loss*

Ordering Information	
Code	**Description**
101XD5080	50mm MBSP XD disc Filter, 80 mesh (Grey discs)
101XD50120	50mm MBSP XD disc Filter, 120 mesh (Blue discs)
101XD8080	80mm MBSP XD disc Filter, 80 mesh (Grey discs)
101XD80120	80mm MBSP XD disc Filter, 120 mesh (Blue discs)

Application

- Suitable for micro irrigation systems or as back up filter at control valves in the field
- All sizes available with 80 or 120 mesh screens
- Other mesh screens available upon request

Features

- Steel construction and epoxy/polyester coated
- Screen constructed of PVC with Stainless Steel mesh
- Direct flow method where water passes along the length of the filter screen
- Inlet / outlet at 90 degrees
- Maximum operating pressure: 800 kPa
- Pressure test points upstream and downstream of screen (pressure gauge and needle adaptor required)

Note:
In some installations a pressure release valve must be inserted before the filtering installation.

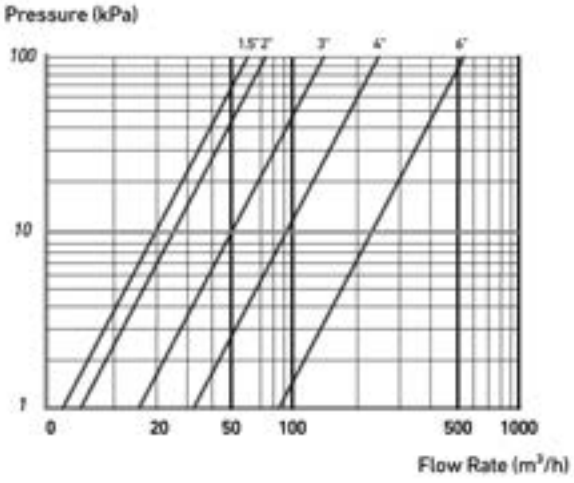
F100 - Pressure Loss Graph



Application

- Suitable for micro and sprinkler irrigation systems or as back up filter at the control valves in the field
- Models F215/F220 available with 80 or 120 mesh screens
- Models F230/F240/F260 available with 40, 80 or 120 mesh screen
- Model F280 available with 30 or 40 mesh screen (other screens available)
- Model F2100 available with 30 mesh screen (other screens available)

Features

- Steel construction and epoxy polyester coated
- Screen constructed of PVC with stainless steel mesh
- Direct flow method where water passes along the length of the filter screen
- Pressure test points upstream and downstream of screen. (Pressure gauge and needle adaptor required)
- Inlet / outlet at 180 degrees
- Simple cleaning by opening drain valve or removal of element
- Maximum operating pressure: 800 kPa

Note:
In some installations a pressure release valve may be required before the filter station

F100 Right Angle Manual Disc Filter

Application

- Suitable for micro irrigation systems or as back up filter at control valves in the field
- Both sizes available with 80 mesh (purple) or 120 mesh (red) discs

Features

- Steel construction and epoxy/polyester coated
- Disc constructed of plastic
- Inlet/Outlet at 90 degrees
- Simple cleaning by opening drain valve or removal of element
- Maximum operating pressure: 800 kPa

Note:
In some installations a pressure release valve must be inserted before the filtering installation

SA500C and SA500L Right Angle Semi Automatic Suction Screen Filter

Application

The SA500C is used in a wide range of applications in the Industrial, Municipal, Commercial and Agricultural sectors. Commonly used as a primary or secondary filter for sprinkler, drip, mini, and micro irrigation systems.

Features

- Filter housing material of construction: Carbon Steel ST37.2
- Pre-treatment: sand blasting up to Sa 2.5 grade
- Exterior & Interior coating: electrostatic oven baked polyester-epoxy powder coating with a thickness of 150-200 micron
- Minimum operating pressure: 100 kPa
- Maximum operating pressure: 1000 kPa
- Maximum working temperature: 65°C
- Manually operated flush valve
- Manually rotated suction scanner
- Standard 80 mesh (200 micron) or 120 mesh (120 micron) screen
- Screen made from 316 stainless steel
- Low flush rates, 6-10 m^3/h (SA500C), 40 m^3/h (SA500L)

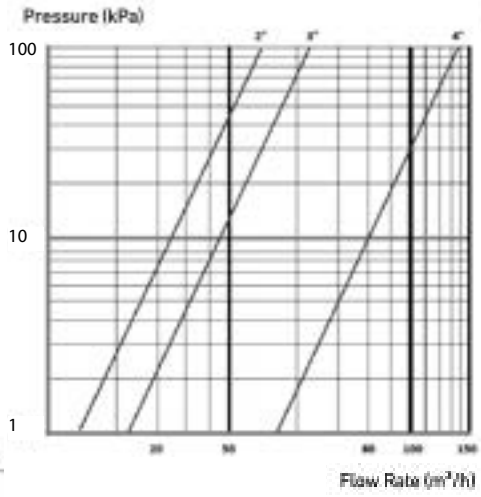
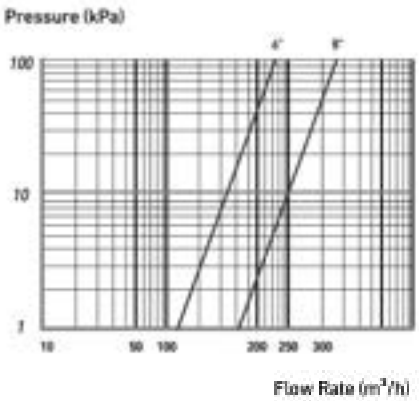
Semi Automatic Filters - Series SA500C
Pressure Loss Graph



Semi Automatic Filters - Series SA500L
Pressure Loss Graph



Application

- For use with drip, micro and sprinkler irrigation systems and back up filtration at the control valves in the field
- Screens available in 40, 80 and 120 mesh. Other screens available upon request

Features

- Baked epoxy coated carbon steel body
- Screen made from 316 stainless steel
- Automatic self cleaning with control voltage either 6 VDC or 12 VDC
- Clean filter pressure loss 10 kPa - for maximum recommended flows
- Maximum operating pressure: 1000 kPa
- Minimum operating pressure: 200 kPa
- 5 second flushing cycle (user settable)
- Pressure differential or time based flushing control
- Flush valve - 25 mm (AF202-204)
  - 50 mm (AF206-208)
- Low flush rate - 6 m^3/h (at 200 kPa) 50, 80, 100 mm
  - 12 m^3/h (at 200 kPa) 150, 200 mm

S= Filter with large filtration area
** Flow rate data is for high quality water at filtration grade of 120 mesh. De-rate the filter flow rate depending on water quality, load and filtration grade.*
*** Flushing flow rate data is for minimum operational pressure (200 kPa)*
Flush water consumption (at 200 kPa): 8 Litres (50, 80, 100 mm) ; 16 Litres (150, 200 mm)
All auto screen filters come with complete instruction booklets for operation and maintenance

AF800 Parallel and In-Line Hydraulic Auto Screen Filter Suction Scanner

Application

- For use with drip, micro and sprinkler irrigation systems and back up filtration at the control valves in the field.
- All screens are 120 mesh (standard). 40 and 80 mesh also available as standard in some models. Other screens available upon request.

Features

- Available in parallel or in-line configuration
- Filter housing material of construction: Carbon Steel ST37.2
- Pre-treatment: sand blasting up to Sa 2.5 grade
- Exterior & Interior coating: electrostatic oven baked polyester-epoxy powder coating with a thickness of 150-200 micron (some configurations available with galvanised body)
- Filter element: - Stainless Steel screen AISI 316 mesh, supported by a PVC cylinder
- Automatic self cleaning with 6VDC or 12VDC controller
- Minimum operating pressure: 200 kPa
- Maximum operating pressure: 1000 kPa
- 10 second flushing cycle (user settable)
- Pressure differential or time-based flushing control
- Table D flanges (standard). Others built to order

All auto screen filters come with complete instruction booklets for operation and maintenance

F700 Epoxy Coated Hydrocyclone Separator

Application

- For use prior to primary filtration with bore water. Ideal for removing large volumes of suspended material denser than water and to reduce the load on the primary filter
- For use in all forms of irrigation

Features

- Inlet/Outlet
  – MBSP threads on 25,40 and 50 mm
  – Flanged table D on 80,100, 150 and 200 mm
- 90 degree Inlet/Outlet configuration
- Filter housing material of construction: Carbon Steel ST37.2
- Pre-treatment: sand blasting up to Sa 2.5 grade
- Interior and exterior coating: electrostatic oven baked polyester-epoxy powder coating with a thickness of 150-200 micron
- Manual operation
- Dirt collector (sump) included with each unit
- Maximum operating pressure: 1000 kPa
- Size available
  25 mm – 200 mm
- Flow range: 4 to 330 m³/hr
- Centrifugal flow action causes particles to precipitate down the wall of the unit and into the dirt collector

Note:
It is critical when selecting the correct unit to ensure that the flow rate passed through the unit falls within the 20 to 50 kPa head loss region (shown shaded on the chart).

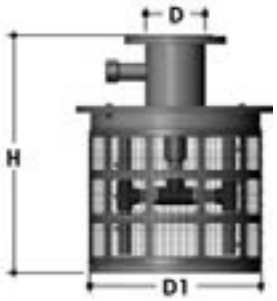
Application

The hydraulic pre-pump strainers (PPS) are self-cleaning and enable high quality pumping from different types of water sources such as sewage, reservoirs, rivers and lakes. The PPS helps to extend the life of the pump and protects the entire filtration system from becoming clogged and deteriorating, ensuring effective and efficient pumping is maintained.

The PPS is submerged in the water source, when pumping starts, water flows through the screen. Large suspended debris and dirt accumulates on the screen preventing it from entering the pump and the water system. The screen is automatically self-cleaned by water spray from the nozzles, continuously rotating and covering the entire area of the screen.



Features

- Outlet: 100 mm, 150 mm, 200 mm, 250 mm and 300 mm
- Body of strainer and connections: Carbon Steel ST37.2
- Pre-treatment: sand blasting up to Sa 2.5 grade
- Exterior & Interior coating: electrostatic oven baked polyester-epoxy powder coating with a thickness of 150-200 micron
- Screen made from 304 stainless steel
- Operating pressure: 200-300 kPa
- Supplied with 2500 micron screen
- Includes 12 m of 25 mm flexible flush pipe with connection fittings
- Tripod legs available to order separately

F600 Epoxy Coated Vertical Media Tanks

Applications

- Vertical Epoxy coated carbon steel tanks designed for use in large commercial irrigation systems where a high level of quality filtration is required
- Used for tape and drip systems and in dirty water situations with micro irrigation systems
- Used to collect chemicals that have been precipitated out of solution

Features

- Filter housing material of construction: Carbon Steel ST37.2
- Pre-treatment: sand blasting up to Sa 2.5 grade
- Exterior & Interior coating: electrostatic oven baked polyester-epoxy powder coating with a thickness of 150-200 micron
- Suitable for use with sand, gravel or a combination of both media
- Filtration systems are supplied complete with flushing valves, inlet/outlet manifolds, backup screen filter
- Maximum Pressure: 800 kPa
- Tanks available in 300, 400, 500, 635, 760, 900 and 1220 mm diameter
- Stations supplied as in-line with 2 to 6 tanks (depending on tank size)

Note: The flow ranges given in these tables are indicative only. All filter selections must be based on de-rating the flow capacity to suit the grade of filtration required, the particle size and load and seasonal variations. Pad dimensions typically allow a minimum clearance of 600mm all around the filter assembly as per the diagram above.

Applications

For use with F600 Sand Media Tanks. The valves provide three way operation for backwashing.

Features

- Unique diaphragm actuated plug assembly for smooth operation
- No rolling diaphragm
- Closes supply port before backflush port opens
- No supply water to waste
- High flow capacity

Pressure Loss, Kv Factor for Bermad 350 series Backwash Valves (Angle Flow)

Code	Valve	Filtering Mode	Backwash Mode
BFLV22P	2x2-350-P	K_v = 52	K_v = 48
BFLV33P	3x3-350-P	K_v = 110	K_v = 100
BFLV44P	4x4-350-P	K_v = 225	K_v = 205

Pressure Loss Equation : $P = (Q / K_v)^2$ where P = pressure loss in bar, Q = flow in m^3/hr, $K_v = m^3/hr$ at pressure loss of 1 Bar

F600HM Epoxy Coated Vertical Deep Bed Media Tanks

Applications

- Deep bed vertical epoxy coated carbon steel tanks for use in industrial water treatment applications where longer contact time is required.
- For use in irrigation systems where greater depth of media may be needed.

Features

- Suitable for use with sand, gravel or a combination of both media.
- Maximum pressure : 800 kPa
- Tanks available in 500, 760, 900 and 1220 mm diameter.
- Tanks sold separately, not as part of array

**Recommended media depth 1000mm.*

Applications

Vertical stainless steel sand media filters, designed for large commercial irrigation systems where a high quality of filtration is required.

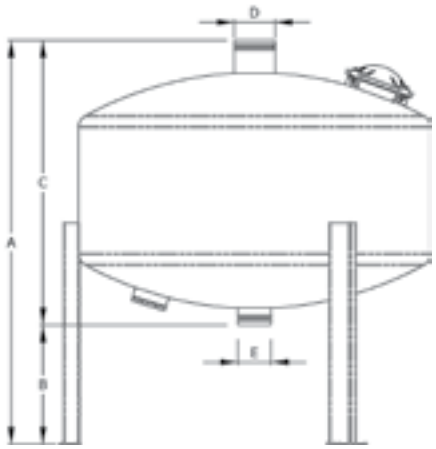
Features

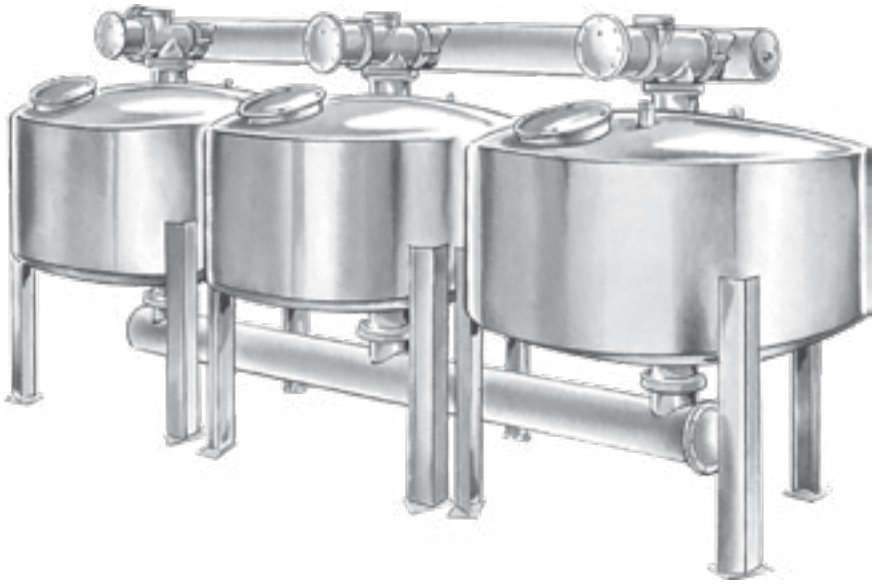
- Available as manifolded kits to filter a wide range of flows
- Kits can be further manifolded when higher flow rates are required
- Constructed of durable stainless steel to provide a lifetime of service
- Unique 'flow balanced' under-drain designed for trouble-free operation
- Ensures even water distribution during filtration and backwash
- Multiple stainless steel under-drain inlets with V-shaped slots help reduce particle entrapment
- Station includes tanks, inlet and outlet manifold, backwash valves, associated manifold fittings, back-up strainer, manifold supports, hydraulic control assembly.

  Not included are; solenoids, controller, media, PD switch, controller support bracket, back wash line and associated fittings, air release valve.

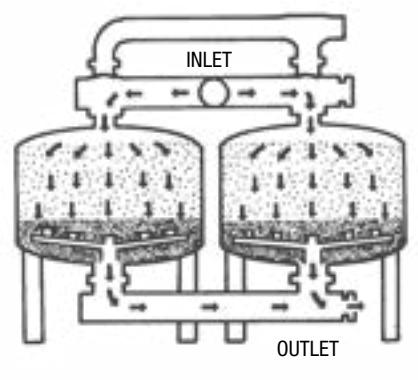
Specifications

- Media Tanks and Manifold: Grade 304 Stainless Steel
- Backwash Valves and Port Hole Covers: Cast Iron ASTM A126 Class B with fusion epoxy coat
- Valve Components: Type 304 Stainless Steel, PVC stem and O-rings
- Pressure Rating: 1000 kPa



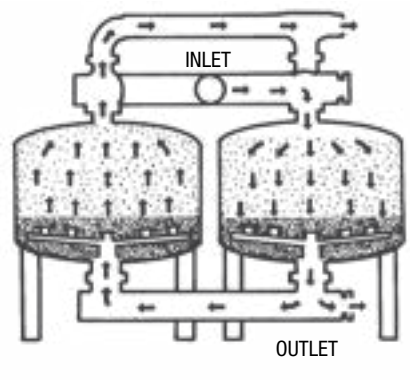


The key to trouble free irrigation. Vertical, stainless steel sand media filters, available in a range of models and flows to suit most applications.



Filtering

The under drain inlets are evenly placed beneath the sand media bed and provide for uniform 'lift' during backwash, as well as uniform through-flow during filtration.



Backwashing

This 'lift' creates rapid mobilisation of the sand bed, enabling shorter backwash cycles, less backwash disposal and energy cost savings.

Stainless Steel Media Tank Dimensions

Tank Size mm/inch	A (mm)	B (mm)	C (mm)	D (mm)	E (mm)

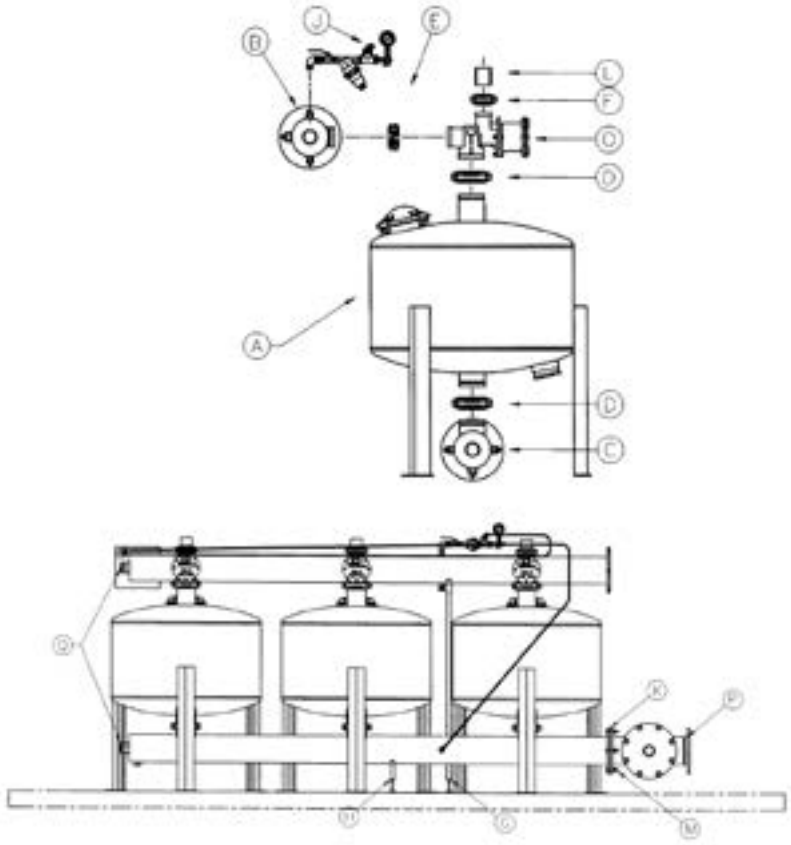
Item Label	Description
A	Filter tank
B	Inlet Manifold
C	Outlet Manifold
D	Tank Outlet Victaulic Coupling
E	Valve Inlet Victaulic Coupling
F	Valve Backwash Victaulic Coupling
G	Inlet Manifold Support
H	Outlet Manifold Support
I*	Hydraulic Tube Kit – suits up to 3 tanks
J	Hydraulic Charging Head
K	Table D Insertion Gasket
L	PVC Grooved Adaptor
M	GI Nut, Bolt and Washer
N*	Teflon Tape one roll per tank
O	Backwash Valve
P	Flanged Basket Strainer
Q	50 mm Poly Plug
R*	20 mm Poly Plug

** Not shown on drawing*

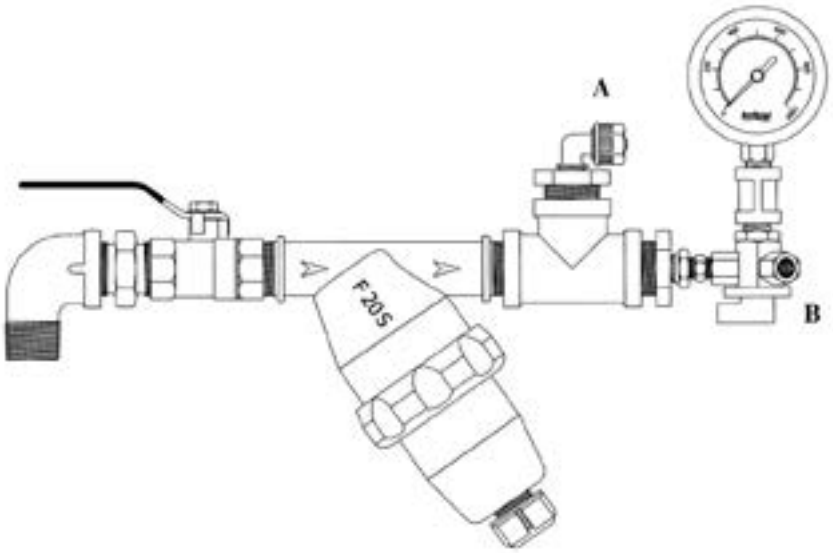


Flush Port Victaulic Adaptor detail
65 mm PVC victaulic adaptor acts as a 50mm PVC socket.
100 mm PVC victaulic adaptor acts as a 100mm PVC adaptor.

Hydraulic Charging Head
Code: 101HCH

Used to filter the supply line to hydraulically operated solenoid valves.

- Port A is the high pressure port
- Port B is the low pressure port
- 20 mm MBSP inlet elbow
- 0-1000 kPa pressure gauge and 3 way brass valve
- 20 mm Plastic screen filter (150 mesh)



Pressure Differential Switch
Code: A20DPK30-K, A20DPK15-K

Used to trigger filter flush cycle on a controller.

- Settable Differential range 0 to 200 kPa (A20DPK30-K), 0 to 100 kPa (A20DPK15-K).
- 1/8" NPTM ports
- Normally open or closed switch (user settable)
- Supplied with U shaped mounting bracket, two 1/8" FBSP x 8 mm tube connectors

PD Switch Bracket
Code: 101PDBRAC

For use specifically to mount the PD switch to the stainless steel media manifold.

- Manufactured from 2 mm thick stainless steel
- 25 mm MBSP mounting thread
- 115 mm high, 63 mm wide

Filter Flush Controller Bracket
Code: 101FFCP

Designed specifically to mount the 8 station filter flush controller and PD switch onto the stainless steel media manifold.

- Manufactured from 2 mm thick stainless steel
- Four pre-drilled holes to suit 101FFC8
- 292 mm wide, 259 mm high
- 25 mm MBSP mounting thread
- Mounting hole to suit Pressure Differential Switch

An inexpensive secondary "trap" to be used downstream of the principal filter station

Features

- Supplied with either victaulic or flanged (table D) inlet and outlets
- Max. operating pressure: 700 kPa
- 80 mesh standard screen
- Type 304 stainless steel housing and basket
- Cost efficient system protection
- High flow with low pressure drop safety strainer

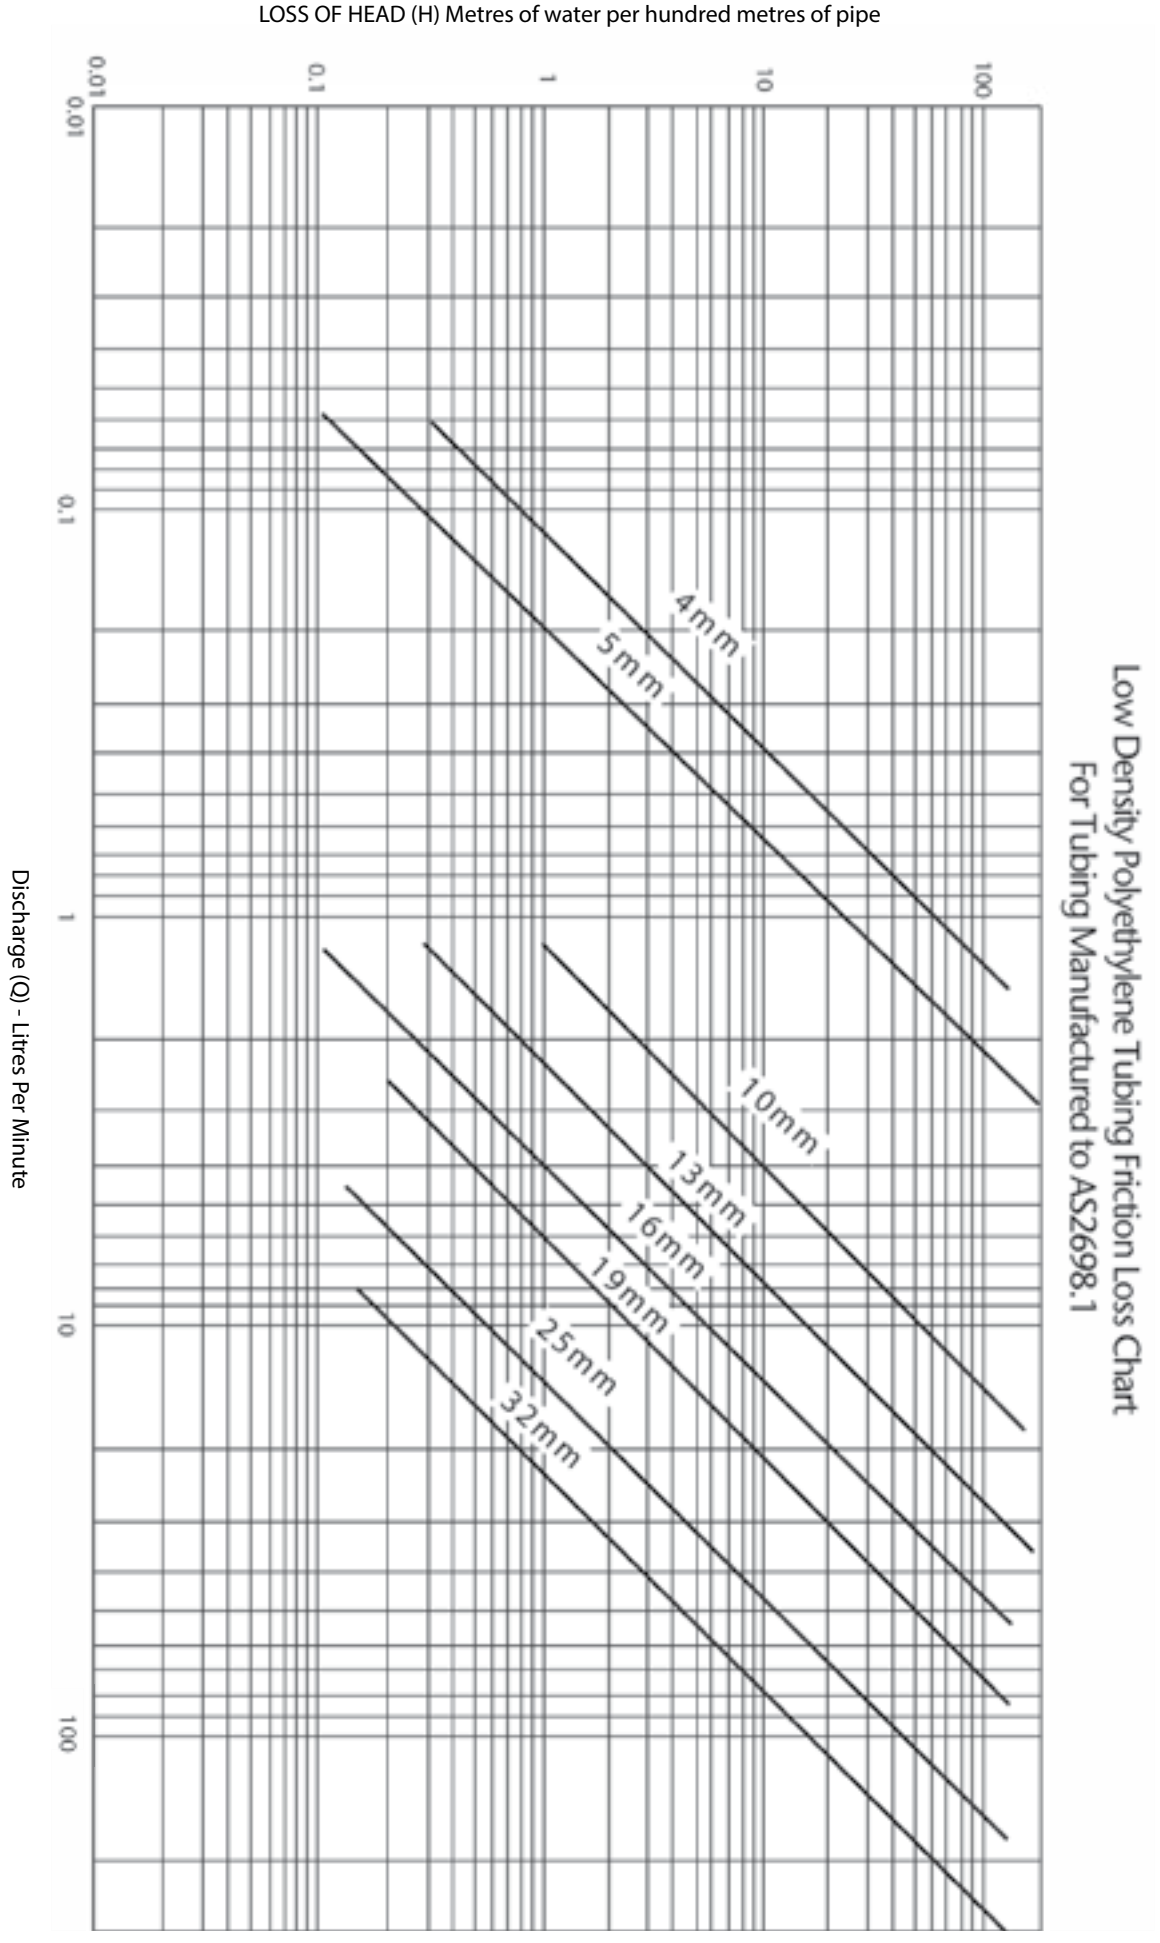
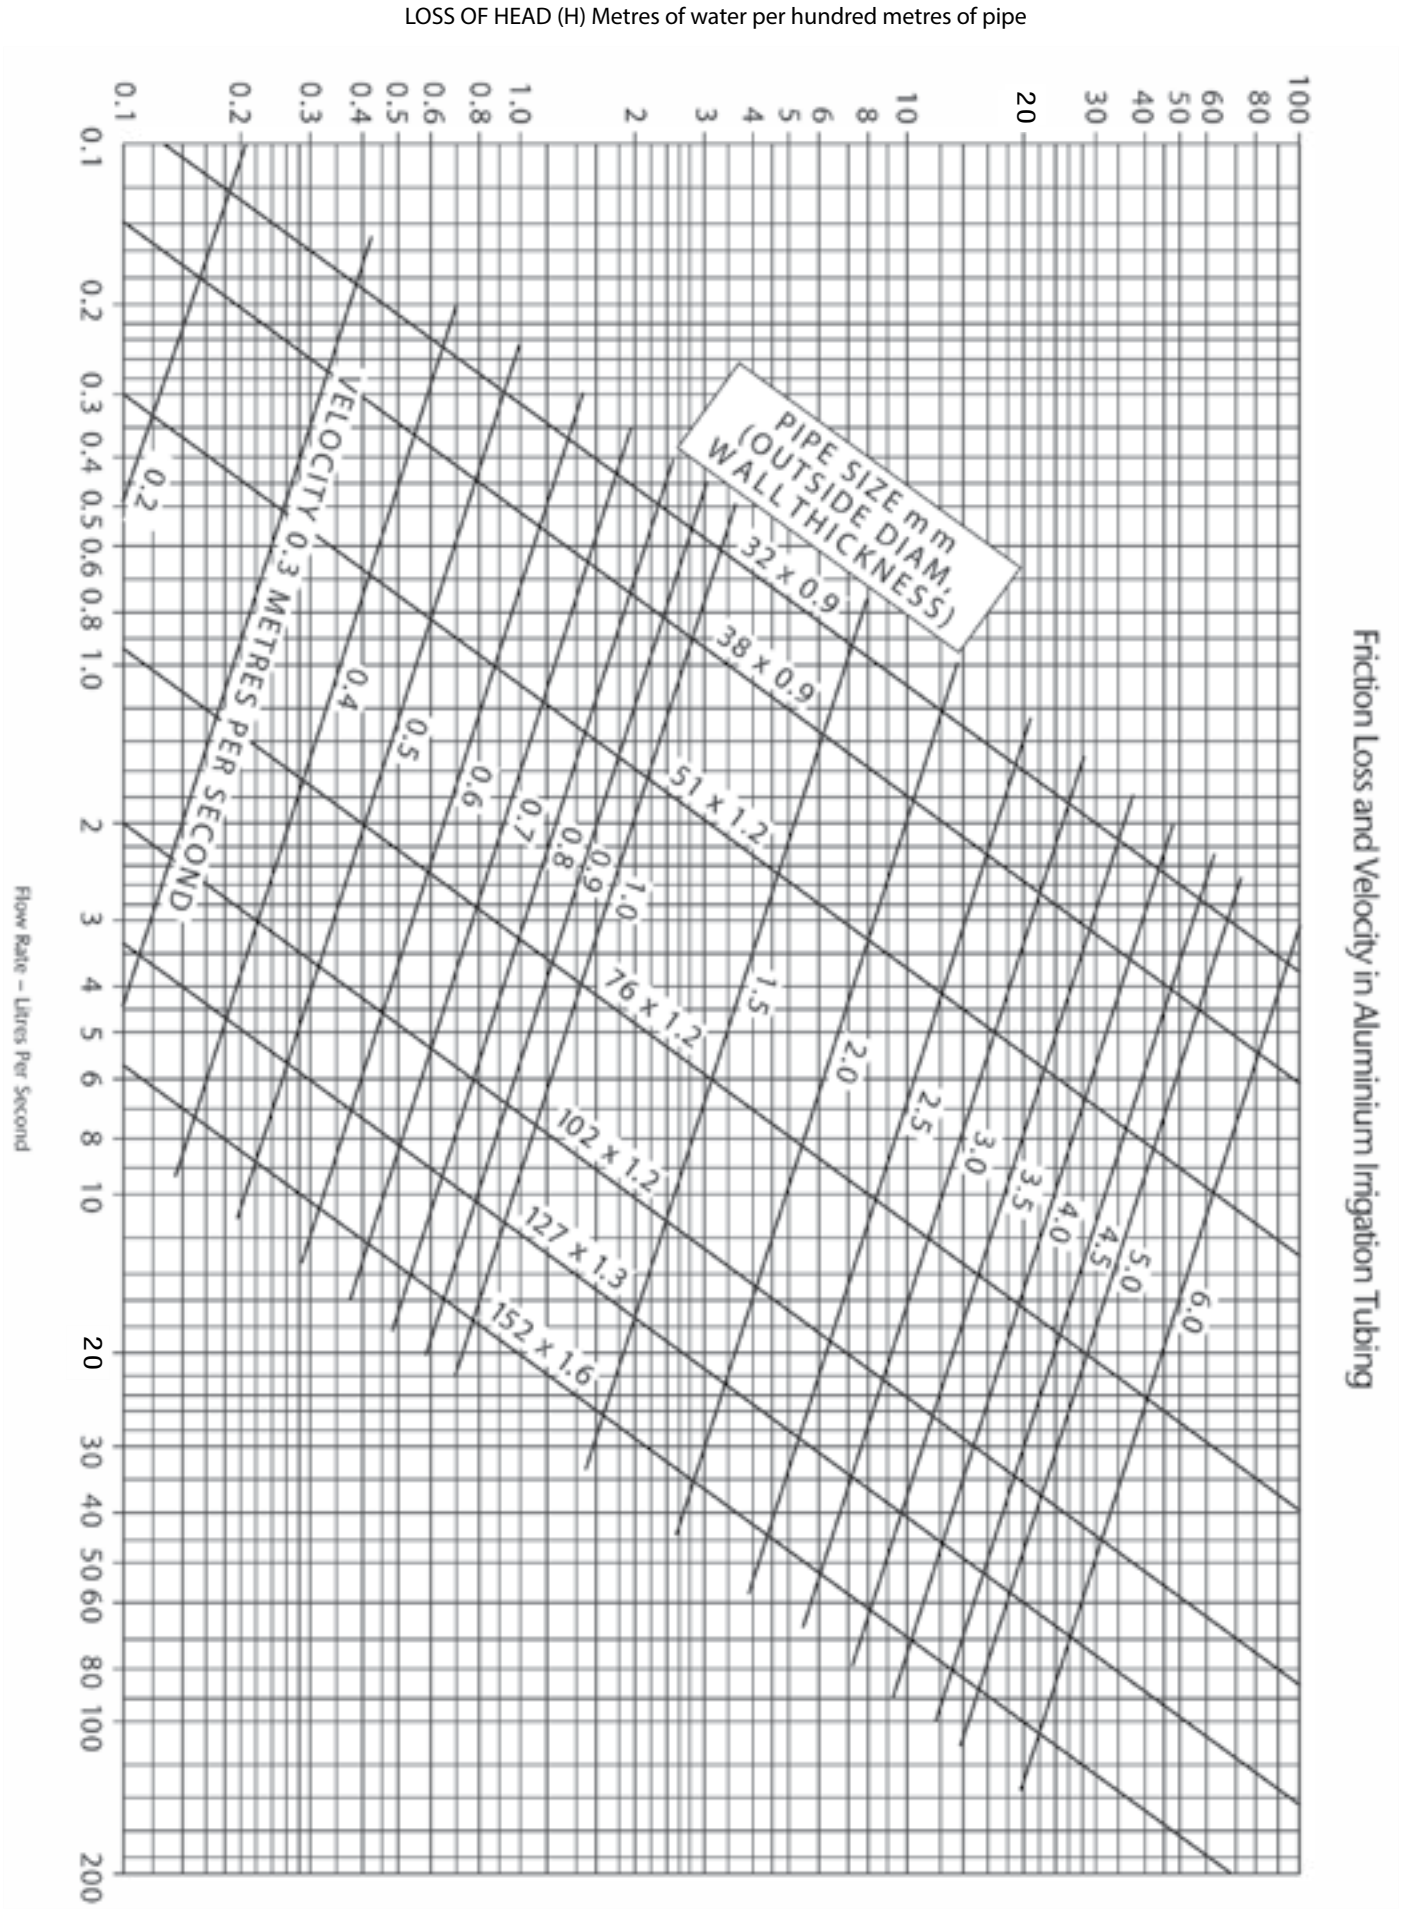
Friction Loss Chart – Low Density Polyethylene Tubing



Friction Loss Chart – Aluminium Tubing



Method of Wire Sizing from controller to solenoid valve

Data Needed

- Inrush current of the solenoid valve (I)
- Distance in metres (one way) between controller and solenoid valve (D)
- The allowable voltage drop in the wire without affecting the operation of the solenoid valve (Vd)

Steps

Calculate the maximum allowable wire resistance per 1000 metres with the following formula:

$$R = \frac{500^* \times Vd}{D \times I}$$

where R = allowable wire resistance per 1000 metres

** This assumes that the active and common wires are the same size*

Example: A valve with a minimum operating voltage of 20 volts and an inrush current of 0.34 amps is to be located 650 metres from the controller. The controller minimum output voltage is 24 VAC.

The allowable voltage drop
Vd = 24-20 = 4 volts

The distance to the valve (D)
= 650 metres

The current draw (I) = 0.34 amps

$$R = \frac{500 \times 4}{650 \times 0.34} = 9.05 \text{ ohms/1000m}$$

From Table 1, 1.5 mm² wire has too much resistance, therefore select 2.5 mm².

Table 2 provides maximum wire runs given a solenoid valve with a minimum operating voltage of 20 volts AC, an inrush current of 0.34 amps and a controller minimum output voltage of 24 VAC.

For example, such a solenoid that was 810 metres away from the controller, could have a 2.5 mm² active with a 4 mm² common wire.

Table 1
Copper Wire Resistance

Nominal Area of Conductor (mm²)	Resistance at 20 C ohms / 1000 m
0.5	38.4
1.0	21.2
1.5	13.6
2.5	7.4
4.0	4.6
6.0	3.1
10.0	1.8
16.0	1.1

Table 2
Maximum one-way distance between controller and valve

Common Wire (mm²)	Active Wire (mm²)					
	0.50	1.00	1.50	2.50	4.00	6.00
0.50	153	197	226	257	274	283
1.00	197	277	338	411	456	484
1.50	226	338	433	560	646	704
2.50	257	411	560	795	980	1120
4.00	274	456	646	980	1279	1528
6.00	283	484	704	1120	1528	1898

This table has been calculated based on the following factors. Solenoid voltage: 24VAC, Maximum Pressure: 1000 kPa, Voltage drop: 4 volts, Solenoid inrush current: 0.34 Amps.

2.4	75	6.4	4.3	3.2	2.6	2.1

Precipitation Rate Formula

$$\text{Precipitation Rate (mm/hr)} = \frac{\text{10,000 x Emitter Flow (lph)}}{\text{Width of Contained Landscape (cm) x Emitter Spacing (cm)}}$$

Thermal effects on dripline

For recurring, ambient temperatures above 23°C, multiply pressure rating of selected tubing by the appropriate FACTOR from the table below. Result will be the temp-corrected maximum pressure rating for the tubing selected. For temperatures not shown but between 23°C and 60°C, interpolate to obtain the temp-corrected maximum pressure. Use this information to select the appropriate pressure regulator to assure tubing life expectancy and warranty coverage.

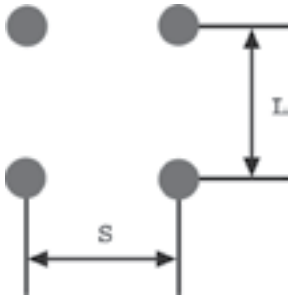
°C	Factor
23	1.00
27	0.92
32	0.81
38	0.70
43	0.60
49	0.45
54	0.32
60	0.18

The following information has been compiled to assist in the correct selection of both sprinklers and jets.

Recommended Spacings:

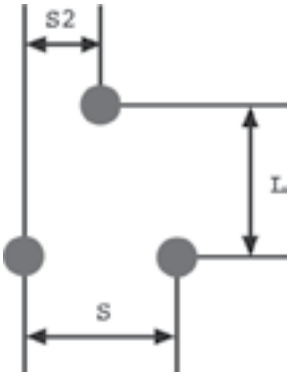
Rectangular

- No wind: 55% of diameter of throw
- 0-6 km/hr: 50% of diameter of throw
- 6-12 km/hr: 45% of diameter of throw



Triangular

- No wind: 55% of diameter of throw
- 0-6 km/hr: 50% of diameter of throw
- 6-12 km/hr: 45% of diameter of throw



Calculating Precipitation Rate

PR = Precipitation Rate (mm/h)

Q = Flow of full circle sprinkler (Lpm)

L = Row spacing (m)

S = Sprinkler Spacing (m)

$$\text{Precipitation} = \frac{Q \times 60}{L \times S}$$

Please Note:
'No Wind' conditions should only be used for indoor systems.

Sprinkler Jet Conversions

A number of sprinkler jets are stated in 64th of an inch.

- To convert from 64th of an inch to mm:
  A × 0.397 = mm
  A = 64th of an inch
  e.g. 9/64, A= 9
- To convert from mm to 64th of an inch:
  B × 2.54 = 64th of an inch
  B = mm
  e.g. 5.6mm = 14/64"

Estimating the Supply Capacity Requirements for an Area

The following factors need to be determined.

1. Area = A (m^2)
2. The application amount required for the worst possible situation = P (mm/week)
3. The irrigation time period per week for the worst possible situation = T (hours)
4. The irrigation efficiency = E (e.g. Irrigation efficiency is 80%, E = 80)

$$\text{Flow Rate (litres per minute)} = \frac{A \times P \times 100}{60 \times T \times E}$$

Metric Conversion Tables

Measure	Metric	Imperial	U.S.

Temperature	°C = 5/9 (°F – 32)	(9 × °C)/ 5 + 32 = °F	(9 × °C)/ 5 + 32 = °F

Data is approximate for every day use.
1.0m^3 = 1000 litres.

Precipitation and Infiltration Rates

Precipitation Rates

To avoid run-off and water wastage, select sprinklers so that the precipitation rate is less than or equal to the infiltration rate of the soil. The type of soil, condition of both soil and ground cover, and slope affect the infiltration rate. The table below shows some indicative average rates. Always confirm the infiltration rate with on-site tests.

Where system precipitation rates are higher than the infiltration rate, it may be possible to avoid run-off by repeating the irrigation cycle for shorter periods of time.

Table 1: Indicative Maximum Precipitation Rates – mm/hour

Soil Texture	0-5% slope		5-8% slope		8-12% slope		12+ % slope	
	Cover	Bare	Cover	Bare	Cover	Bare	Cover	Bare
Coarse sandy soils	50	50	50	38	38	25	25	12
Coarse sandy soils over compact subsoils	44	38	31	25	25	19	19	10
Light sandy loams uniform	44	25	31	20	25	15	19	10
Light sandy loams over compact subsoils	31	19	25	12	19	10	12	7
Uniform silt soils	25	12	20	10	15	7	10	5
Silt soils over compact subsoil	15	7	12	6	10	4	7	2.5
Heavy clay or clay loam	5	4	4	2.5	3	2	2.5	1.5

The maximum precipitation rates values listed in this table are suggested by the US Department of Agriculture. The values are indicative averages only and may vary with respect to actual soil and ground cover condition.

Piping Flow Rates

Flow Rates

One of the selection criteria irrigation designers use to select pipe sizing for mainline pipe is to maintain the velocity of flow through the mainline pipe to be less than or equal to 1.5 m/s. Pressure rating and pressure loss are other criteria.

Tables 1 and 2 indicate flow rates in litres per minute for various PVC (AS 1477) and PE (AS/NZS 4130S1) pipe sizes for a velocity of 1.5 metres per second.

Pipe sizing in sprinkler laterals (pipes downstream of the zone control valve) is based on maintaining the zone pressure to within a set tolerance. As a result, velocities in sprinkler laterals can sometimes need to be raised higher than 1.5 m/s in an effort to balance friction loss and pressure gained by elevation differences. This decision should only be undertaken by someone experienced in hydraulic design.

Table 1
Mainline Flow Rates for 1.5 m/s Velocity PVC Pipe
